Foreword	xi
Preface	xiii
by Gilbert H. Castle III	
Purpose	xiii
What Is a GIS?	xv
Organization of the Text	xvi
The Authors	xvi
About the Authors	xvii
Introduction	1
by Stephen E. Roulac	
Chapter 1	5
An Overview of GIS Technology in Real Estate	
by John Landis, PhD	
How Does GIS Work?	5
GIS Functionality: What Can It Do?	8
Presentation and thematic mapping	
Geocoding and address matching	
Data queries and spatial queries	
Database preparation and updating	
Measuring distances and minimum paths	
Buffering and point-in polygoning	
Overlay and other polygon processes	
GIS Uses in Real Estate	13
Appraisers	
Brokers	
Property developers	
Investors and fund managers	
Lenders	
Market researchers and analysts	
Shopping center owners and operators	
Navigating the Ever-Changing GIS Marketplace	16
Street navigation: where am I?	
Mapping add-ons	
GIS viewers	
Specialized map analysis tools	
Full-function GIS	
The newest frontier: maps and mapping over the Internet	

Finding the Right Real Estate Data	19
Base maps	
Real estate demand data	
Real estate supply data	
Transaction data	
Regulatory and entitlement data	
Image data	
Organizing for a Competitive Advantage	21
The desktop model	
The management information system model	
The vertically integrated model	
Conclusion	23
Chapter 2	24
Commercial Applications of GIS Technology	
by Gilbert H. Castle III	
Property Valuation	24
Applications and benefits	
Case studies	
Implementation considerations	
The bottom line	
Commercial Brokerage	29
Applications and benefits	
Case studies	
Implementation considerations	
The bottom line	
Institutional Real Estate	36
Applications and benefits	
Case studies	
Implementation considerations	
The bottom line	
Corporate Real Estate	42
Applications and benefits	
Case studies	
Implementation considerations	
The bottom line	
Additional Private Sector Applications	48
Data vendors	
Mortgage underwriters	
Developers	
Consultants	
Timber companies	
Public Sector Applications	53
Asset management	
Economic development	
Government agencies selling GIS data	
Conclusion	56

Chapter 3	57
Residential Real Estate and GIS	
by Marcie Wallis and Anthony Hutchinson	
The National Association of Realtors®	57
GIS Products for the Realtor®	58
Vendor-developed systems	
Proprietary computer systems	
GIS Technology Mishaps	60
HomeView Realty Centers, Inc.	
Real Estate Information Network (RIN)	
The Internet	61
The GIS Future for Residential Realtors®	63
Developing market territory	
Locating potential home buyers	
Locating homes for buyers	
Optimal routing of "tours/caravans"	
Listing presentations	
Realtor® association applications	
Conclusion	65
Chapter 4	66
Overview and Case Studies in GIS-Based Appraisal	
by Michael L. Robbins, PhD, CRE	
The Nature of the Real Estate Decision Process	67
What is real estate?	
Feasibility analysis	
Approaches to determining feasibility	
Marketing—The Key to Development	70
Market research	
Market data versus merchandising data	
The ethics of fit and monopoly	
The role of GIS	
General Types of Spatial Data	75
Spatial measurement	
Generation of buffers	
Graphic area data	
Attribute data to match with graphic area data	
Point data	
Attribute data to match with point data	
Point to area data	
Case Studies	78
Improved property analysis: Bear Valley area	
Unimproved property analysis: the Morrison quad	
Case study conclusions	
Spatial Decision Support for Automated Residential Property Valuation	87
Purpose	
Valuation methodology	
Strategic objectives of automated valuation methodology	
The working environment of automated valuation	

Market demand	
The production product	
Life cycles	
The role of GIS in automated valuation	
Conclusion	95
Chapter 5	96
Application of GIS to Real Estate Appraisal Problems	
by Bruce R. Weber, MAI	
Chapter Overview	97
Use of GIS in Appraisal Review	98
Example 1. Dot density mapping: basic quantification of demand	
Example 2. Calculation of areas and volumes: contaminated soils	
Example 3. Use of point-in polygoning to find comparables	
Example 4. Calculating overlapping areas: biologically valuable land	
Example 5. Use of data queries: an industrial example	
Use of GIS in Retail Analysis	
Example 6. Large retail site	
Combining GIS Databases	
Example 7. Residential land example	
Use of GIS for Business Cycle Analysis and Forecasting	116
The human model of forecasting	
Example 8. The Phoenix office market	
Real estate market forecasts	
Example 9. Defining the relevant market area for a large apartment complex	
How GIS Can Help Appraisers Respond to Criticism	121
Summary and Conclusion	122
Chapter 6	124
The Appraiser and GIS in a Litigation Context	
by Bill Mundy, MAI, PhD, CRE	
The Choice of an Expert	124
The Appraiser as an Expert	124
Inception	
Data gathering and analysis	
Summary	130
Chapter 7	131
Software, Data, and Management Considerations in Establishing a GIS/Mapping System	
by L. Ried Schott, MAI, SRA	
Similarities and Differences Between Mapping and GIS	131
Critical Success Factors	133
Software	134
Background	
GIS categories	
Mapping categories	
Specialization	
Summary and conclusions of GIS and mapping software	

Data	145
Data sources and types	
Data classifications	
Aerials, photos, diagrams, and maps	
Supplemental sources	
In-house information	
Final comments on data issues	
Management Issues	153
Tangible returns	
Intangible returns	
Financial considerations	
Vendor support	
Staffing and assistance	
Education and training	
Implementation alternatives	
Organizational Issues	161
Preimplementation studies	
Answering questions	
Final Comments	164
Chapter 8	165
Real Estate Information Technology: The Future Is Today	
by Grant Ian Thrall, PhD	
Residential Real Estate	166
Residential brokerage	
Mortgage lending	
Appraisal	
Housing demand	
Commercial Property	169
Office	
Retail	
Industrial	
Implementation Factors	171
Geographic data	
GIS software	
Real estate information technology personnel	
Conclusions	174
Appendix 1	
Additional GIS Sources	175
Appendix 2	
Color Maps	183
