Appraisal Institute Education Programs

(Last updated July 2022)

Education program descriptions
This comprehensive catalog provides descriptions, total classroom/online hours, AI CE points, and state CE or QE for the following programs:

- Classroom courses
- Classroom seminars
- On demand online courses
- On demand online seminars
- Live online synchronous programs
- Webinars
- Professional Development programs
- Chapter Resources-Spotlights
- General Demonstration Report Capstone program
- Client Education program

For complete information on each program, please SEARCH the Appraisal Institute Web Site.

Note. Not all programs are approved in each state; please check the Appraisal Institute State Certification Web Page at for state approvals.

**Classroom Education: Courses**

**Advanced Concepts & Case Studies**
Synthesizes the three approaches to value, examines their applications, and helps participants apply basic and advanced valuation techniques. Case Studies teach participants to analyze and organize data and choose the appropriate tools to solve appraisal problems. Emphasizes the need to test the reasonableness of all the conclusions reached in an appraisal.

- Total 40 hours (2 pre-class online, 35 classroom, 3 exam); general appraisers; required MAI designation course. Approved for CE (most states). AQB approved as a QE Certified General elective. [click here](#) to check your state’s QE elective approval status. AI CE credit: Attend only - 275 points; Attend and Pass - 375 points; Pass exam only - 325 points.

**Advanced Income Capitalization**
Advanced applications of the income capitalization approach are investigated and explored. Discounted cash flow analysis provides the framework for much of the discussion of investment analysis concepts, emphasizing an understanding of the relationships among the various components of DCF, financial leverage, and risk analysis. The course uses hands-on computer spreadsheet modeling techniques for in-class illustrations and practices of taught concepts.

- Total 35 hours (2 pre-class online, 30 classroom, 3 exam); general appraisers; required MAI designation course. Approved for CE (most states). AQB approved as a QE Certified General elective. [click here](#) to check your state’s QE elective approval status. AI CE credit: Attend only - 275 points; Attend and Pass - 375 points; Pass exam only - 325 points.

**Advanced Market Analysis and Highest & Best Use**
Building on the Level B marketability studies that were applied in General Appraiser Market Analysis and Highest & Best Use, you should learn how to perform Level C marketability studies using fundamental demand analysis and have the opportunity to study several real estate markets in a single city. Draw credible conclusions about the demand for and capture of four different subject properties: residential multifamily, industrial, retail, and land with potential for mixed-use development. An in-depth analysis of related issues including urban structures, market cycles, and economic base analysis is provided. The mixed-use development study as well as consideration of conversion of the multifamily property for condominium use should broaden your understanding of highest and best use analysis and give you even more tools to apply it.

- Total 35 hours (2 pre-class online, 30 classroom, 3 exam); general appraisers; required MAI designation course. Approved for CE (most states). AQB approved as a QE Certified General elective. [click here](#) to check your state’s QE elective approval status. AI CE credit: Attend only - 275 points; Attend and Pass - 375 points; Pass exam only - 325 points.

**Advanced Residential Applications and Case Studies/Part 1**
In Part 1 of a two-part course package, you will apply appraisal techniques to solve a complex residential case study appraisal assignment. You will put your knowledge of terminology, concepts, procedures, and methods to the test as you demonstrate competence in the areas of appraisal analysis learned in previous courses. By successfully completing the course and exam, you will have met most states’ education requirements in the content area identified as advanced residential applications and case studies. Individuals who are seeking the Appraisal Institute SRA designation may take this course and Advanced Residential Report Writing/Part 2 as an alternative to complete the Residential Demonstration of Knowledge requirement.

- 14 classroom hours + 1 hour exam; residential appraisers; required SRA designation course; QE, AQB approved. AI CE credit: Attend only - 175 points; Attend and Pass - 225 points.
Advanced Residential Report Writing/Part 2
In Part 2 of a two-course package, you are provided with the tools to write sections of a narrative report. You will complete eight writing assignments based on sections of a narrative appraisal report for the case study property you analyzed in Part 1. Successful completion of this course should increase your ability to 1) apply a wide range of appraisal procedures to solve complex appraisal problems and 2) use a narrative reporting format with confidence to explain and support your conclusions convincingly. Individuals seeking the Appraisal Institute SRA designation may take this course and Advanced Residential Applications and Case Studies/Part 1 as an alternative to complete the Residential Demonstration of Knowledge requirement.

- 28 classroom hours + 2-hour exam; residential appraisers; required SRA designation course; QE, AQB approved (may be used to fulfill the 20-hour Elective topic requirement toward residential certification in states where approved). AI CE credit: Attend only - 275 points; Attend and Pass - 375 points.

Advanced Spreadsheet Modeling for Valuation Applications
This two-day course will teach appraisers to prepare advanced analyses in a simpler manner and with less error. It will appeal to participants with experience in market analysis and highest and best use and also those with experience in applying inferred market analysis. The focus is on problem solving and efficiency while uncovering some of the tools of the spreadsheet program that will make an analysis stronger and increase productivity. Participants will find the applications especially helpful in the areas of market analysis, feasibility analysis, and highest and best use. Gain techniques to solve real-world problems and develop best practices in modeling that can be applied in other situations.

- 14 classroom hours + 1-hour exam; general and residential appraisers; AQB approved, CE; Analytics for Valuation Professional Development Program course—for more information see the FAQs. AI CE credit: Attend only - 150 points; Attend and Pass - 200 points.

Application & Interpretation of Simple Linear Regression
This two-day course is designed for appraisal professionals who want to learn how to use Microsoft® Excel to apply statistical methods to valuation problems. The course employs Excel’s “data analysis” add-in and charting capabilities to assist in developing descriptive statistics and in using simple linear regression analysis to estimate linear relationships between two variables. Topics include descriptive statistics, charts and tables, an introduction to simple linear regression, assumptions underlying application of linear regression modeling, nonlinear curve fitting, prediction and forecasting, data sufficiency, and separation of pooled data by submarket. Participants will be engaged in hands-on learning, discovering and applying basic statistical methods to data sets custom built to illustrate each session’s objectives in a valuation context. This course will help you gain a solid understanding of simple linear regression analysis and be prepared for more advanced multiple linear regression study.

- 14 classroom hours + 1-hour exam; general and residential appraisers; AQB approved, CE; Analytics for Valuation Professional Development Program course—for more information see the FAQs. AI CE credit: Attend only - 150 points; Attend and Pass - 200 points.

Appraisal of Manufactured Homes
This course, developed in collaboration with Freddie Mac, provides an in-depth look into preparing appraisals for traditional manufactured homes plus insight into CHOICEHomeSM—the new type of high-quality manufactured homes that are built to HUD code but developed with site-built features. You’ll learn how to meet the specific requirements of Freddie Mac, the Federal Housing Authority (FHA), Veteran’s Administration (VA), United States Department of Agriculture (USDA) and Fannie Mae using a new, ground-breaking tool—the Manufactured Home Quality Rating Worksheet – which is consistent with the Marshall & Swift®—CoreLogic Residential Cost Handbook and the Uniform Appraisal Dataset (UAD).

- 7.5 classroom hours + 1-hour exam; residential appraisers; AQB approved, CE. AI CE credit: Attend only - 35 points.
Basic Appraisal Principles
If you are considering a career in professional valuation services, your journey should begin with Basic Appraisal Principles. This four-day course will introduce you to real property concepts and characteristics, legal considerations, influences on real estate values, types of value, economic principles, real estate markets and analysis, highest and best use, and ethical considerations. The course should provide a solid foundation in basic appraisal principles no matter what appraisal specialty you pursue.

- 28 classroom hours + 2-hour exam; general and residential appraisers; AQB approved, QE, CE; online version available. AI CE credit: Attend only - 150 points; Attend and Pass - 200 points; Pass exam only - 150 points.

Basic Appraisal Procedures
Apply the principles and concepts learned in Basic Appraisal Principles. This four-day course takes you step-by-step through the valuation process: defining the problem, collecting and analyzing data, reaching a final opinion of value, and communicating the appraisal. Learn about the three approaches to reaching an opinion of value—income capitalization, cost, and sales comparison—and apply them in true-to-life case studies and problems. After examining income capitalization methods and formulas, learn how rates and multipliers are derived. Through case studies discover the steps and concepts involved in the cost approach—how appraisers estimate the cost of constructing a reproduction of or replacement for an existing structure; the three major components of depreciation and methods for estimating and allocating depreciation; and land and site valuation. The course will guide you through the sales comparison approach including researching the market, verifying information, selecting units of comparison, conducting a comparative analysis, making adjustments, and reconciliation. Complete key sections of an appraisal report. Finally, the course provides an introduction to property description and construction and design basics.

- 28 classroom hours + 2-hour exam; general and residential appraisers; AQB approved, QE, CE; online version available. AI CE credit: Attend only - 150 points; Attend and Pass - 200 points; Pass exam only - 150 points.

Business Practices and Ethics
This is an important course that provides information about standards and ethics requirements for valuers in general and, more specifically, for valuers who belong to the Appraisal Institute. Through discussion questions and examples, the class compares behavior and actions that illustrate violations of the Code of Professional Ethics, and participants learn how referrals can be made. Participants are also introduced to the Appraisal Institute Guide Notes to the Standards of Professional Practice and use these Guide Notes to resolve everyday appraisal practice problems. At the end of the course, they learn about common errors in appraisal reports and review reports, and they respond to questions about challenges that arise in appraisal practice such as requests for updates and requests to change or add intended users.

- 6 classroom hours; general and residential appraisers; Designated members, Candidates, Practicing Affiliates, and those interested in readmitting to the Appraisal Institute should enroll in this course. Note. This course is required CE for Designated members, Candidates, and Practicing Affiliates.; CE, AQB approved; online version available. AI CE credit: Attend only - 30 points.

Case Studies in Appraising Green Residential Buildings
This one-day course introduces participants to valuation methods for appraising the high-performance house. Participants learn the appraisal procedures for valuing green residential properties to assist in supporting an opinion of value. The course focuses on the valuation process in different appraisal problems encountered in appraising green properties. The valuation process is examined as it applies in each of the three approaches to value. In-depth case studies help participants develop their problem-solving skills in this new building technology.

- 7 classroom hours + 1-hour exam; residential appraisers and lenders; approved for GBCI CE hours by the USGBC; CE. Valuation of Sustainable Buildings Professional Development Program course—for more information see the FAQs. AI CE credit: Attend only - 75 points; Attend and Pass - 125 points.
Condemnation Appraising: Principles and Applications
Gain an understanding of the eminent domain process, rules and regulations governing condemnation appraisals, and important issues unique to this appraisal specialty. Acquire the tools to address issues such as the valuation rules used by different jurisdictions, identification and valuation of the larger parcel, and the estimation of damages and benefits. Examine advanced applications of appraisal techniques and problem-solving in condemnation cases. Discover how courts view various appraisal methodologies. Case studies are presented to reinforce the application of condemnation appraisal principles. Note. This 3-day course combines the previous basic and advanced condemnation courses: Condemnation Appraising: Basic Principles & Applications and Condemnation Appraising: Advanced Principles & Applications.

- 21 classroom hours + 1-hour exam; general and residential appraisers; CE. Litigation Professional Development Program course—for more information see the FAQs.
  AI CE credit: Attend only - 180 points; Attend and Pass - 200 points.

Fundamentals of Separating Real Property, Personal Property, and Intangible Business Assets
This two-day course provides the theoretical and analytical framework for separating the tangible and intangible assets of operating properties. Through discussion, lecture, readings, and case studies, participants will apply the theory of the firm and the concept of economic profit to the solution of problems and case studies related to ad valorem taxation, eminent domain, loan underwriting, and transaction price allocation. An overview of business valuation procedures and clarification of real estate and business valuation terminology is provided so participants become familiar with the terminology relevant to separating asset values. The class will review the legal foundations for property rights, be introduced to the methodologies, and become aware of the controversial and unresolved issues in this field. Finally, participants will learn about allocating real estate, personal property, and intangible asset values. (Note. This course contains diverse opinions regarding appraisal theory and applications. Neither this course nor the Appraisal Institute advocates a particular theory or method. Rather, each appraiser must come to his or her own conclusion based on the property type, local market customs, and scope of work.)

- 14 classroom hours + 1-hour exam; general appraisers; CE. Valuation of Components of a Business Enterprise Professional Development Program course—for more information see the FAQs.
  AI CE credit: Attend only - 150 points; Attend and Pass - 200 points.

General Appraiser Income Approach/Part 1
After a diagnostic quiz on the six financial functions of one and a brief review, General Appraiser Income Approach/Part 1 opens with a graphic treatment of the time value of money, the six financial functions of a dollar, and important associated concepts. A thorough, detailed analysis of gross income including leases and the various expenses appropriately deducted from gross income follows, with realistic case studies of several income property types. Direct capitalization is then presented using overall capitalization rates, basis, and the concept of economic profit to the solution of problems and case studies related to ad valorem taxation, eminent domain, loan underwriting, and transaction price allocation. An overview of business valuation procedures and clarification of real estate and business valuation terminology is provided so participants become familiar with the terminology relevant to separating asset values. The class will review the legal foundations for property rights, be introduced to the methodologies, and become aware of the controversial and unresolved issues in this field. Finally, participants will learn about allocating real estate, personal property, and intangible asset values. (Note. This course contains diverse opinions regarding appraisal theory and applications. Neither this course nor the Appraisal Institute advocates a particular theory or method. Rather, each appraiser must come to his or her own conclusion based on the property type, local market customs, and scope of work.)

- 27 classroom hours + 3-hour exam; general appraisers; AQB approved, QE, CE. AI CE credit: Attend only - 175 points; Attend and Pass - 225 points; Pass exam only - 200 points.

General Appraiser Income Approach/Part 2
After a diagnostic quiz on the six financial functions of one and a brief review, General Appraiser Income Approach/Part 2 opens with a thorough treatment of discounted cash flow (DCF) analysis. Topics include identifying components of a DCF, projecting cash flows, analyzing leases, solving for value in a variety of common situations, and supporting the discount rate. The effects of debt financing including cash equivalence and equity analysis are covered in detail. Income patterns and property models including residual and other applications are followed by selecting and supporting the discount rate. Also presented are the strengths and weaknesses of direct and yield capitalization. The final section reviews and summarizes the mathematical concepts involved with income capitalization and prepares the participant for not only the course exam but also the certification exam.

- 27 classroom hours + 3-hour exam; general appraisers; AQB approved, QE, CE; online version available. AI CE credit: Attend only - 175 points; Attend and Pass - 225 points; Pass exam only - 200 points.
General Appraiser Market Analysis and Highest & Best Use
The essential relationships between market analysis, highest and best use, the three approaches to value, and the final value opinion are covered in this AQB-approved course. You'll recognize that market analysis is integral to highest and best use, and that highest and best use is integral to market value. You'll also learn how to produce credible results in appraisal to develop opinions of market value.

- 28 classroom hours + 2-hour exam; general appraisers; required MAI designation course; AQB approved, QE, CE; online version available. AI CE credit: Attend only - 175 points; Attend and Pass - 225 points; Pass exam only – 200 points.

General Appraiser Report Writing & Case Studies (New Classroom Version!)
General Appraiser Report Writing & Case Studies provides instruction in effectively communicating a sound analysis of selected parts of a valuation. The course addresses USPAP requirements and the three types of writing most often used in appraisal reports: descriptive, numerical, and analytical. Lectures on writing principles, discussions of various sections of the appraisal report, and in-class writing exercises and presentations provide guidance and practice in effective communication of a valuation analysis. Specific assignments include writing a thesis statement, summarizing data, creating effective tables, writing a conclusion, communicating highest and best use, communicating an analysis, writing a letter of transmittal, and writing a reconciliation and opinion of value. During this four-day course, participants will use data provided in case studies as the basis for writing assignments that will help them recognize and produce effective reports. Multiple-choice examination focuses on components of good writing.

- 28 classroom hours + 2-hour exam; general appraisers; AQB approved, QE, CE; online version available. AI CE credit: Attend only - 175 points; Attend and Pass - 225 points; Pass exam only – 200 points.

General Appraiser Sales Comparison Approach
General Appraiser Sales Comparison Approach is an in-depth look at this valuation analysis method. It begins with detailed discussions of property comparability, techniques used to gather and verify data for a subject property, and use of this data in selecting appropriate comparable properties and neighborhoods for analysis in the approach. The course explores ways to sort and analyze data and effectively apply certain statistical analysis tools. Quantitative and qualitative analysis of comparable sales using units and elements of comparison is approached through extensive practice problems, case studies, and lecture.

- 27 classroom hours + 3-hour exam; general appraisers; AQB approved, QE, CE; online version available. AI CE credit: Attend only - 175 points; Attend and Pass - 225 points; Pass exam only – 200 points.

General Appraiser Site Valuation & Cost Approach
General Appraiser Site Valuation and Cost Approach is a practical, hands-on course that concerns two basic aspects of real estate appraisal: land/site valuation and the development of the cost approach. Extensive use of problems and case studies provide practice in applying site valuation and cost approach methods.

- 28 classroom hours + 2-hour exam; general appraisers; AQB approved, QE, CE; online version available. AI CE credit: Attend only - 175 points; Attend and Pass - 225 points; Pass exam only – 200 points.
International Financial Reporting Standards for the Real Property Appraiser
Throughout the world, accounting standards setters are working more closely than ever on investor transparency and protection projects. Use of fair value in accounting is growing in many parts of the world, including certain segments of the property market in the United States. Use of fair value as a standard is likely to provide many opportunities for commercial real estate appraisers because the opinions of third-party specialists are often obtained to enhance the credibility and auditability of financial statements. This practical course will help valuation professionals understand the relevant parts of the International Financial Reporting Standards that affect the valuation profession, including the use of common standards, terminology, and definitions. By working through international case studies, participants will learn the procedures for conducting fair valuation of fixed assets for financial reporting and how to conduct a test for asset impairment.

- 13 classroom hours + 2-hour exam; CE credit approved in some states; International Valuation of Fixed Assets Professional Development Program course—see the FAQs for more information.
  AI CE credit: Attend only - 150 points; Attend and Pass - 200 points.

International Valuation Standards Overview
This course provides an overview of the standards in the 2017 International Valuation Standards. Specifically written for domestic and international valuation experts with a working knowledge of valuation techniques as well as for those with a financial and real estate background, this course will provide a working knowledge of the current International Valuation Standards. Emphasis on ethical behavior and competent practice will help foster a higher level of public trust benefiting the real estate valuation profession in the USA and overseas.

- 7 classroom hours + 1-hour exam; CE credit PENDING; International Valuation of Fixed Assets Professional Development Program course—see the FAQs for more information.
  AI CE credit: Attend only - 75 points; Attend and Pass - 125 points.

Introduction to Green Buildings: Principles and Concepts
This one-day introduction course focuses on the evolution of green buildings, the concept of sustainability in buildings, and the principles, practices, and components that distinguish sustainable from traditional buildings.

- 7 classroom hours + 1-hour exam; general and residential appraisers; CE. Valuation of Sustainable Buildings Professional Development Program course—for more information see the FAQs.
  AI CE credit: Attend only - 75 points; Attend and Pass - 125 points.

Litigation Appraising: Specialized Topics and Applications
The course was expanded from two to three days and delves more deeply into inverse condemnation, an exciting niche market with increasing demand for appraisers. One of three courses in the Litigation Professional Development Program, this course now offers more hands-on applications giving you the opportunity to solve problems and put theory into practice. Specialized topics covered include environmental contamination, ad valorem tax assessments, construction defects, bankruptcies, fraud and misrepresentation, income and estate tax disputes, inverse condemnation, contract disputes and equitable distribution in divorces cases. Through problem-solving activities, participants will apply new concepts and address how to best handle valuation and reporting issues in a professional legal setting. Participants will gain an understanding of the terminology and concepts involved in litigation valuation services in specialty areas and will learn about the many opportunities available for expanding their practices in litigation valuation.

- 21.5 classroom hours + 1-hour exam; general and residential appraisers; CE. Litigation Professional Development Program course—for more information see the FAQs.
  AI CE credit: Attend only - 180 points; Attend and Pass - 200 points.
National Uniform Standards of Professional Appraisal Practice (USPAP) Update Course, 7-Hour
This one-day update course, copyrighted by The Appraisal Foundation, focuses on recent changes to USPAP requirements for ethical behavior and competent performance by appraisers. The course, which clarifies several commonly misunderstood aspects of USPAP, will aid appraisers in all areas of appraisal practice seeking updated competency in USPAP, including those subject to state licensing or certification and continuing education requirements imposed by professional organizations, client groups, or employers.

- 7 hours; general and residential appraisers; required every two years to meet the USPAP continuing education requirement; AQB approved, CE; online version available. AI CE credit: Attend only - 35 points.

National Uniform Standards of Professional Appraisal Practice (USPAP) Course, 15-Hour
Using the National USPAP Course material copyrighted by The Appraisal Foundation, this course covers basic rules for ethical behavior and competent performance. It is designed to comply with USPAP requirements for state certified appraisers, and it highlights the role of the appraiser and the implied impartiality often associated with this role. Participants learn how requirements of the Uniform Standards of Professional Appraisal Practice affect their appraisal businesses.

- 14 classroom hours + 1-hour exam; general and residential appraisers; AQB approved, CE; does not meet the USPAP continuing education requirement; online version available. AI CE credit: Attend only - 70 points; Attend and Pass - 75 points.

Practical Applications in Appraising Green Commercial Properties
This newly developed two-day course introduces participants to a broad range of valuation problems encountered when appraising green commercial buildings, conventional buildings with green features, and conventional buildings in today’s markets that are increasingly influenced by sustainability and green building. Based on the Appraisal Institute’s new publication, The Valuation of Green Commercial Real Estate, participants will use real-world case study examples from a variety of property types to learn and apply credible valuation techniques for analyzing and reporting the degree to which green building and sustainability affect property value. Structured around the application of the three approaches to value, participants will develop valuable insight and hands-on experience; as well as learn how green building and sustainability affect scope of work development and highest and best use analysis for both green and conventional properties.

- 14 classroom hours + 1-hour exam; general appraisers and lenders; approved for GBCI CE hours by the USGBC CE. Valuation of Sustainable Buildings Professional Development Program course—for more information see the FAQs. AI CE credit: Attend only - 150 points; Attend and Pass - 200 points.

Quantitative Analysis
This course limits its focus to the practical application of quantitative tools for analyzing data, drawing appropriate conclusions from data sets, and presenting both the analysis and conclusions in ways that enhance communication with appraisal clients. It reviews and furthers the application of basic statistical measures (mean, median, mode, standard deviation, etc.) and spends a good deal of time on graphical and regression analysis for use in producing and understanding various types of graphs. Goals include showing participants how to understand the reliability and validity of all data used to draw conclusions and providing the knowledge needed to check the validity of the conclusions others may draw from the same or similar data sets. Presentations and activities use real-world appraisal applications that are aimed at furthering an appraiser’s ability to provide credible analysis of real property related issues.

- 35 hours (2 pre-class online, 30 classroom, 3 exam); general appraisers; required MAI designation course. Approved for CE (most states); AQB approved as a QE Certified General elective. click here to check your state’s QE elective approval status; Analytics for Valuation Professional Development Program course—for more information see the FAQs. AI CE credit: Attend only - 275 points; Attend and Pass - 375 points; Pass Exam Only - 325 points.
Real Estate Finance, Statistics, and Valuation Modeling
This two-day course provides an introduction to statistics, real estate finance, and modeling with applications to residential and commercial real estate appraisal. On the first day, you will develop an understanding of basic statistics and statistical analysis and learn how those skills can be used in valuation and evaluation practice. On day two, you will gain an understanding of real estate finance markets, learn about credit conditions and their impact values on appraisal, and calculate and interpret fundamental numbers on loan payments and balances.

- 14 classroom hours + 1-hour exam; general and residential appraisers; AQB approved, QE, CE; online version available. AI CE credit: Attend only - 175 points; Attend and Pass - 225 points; Pass exam only - 200 points.

Residential and Commercial Valuation of Solar
As the US continues to search for energy alternatives, properties improved with solar PV (photovoltaic) are becoming more common, creating demand for appraisers trained in properly valuing solar PV. Encountering a solar photovoltaic (PV) system could present a valuation problem that you may not be prepared to solve. As an appraiser appraising green properties, it is inevitable that you will encounter solar PV. Even for those who don’t specialize in green properties, the likelihood that you will encounter solar PV in your practice is increasing. This hands-on course introduces you to solar terminology, and through real-life examples and case studies, on both residential and commercial properties, shows you how to solve solar-related valuation problems. This course will focus on solar PV most commonly encountered in commercial and residential appraisal/consulting assignments. It will not focus on utility-scale solar (solar farms), solar thermal, or other forms of on-site renewable energy generation.

- 14 classroom hours + 1-hour exam; residential and commercial appraisers; CE credit; approved for GBCI CE hours by the USGBC; Valuation of Sustainable Buildings Professional Development Program course—for more information see the FAQs. AI CE credit: Attend only - 150 points; Attend and Pass - 200 points.

Residential Market Analysis and Highest & Best Use
This two-day course provides a fresh look at the relationship between market analysis and highest and best use. Discover where to find the information you need to make a highest and best use decision and how to interpret the information you find. Learn how to read and map a market area for a subject property and discover the essential links between market analysis, highest and best use analysis, and the three approaches to value (cost, sales comparison, and income capitalization). Gain practical experience by solving highest and best use problems similar to problems you might encounter in the real world. Theory is translated into practice through extensive and varied classroom activities encouraging you to become actively involved in applying concepts to real-world situations.

- 14 classroom hours + 1-hour exam; residential appraisers; AQB approved, QE, CE; online version available. AI CE credit: Attend only - 70 points; Attend and Pass - 140 points; Pass Exam only - 125 points.

Residential Report Writing and Case Studies
Engages appraisers in practical writing exercises necessary to produce convincing appraisal reports in daily practice. Course objectives are achieved through the discussion and application of residential valuation procedures, grammar rules and writing techniques, and specific writing assignments based on a residential case study. Participants will practice writing effective narrative comments for form appraisal reports and learn how to explain valuation procedures and conclusions to users of reports. The techniques applied in this course are useful in real-life situations that complicate routine assignments.

- 14 classroom hours + 1-hour exam; residential appraisers; AQB approved, QE, CE; online version available. AI CE credit: Attend only - 70 points; Attend and Pass - 140 points; Pass Exam only - 125 points.
Residential Sales Comparison and Income Approach
Through two in-depth case studies, this introductory course provides you with the techniques necessary for completing the sales comparison and income capitalization approaches of the valuation process. You will develop and apply qualitative and quantitative analysis techniques as well as organize and reconcile data.

- 28 classroom hours + 2-hour exam; residential appraisers; AQB approved, QE, CE; online version available. AI CE credit: Attend only - 175 points; Attend and Pass - 225 points; Pass exam only - 200 points.

Residential Site Valuation and Cost Approaches
This course focuses on the valuation of vacant land parcels and the development of the cost approach. Create a current cost estimate using market extraction, discover effective interview techniques, and explore information provided by professional cost data sources. An in-depth case study takes you from the origin of the appraisal assignment to a final value estimate using various cost approach applications.

- 14 classroom hours + 1-hour exam; residential appraisers; QE, AQB approved; online version available. AI CE credit: Attend only - 70 points; Attend and pass - 140 points; Pass exam only - 125 points.

Review Case Studies—General
In this course, you will put into practice the concepts in Review Theory-General. You will enhance your review skills by preparing two required review reports based on two case studies that present some of the issues reviewers face in review assignments. For each case study, you will develop opinions on the completeness, accuracy, adequacy, relevance, reasonableness, appropriateness, and credibility of another appraiser’s work and then communicate your opinions in a review report you design and draft yourself. By preparing written review reports based on the case studies, you will gain confidence in the application of review techniques. This course will be beneficial for appraisers and other real estate professionals who regularly work with appraisals and reviews.

- 30 classroom hours + 2-hour exam; general appraisers; required course for candidates pursuing the AI-RRS Designation. AI CE credit: Attend only - 275 points; Attend and pass - 375 points; Pass exam only - 100 points.

Review Case Studies—Residential
In this two-day course, you will apply the review process that you learned in Review Theory-Residential by walking through a case study that focuses on a two-stage review assignment. Day one begins with a quick refresher of review concepts. From there, you will work on an assignment that gets dropped on your desk much like it does in real life. Working in groups, as well as individually, you’ll identify and analyze the components of the case study review assignment. For many, this will be the first opportunity to work through all seven steps of the review process and apply them within a simulated, very real-to-life assignment. Problem identification and scope of work is where the process begins and that quickly leads to the tougher analytical work where you’ll analyze the subject appraisal report and develop opinions of completeness, accuracy, adequacy, relevance, and reasonableness (including tests of reasonableness). From there, you’ll learn to develop opinions of appropriateness and credibility to both the appraiser’s development work as well as opinions on whether the appraiser’s report is appropriate and not misleading—including the reviewer’s development of reasons for disagreement. Day two begins with the reviewer’s development of his or own opinion of value in this two-stage review assignment. You will analyze additional field data to facilitate review decisions whether the opinion of value in the subject appraisal report is credible. From the start of the case study, you will take notes to prepare an individual review report which is submitted to the instructor (the review supervisor) before the exam.

- 14 classroom hours + 1-hour exam; residential appraisers; CE PENDING; required course for candidates pursuing the AI-RRS Designation. AI CE credit: Attend only - 175 points; Attend and pass - 225 points; Pass exam only - 100 points.
Review Theory—General
This fundamental review course that all reviewers of assignments involving income-producing and other nonresidential properties should have in their educational background. It is a required course for individuals pursuing the Appraisal Institute General Review Designation (AI-GRS, Appraisal Institute General Review Specialist). At the core of this course is the review process. Participants explore the seven steps outlined in this process as they apply to nonresidential properties. To be a reviewer, an appraiser must learn how to develop opinions of completeness, accuracy, adequacy, relevance, and reasonableness relative to the work under review. These opinions must be refined through tests of reasonableness to develop reconciled opinions of appropriateness and credibility.

The material provides a refresher on key valuation skills often required of reviewers, such as measuring financial feasibility in highest and best use analysis and various applications of the income capitalization approach. In addition, the course covers reporting reviews for income-producing property and the use of commercial review report forms, narrative reports, and oral review reports. Participants will gain practice in writing a scope of work statement for three types of assignments. They will also develop a template for a narrative review report on a property type of their choice (office, retail, apartment, etc.). By taking this course, participants will gain invaluable confidence in the fundamentals of review through the review process, which is the core of this course. To be a reviewer, an appraiser must learn how to develop opinions of completeness, accuracy, adequacy, relevance, and reasonableness relative to the work under review. These opinions must be refined through tests of reasonableness in order to develop opinions of appropriateness and credibility. By taking this course, participants may gain invaluable confidence on the fundamentals of review.

- 30 classroom hours + 3-hour exam; general appraisers; CE; required course for designated members and candidates pursuing the AI-GRS Designation. AI CE credit: Attend only - 275 points; Attend and pass - 375 points; Pass exam only - 100.

Review Theory—Residential
This fundamental review course that all reviewers of residential appraisals and reviews should have in their educational background. It is a required course for individuals pursuing the Appraisal Institute Residential Review Designation (AI-RRS, Appraisal Institute Residential Review Specialist). At the core of this course is the review process. Participants explore the seven steps in the process as they apply to reviews of residential work including, but not limited to, those subject to GSE requirements. To be a reviewer, an appraiser must learn how to develop opinions of completeness, accuracy, adequacy, relevance, and reasonableness relative to the work under review. These opinions must be refined through tests of reasonableness to develop reconciled opinions of appropriateness and credibility.

The material addresses how requirements of the review process compare with those of the Fannie Mae Form 2000/Freddie Mac Form 1032, One-Unit Residential Review Form as well as other GSE documents such as the Fannie Mae Selling Guide. Other topics include complex or challenging residential review assignments such as those involving limited data, nonconforming properties, less common ownership types, or unusual properties such as geodesic domes and hobby farms. By taking this course, participants will gain invaluable confidence in the fundamentals of review.

- 15 classroom hours + 2-hour exam; residential appraisers; CE; required course for designated members and pursuing the AI-RRS Designation. AI CE credit: Attend only - 175 points; Attend and pass - 225 points; Pass exam only - 100 points.

Supervisory Appraiser/Trainee Appraiser Course
As of January 1, 2015, all individuals who become Supervisory Appraisers and Trainee Appraisers will be required to take a Supervisory/Trainee Course per the 2015 Real Property Appraiser Qualification Criteria. This four-hour course will address the national minimum requirements, responsibilities, and expectations for Trainee Appraisers and Supervisory Appraisers that are included in the AQB’s required course outline.

- 4 classroom hours + 1-hour optional exam; CE; required course for all individuals becoming Supervisory Appraisers and all individuals becoming Trainee Appraisers after 1/1/2015. AI CE credit: Attend only – 20 points, Attend and pass exam – 25 points.
The Appraiser as an Expert Witness: Preparation and Testimony
This two-day course introduces the basic concepts and strategies needed to engage in litigation valuation. It explores the scope of activities appraisers can expect in a legal action, including assessing the status of a case, developing a USPAP-compliant appraisal without preparing a written report, and understanding legal terminology and jargon. The course addresses how litigation assignments differ from lender assignments and how to market appraisal services to litigation clients. Participants work in small groups to practice effective deposition and direct testimony techniques and a mock trial with a residential case study gives them the opportunity to experience a realistic courtroom environment in which to polish their skills.

- 15 classroom hours + 1-hour exam; general and residential appraisers; CE. Litigation Professional Development Program course—for more information see the FAQs.
  AI CE credit: Attend only – 150 points; Attend and pass - 200 points.

Uniform Appraisal Standards for Federal Land Acquisitions: Practical Applications
The update (the first update to the standards since 2000) to the Uniform Appraisal Standards for Federal Land Acquisitions was released by the Interagency Land Acquisition Conference in Dec. 2016. This two-day course not only provides a comprehensive review of the Uniform Appraisal Standards for Federal Land Acquisitions 6th edition, it includes critical instruction to those involved in federal land acquisition valuation assignments. The course walks you through cases studies which demonstrate practical procedures and solutions. Whether you are an experienced appraiser who writes or reviews federal land acquisition appraisals or you are an appraiser interested in expanding your client base to include federal and state agencies and organizations, this course will show you how to apply the 6th edition Uniform Appraisal Standards for Federal Land Acquisition in practice. An optional one-hour exam is included

- 14 classroom hours + 1-hour exam; CE; general and residential appraisers; CE. Al CE credit: Attend only – 150 points; Attend and pass – 200 points; Pass only – 55 points.

Valuation in Challenging Markets
As the global economy continues to interconnect, it is increasingly important for appraisers and users of appraisal reports to understand how valuations are affected by economic, financial, and legal variables and systems worldwide. Further, it is essential for appraisers to know how property value can be accurately estimated in challenging markets within the framework of International Valuation Standards (IVS). This practical four-day course walks you through case studies that address different types of valuation by purpose and use and that encompass a broad range of property types, business activities, and countries.

- 28 classroom hours + 2-hour exam; CE. International Valuation of Fixed Assets Professional Development Program course—for more information, see the FAQs. Al CE credit: Attend only - 200 points; Attend and pass - 250 points.

Valuation of Conservation Easements
Valuation of Conservation Easements is an advanced course designed for the general certified appraiser who understands the methodology in the approaches to value and is ready to embark on understanding the intricacies involved in one of the most misunderstood and difficult types of appraisals. Over 4 days, this intensive program will familiarize participants with conservation easement valuations in a variety of situations, including conventional appraisals, appraisals that are required to comply with the Yellow Book, and appraisals involving non-cash charitable contributions that are required to comply with IRS standards. Learning objectives will be accomplished through a series of lectures, in-class discussions, problem solving, homework assignments, and case-law analysis.

- 31 classroom hours + 2-hour exam; general appraisers; CE; AQB approved. Valuation of Conservation Easement Professional Development Program course—for more information, see the FAQs.
  AI CE credit: Attend only - 200 points; Attend and Pass - 250 points.
Classroom Education: Professional Development Program Series

**Analytics for Valuation**
Courses: Quantitative Analysis; Advanced Spreadsheet Modeling for Valuation Applications; Application & Interpretation of Simple Linear Regression
For more detailed descriptions of these courses, please visit the above Courses section.

**International Valuation of Fixed Assets**
Courses: Valuation in Challenging Markets; International Financial Reporting Standards for the Real Property Appraiser; and International Valuation Standards Overview
For a more detailed description of these courses, please visit the above Courses section.

**Litigation**
Courses: The Appraiser as an Expert Witness; Litigation Appraising: Specialized Topics and Applications; and Condemnation Appraising: Principles & Applications
For more detailed descriptions of these courses, please visit the above Courses section.

**Valuation of the Components of a Business Enterprise**
Courses: Fundamentals of Separating Real Property, Personal Property, and Intangible Business Assets
For a more detailed description of this course, please visit the above Courses section.

**Valuation of Conservation Easements**
Course: Valuation of Conservation Easements
This program addresses concerns by the federal agencies for more comprehensive education on conservation easement valuation, one of the most controversial and scrutinized topics in valuation. For a more detailed description of this course, please visit the above Courses section.

**Valuation of Sustainable Buildings**
Courses: Introduction to Green Buildings; Case Studies in Appraising Green Residential Buildings; Residential and Commercial Valuation of Solar; and Practical Applications in Appraising Green Commercial Properties
For more detailed descriptions of these courses, please visit the above Courses section.
Classroom Education: **Seminars**

**Advanced Land Valuation: Sound Solutions to Perplexing Problems**
By examining unusual and complex land valuation assignments, this seminar takes concepts covered in the Appraisal Institute curriculum to the next level. Besides lecture, discussion, and Q&A, sample case studies will demonstrate, primarily in Excel, conceptual and practical applications that participants will be able to incorporate into their day-to-day work. Suggested solution strategies for these assignments will be provided.

- 7 classroom hours; general and residential appraisers; CE. AI CE credit: Attend only - 75 points.

**Appraising Condos, Co-ops, and PUDs**
Single-family attached homes like condominiums, cooperatives, and townhouses are the primary housing option in many urban markets. New construction detached houses are typically in subdivisions and master plan communities. Age-restricted communities are popular with retirees. Most of these developments have one thing in common: they all have associations which are governed by condominium declarations, bylaws, and/or covenants, conditions, and restrictions which affect the bundle of rights. The first part of this seminar builds the foundation for the discussion on appraising residential properties in community associations. You'll learn why it is necessary to know how to identify the property type, why it is important to have a full understanding of the governing documents, why you need to understand where it is located, and why it’s critical to analyze the market. From there, you’ll examine the four specific groups of community organizations: condominiums, cooperatives, planned unit developments (PUDs), and condominium hotels.

- 7 classroom hours; residential appraisers; CE. AI CE credit: Attend only - 35 points.

**Artificial Intelligence, AVMs, Blockchain and the Future of Appraisal**
This four-hour seminar will examine the potential, risks, and opportunities that artificial intelligence, machine learning, and blockchain technology offers to society in general, but with a particular focus on its ramifications for valuation professionals. Seminar attendees will gain an understanding of the history of artificial intelligence and machine learning and how these technologies presently manifest themselves in our lives, and finally, how they will be present in all aspects of our society.

- 4 classroom hours; general and residential appraisers; CE. AI CE credit: Attend only - 20 points.

**Complex Litigation Appraisal Case Studies**
Based on the Appraisal Institute’s new textbook *Applications in Litigation Valuation: A Pragmatist’s Guide*, this one-day seminar discusses in detail three of the book’s case studies that provide an overview of litigation strategies to appraisers who are new to litigation work, as well as a reinforcement of litigation skills to more experienced appraisers. Case study topics include title issues, continuing nuisance, and condemnation. If you have not attended the courses in the Litigation Professional Development Program, this seminar is an excellent starting point. If you have attended those courses, this seminar should reinforce many of the concepts you previously have learned.

- 7 classroom hours; general appraisers; CE approved in some states. AI CE credit: Attend only - 75 points.

**Contract or Effective Rent: Finding the Real Rent**
Work through real-world applications of common circumstances involving effective rent. Distinguish between nominal and effective rent and further enhance your analysis by evaluating the way effective rent impacts property value. Recognize how the integration of the effective rent measurement is used by market participants (landlords and tenants) for leases involving landlord concessions and non-market based provisions in all three approaches to value. At the end of the seminar, participants will have a take-away model to use when incorporating effective rent into their valuation or consulting work. Attendees should be expected to have familiarity with discounted cash flow concepts and a working knowledge of Excel prior to attending the seminar.

- 4 classroom hours; general appraisers; CE. AI CE credit: Attend only – 20 points.
Desktop Appraisals (Bifurcated, Hybrid) and Evaluations
As the world changes, so do processes and methods used in many businesses including the appraisal profession. While alternative appraisal services like bifurcated, hybrid, and desktop appraisals and evaluations aren't new, they are becoming more popular. Many appraisers are uncertain about the general requirements of each service, how appraisal standards might apply, and how these services might create liability. This seminar will provide more clarity about the different services being requested and help you to decide if these services are for you. It will review the expectations of alternative appraisal services, potential uses, appraisal standard implications, scope of work, and liability concerns as it applies to residential and commercial assignments. And it will review evaluation formats and the business opportunities for them.

- 7 classroom hours; general and residential appraisers; CE. AI CE credit: Attend only – 35 points.

Evaluating Commercial Leases: The Tenant and the Terms Both Matter
This 7-hour seminar introduces participants to how the terms of a lease and the risk profile of the tenant influence the valuation of commercial real estate. Participants will see how the business features of commercial leases affect the quantity and the duration of the income stream that a property will generate and the development of the property’s income statement. Non-traditional sources of income, the proper period to use in measuring the income, measuring the real vacancy rate, expenses that might not be recoverable by a landlord if a CAM formula is incorrect, and how other special clauses in a lease can all affect the property’s income stream will be examined. The second part of the seminar discusses tenant credit risk issues and explains why understanding a tenant’s financial strength is key to assessing the quality of the income stream.

- 7 classroom hours; residential appraisers; CE. AI CE credit: Attend only - 75 points.

Fair Value, Market Value, Fair Market Value (COMING SOON!)

- 7 classroom hours; general appraisers; CE. AI CE credit: Attend only – points PENDING.

Getting It Right from the Start: A Workout Plan for Your Scope of Work
The scope of work decision is the most critical one you will make in the development of an appraisal. After identifying the key elements of the assignment, you decide what needs to be done to arrive at assignment results that address the needs of the intended users of the appraisal. This seminar will help you become familiar with the broad range of services that you can offer under USPAP and give you practice determining the appropriate scope of work for various types of assignments. Return to your office with greater confidence when making scope of work decisions.

- 7 classroom hours; general and residential appraisers; CE. AI CE credit: Attend only – 35 points.

Historic Preservation (Façade) Easements: Appraisal Techniques and Valuation Issues
The valuation of conservation and historic preservation (façade) easements continues to be extremely controversial aspect of appraisal practice. The Internal Revenue Service currently has more than 1,000 charitable donations of conservation and preservation easements under review. This seminar will address its special appraisal challenges and issues.

- 7 classroom hours; general and residential appraisers; CE. AI CE credit: Attend only – 35 points.

How Tenants Create or Destroy Value: Leasehold Valuation and Its Impact on Value
If you’re involved in the valuation of commercial real estate, it’s crucial to know how the terms of a lease affect value. This seminar goes beyond methodology to explore how to measure a property rights adjustment, the theory underlying the use of a leasehold yield rate (Y_LH) to value the leasehold, as well as the application of a property rights adjustment in all three approaches to value. Topics will include how the terms of a tenant’s lease impact value—either positively or negatively; situations that require a valuation of a leasehold; methodologies in valuing a leasehold, including examples and exercises; the impact of a leasehold in the valuation of property using all applicable approaches; and challenges facing appraisers performing leasehold valuation assignments.

- 7 classroom hours; general appraisers; CE. AI CE credit: Attend only – 35 points.
Ignorance Isn’t Bliss: Understanding an Investigation by a State Appraiser Regulatory Board or Agency
A regulatory complaint has been filed against you. Now what? Discover why state boards and agencies make the decisions they do, what federal oversight requirements guide them, and how a state regulator’s investigation (including disciplinary action) proceeds by peeking behind the regulatory curtain. Developed by Craig Steinley, SRA, AI-RRS, current President of AARO (Association of Appraiser Regulatory Officials), with input from regulators and board members (who are appraisers) and attorneys who defend appraisers, this 4-hour seminar discusses who files complaints, due process for an appraiser, and the steps to take when you are named in a complaint. With this knowledge, you’ll have an advantage in resolving a complaint and better yet, avoiding one in the first place!

- 4 classroom hours; general and residential appraisers; CE. AI CE credit: Attend only - 20 points.

Inconsistency: It’s Hiding in Plain Sight in Your (commercial) Appraisal
This seminar will concentrate on common inconsistencies found in the reports of even the most seasoned appraisers. For example, developing the income approach using contract rent (leased fee value), developing the cost approach but not adjusting for lease fee (fee simple value), or using the sales comparison approach to analyze comps based on contract rent and other analyzed based on market rent (mixed bag). The results of these inconsistencies make it impossible to reconcile to a proper value regardless of whether the assignment calls for leased fee or fee simple value.

- 7 classroom hours; general appraisers; CE. AI CE credit: Attend only – 35 points.

Inconsistency: It’s Hiding in Plain Sight in Your Residential Appraisal
(COMING SOON!)

- 7 classroom hours; residential appraisers; CE. AI CE credit: Attend only – points PENDING.

Litigation Assignments for Residential Appraisers: Doing Expert Work on Atypical Cases
For those familiar with litigation who want to expand into more challenging residential assignments, don’t miss this fast-paced seminar! This new half-day program thoroughly analyzes, for purposes of litigation, two atypical residential properties. In the first case study entitled, “New House on an Old Dump,” participants will initially identify the appraisal problem and the questions to ask for the lawsuit. Discerning the difference between partial and complete remediation and how disclosure defects could affect market value are also covered. Learn what to do when a typical sales comparison approach is not applicable. The second case study called, “Home with a Disappearing Dock,” explores deeded rights to community recreational amenities and due diligence in identifying rights associated with ownership. The basics of title defect actions and how to identify and measure contributory value of a component are covered in depth. Both case studies dig into the nuts and bolts of these issues in a convenient 4-hour class!

- 4 classroom hours; residential appraisers; CE. AI CE credit: Attend only - 20 points.

Marketability Studies: Advanced Considerations and Applications
This seminar will provide practical, hands-on training for experienced appraisers in the development and application of level C market analysis in valuation appraisals. Participants will bring laptops to class to solve specific problems relating to market analysis (i.e. supply/demand) as well as applications of market analysis to highest and best use and valuation. The single most important concept for this seminar is to provide useful tools using advanced market analysis techniques to measure and support valuation analysis applications throughout the appraisal report, as required by USPAP and appraisal methods.

- 7 classroom hours; general and residential appraisers; CE. AI CE credit: Attend only - 75 points.

Marketability Studies: The Six-Step Process and Basic Applications
In this program, you’ll cover structured market analysis while applying the six-step process on two non-complex appraisal assignments. The process is not advanced, but lays the foundation necessary to apply advanced techniques. Most appraisal assignments can be handled using the process and the techniques demonstrated in this seminar! The two examples in this program can be used as a future guide for use in an appraiser’s practice.

- 7 classroom hours; general and residential appraisers; CE. AI CE credit: Attend only - 75 points.
Practical Application of Fundamental Analysis (NEW)
Do you find yourself hesitating before taking on an assignment requiring a Level C marketability analysis? Do you think the process is complex and time consuming? When market conditions are changing, an understanding of fundamental demand concepts and the ability to apply them is necessary to do the valuation competently. This seminar simplifies and demystifies the process of fundamental demand analysis. After reviewing market cycles and the basic economic concepts underlying fundamental analysis, you will learn how to implement the six-step process by applying the concepts to three practical case studies dealing with a general office market, land development (subdivision), and a rental apartment building. You will use basic templates that can be used later in your daily work. By the end of the seminar, you should be better prepared to start including fundamental analysis in your work.

- 7 classroom hours; general appraisers; CE. AI CE credit: Attend only – 35 points.

Rapid Response: Market Analysis in Volatile Markets
This year, COVID-19 has had significant impacts on the economy. Businesses have either cut back or temporarily closed, employees have been laid off, businesses are filing for bankruptcy, employees are working remotely, commercial activities, real estate and other non-residential activities are making plans for a recession. While the housing market is still strong, that could change overnight. The market is too dynamic now to rely on monthly, quarterly, or annual sales reports to support opinions on market health. This seminar will show you how to locate contemporary data for your clients and will show you how to rapidly and accurately read and report on market changes.

- 7 classroom hours; residential appraisers; CE. AI CE credit: Attend only - 35 points.

Real Estate Finance, Value, and Investment Performance
All appraisers should be knowledgeable about financial markets, financial mathematics and how financial markets impact real estate values. In this hands-on seminar, you’ll learn the relationship between debt and investment risk and value. You’ll understand how financial markets impact value and influence buyer behavior and investment decisions. You’ll leave this seminar knowing a new terminology that is important for all real estate appraisers today!

- 7 classroom hours; general appraisers; CE. AI CE credit: Attend only - 75 points.

Rural Area Appraisals: Freddie Mac Guidelines and Property Eligibility Requirements
Appraising rural properties can be challenging. A lack of comparable sales, uniqueness of homes, time between sales, and an expansive geography are factors appraisers must consider. This often means more time, research, and justification to determine an acceptable value for a property. To make this task less daunting, Freddie Mac identified common pain-points for, and misconceptions among, appraisers and lenders regarding collateral guidelines for rural properties, and with the Appraisal Institute, has developed rural appraisal training for practicing residential appraisers. This 7-hour seminar addresses: eligible and ineligible property qualifications; price ceiling limitations in rural markets; how urban development, farm productivity, and conversion to residential uses affect land prices; highest and best use problems in rural residential appraisals; how the Freddie Mac Appraisal Guidelines relate to rural appraisals; how to extract and support adjustments in rural residential appraisals; and how to support deductions for unusual designs or functional problems.

- 7 classroom hours; residential appraisers; CE. AI CE credit: Attend only – 35 points.

Rural Valuation Basics
This 7-hour seminar provides residential and general appraisers with the fundamentals of analyzing comparable data for use in rural appraisal assignments. It will focus on land mix analysis, improvement value extraction and allocation, and how to develop adjustments. While working on a typical rural property case study that both residential and commercial appraisers might be asked to appraise, participants will learn how to properly analyze and use information that is available in rural markets to support a credible opinion of value. Excel spreadsheets will be provided which will assist participants in their analyses.

- 7 classroom hours; residential appraisers; CE. AI CE credit: Attend only – 35 points.
Solving Land Valuation Puzzles
Learn how to solve a variety of land valuation and feasibility problems using less commonly used land valuation techniques in this one-day seminar. Interactive case studies and discussion topics cover highest and best use considerations, land residual analysis, contamination, impacts of tax increment financing on feasibility, condemnation, subdivision analysis, unit of comparison selection, and alternatives when inadequate land sales exist. Problem identification, assignment conditions, scope of work decisions, and standards of practice are reviewed in each problem and solutions are discussed. Lively class discussion and interaction will result as problems are explored.

- 7 classroom hours; general and residential appraisers; CE. AI CE credit: Attend only - 35 points.

The Cost Approach: Unnecessary or Vital to a Healthy Practice?
How often have you have heard that the cost approach is unnecessary to obtain credible assignment results...that it is not relevant to valuing one to four-unit properties? This mindset can leave you ill-prepared for atypical assignments. It also can affect your ability to support adjustments properly in the sales comparison approach, understand trends in market conditions that are driven by building costs, and recognize and quantify the forms of depreciation that can affect residential improvements. Through presentations, case studies, and exercises, this hands-on seminar will help you become reacquainted with the cost approach. You'll realize that you can rely on it when you have plentiful, very little, or confusing market data. And as a result, you'll add value to and strengthen your appraisal practice.

- 7 classroom hours; residential appraisers; CE. AI CE credit: Attend only - 35 points.

Using Spreadsheet Programs in Real Estate Appraisals
The technological advances of the last ten years have caused a significant change in the real estate appraisal profession. For example, today nearly all databases are computerized; it is imperative that appraisers easily retrieve, list, and analyze large quantities of data. During this hands-on seminar, participants will use Microsoft Excel to develop a spreadsheet skill set that includes the use of thousands of the program’s applications. By developing spreadsheet skills that report statistical analysis and provide graphic illustrations, appraisers will have additional professional skills to meet the needs of a more diversified client base.

- 7 hours; general and residential appraisers; CE. AI CE credit: Attend only - 35 points.

Valuation by Comparison: Residential Analysis and Logic
Real estate markets and residential appraisal requirements have changed significantly due to market volatility and increased oversight which has left residential appraisers searching for new strategies to handle their appraisal assignments. This seminar revisits valuation fundamentals and illustrates why you need data collection and analytical skills more than ever. The seminar uses and is based on the 2018 updated 2nd edition of Valuation by Comparison. You'll learn why clients need an appraisal, why you must have appropriate market data, and why it is imperative that you know your market. You’ll discover how to find the information you need in markets where data is scarce, inconsistent, or misleading. And you’ll explore techniques to accurately interpret and then anticipate the actions of buyers and sellers in today's market. Whether you are an experienced appraiser or newer to the profession, you’ll learn about a variety of approaches and resources that are available for gleaning indications of market value, and you’ll better understand which items require adjustment and which items can be ignored.

- 7 classroom hours; residential appraisers; CE. AI CE credit: Attend only - 35 points.
Valuation Overview of Accessory Dwelling Units (NEW)
Accessory Dwelling Units (ADCs) are a growing trend across the U.S. They have been around for years and often not identified as ADUs because they were not part of the zoning. As more families are finding it necessary to accommodate young adults not quite able to afford their own place, they are staying home longer and a somewhat separate space like an ADU is a good solution. Many families are caring for aging family members and find an ADU is the best choice. As many municipalities began to see the growing need to address them in the zoning ordinance, they have now become a valuation challenge for appraisers. In some areas the zoning does not allow them even though homeowners are adding them on without identifying them as ADUs. (Non-conforming status is an appraiser nightmare) Like green homes, the data is not readily available or is limited at best. The secondary mortgage market has very tight guidelines for ADUs and that presents the biggest challenge for appraisers. This seminar will focus on overcoming data challenges and review short dilemmas that illustrate methods to solve the value problem.

- 7 classroom hours; residential appraisers; CE. AI CE credit: Attend only - 35 points.

Valuation Resources for Solar Photovoltaic Systems
Photovoltaic systems, also called PV systems, generate electricity from the sun. When added to a property, PV systems can power home appliances, lights, air conditioning, cell phones, and other electrical devices. There are over one and a half million households, nearly a 2% residential adoption rate, in the United States with solar energy systems, and the number of solar installations is expected to grow exponentially in the coming years. For most appraisers, however, developing the value of solar is a new frontier. But as the demand grows for appraisers who can properly value solar homes, forward-thinking appraisers will have a market edge. They’ll be able to differentiate themselves from their peers by serving as a local source of information on solar.

- 4 hours; residential appraisers; CE. AI CE credit: Attend only – 20 points.
Classroom Education: Chapter Seminar Resources

A Lender's Perspective: The Role of the Appraisal in the Lending Process
This two-hour workshop will provide a great initial overview for many departments of a bank or financial lending institution. It will be especially helpful for audit, credit, compliance, quality control, quality assurance, and underwriting staff. After attending, they will have a familiarity with fundamental Uniform Standards of Professional Appraisal Practice (USPAP) concepts, including scope of work, updates, and appraiser independence.

- 2 classroom hours; general and residential appraisers and lenders; CE. AI CE credit: Attend only - 10 points.

Spotlight on Common Errors and Issues
This seminar is one in the series titled “Spotlight on USPAP,” developed by Stephanie Coleman, SRA, MAI, of the Appraisal Institute’s Professional Practice Department. “Common Errors and Issues” addresses problem areas that often are observed in appraisal reports submitted to the Appraisal Institute for admission and ethics screening. In this seminar, you will review most commonly noted reporting errors, review commonly noted methodology errors, review the characteristics of convincing appraisal reports.

- 2 classroom hours; general and residential appraisers; CE. AI CE credit: Attend only - 10 points.

Spotlight on Confidentiality
This seminar addresses the appraiser’s confidentiality obligations. These obligations are among the most strict ethical requirements an appraiser must follow. They are set forth in USPAP’s Ethics Rule and impact all types of appraisal practice, including appraisal review, consulting, and valuation. Participants will examine the meaning of “confidential” and why appraisers, like other professionals, must give careful attention to matters of confidentiality. The seminar will identify what constitutes “confidential information” vs. information that can be shared with others. Participants will gain confidence in addressing these issues in their day-to-day practice.

- 2 classroom hours; general and residential appraisers; CE. AI CE credit: Attend only - 10 points.

Spotlight on Reappraising, Readdressing, Reassigning: What to Do and Why
This seminar addresses practical ways to respond to requests for another appraisal, or for additional work, involving a property that was previously appraised. How should an appraiser respond to requests to "readdress" or "reassign" a report? When is it acceptable to reappraise the same property for a new client? How should "updates" be handled? Best practices regarding the handling of such requests and the rationale behind them are discussed in depth. Participants will leave the seminar with practical suggestions on how to deal with these common scenarios.

- 2 classroom hours; general and residential appraisers; CE. AI CE credit: Attend only - 10 points.

Spotlight on Record Keeping—Who, What, Where, When, How, and Why
This seminar discusses workfiles. A workfile is required by USPAP for all appraisals, appraisal consulting, and appraisal review assignments. In this program you will learn why USPAP requires a workfile for all appraisals and what it must contain. You will also learn when a workfile needs to be created, where it should be kept, and for how long.

- 1 classroom hour; general and residential appraisers; CE. AI CE credit: Attend only - 10 points.
Spotlight on Review
This seminar focuses on USPAP requirements relating to review. It also provides practical guidance on the challenges reviewers face in providing review services. The seminar addresses the numerous misconceptions about review and how USPAP's scope of work concept applies. You will discuss practices that improve efficiency and make sense in the real world, including identifying the subject of review. Participants will also discuss a handy checklist of 13 items that will be important to any reviewer completing an appraisal report; you will also learn the correct terminology to use in a review report.

- 2 classroom hours; general and residential appraisers; CE. AI CE credit: Attend only - 10 points.

Spotlight on USPAP: Agreement for Services—Instructions for Use
This seminar is one in the series titled "Spotlight on USPAP," developed by Stephanie Coleman, MAI, SRA, and Jan Young, MAI, of the Appraisal Institute's Professional Practice Department. "Agreement for Services—Instructions for Use" addresses the Appraisal Institute's sample Agreement Services package so that appraisers and their clients can use it to create their own agreements (engagement letters).

- 2 classroom hours; general and residential appraisers; CE. AI CE credit: Attend only - 10 points.
Online Education: On Demand Online Courses

Appraisal of Manufactured Homes Featuring Next-Generation Manufactured Homes
This course, developed in collaboration with Freddie Mac, provides an in-depth look into preparing appraisals for traditional manufactured homes plus insight into CHOICEHomeSM—the new type of high-quality manufactured homes that are built to HUD code but developed with site-built features. You'll learn how to meet the specific requirements of Freddie Mac, the Federal Housing Authority (FHA), Veteran’s Administration (VA), United States Department of Agriculture (USDA) and Fannie Mae using a new, ground-breaking tool—the Manufactured Home Quality Rating Worksheet—which is consistent with the Marshall & Swift®—CoreLogic Residential Cost Handbook and the Uniform Appraisal Dataset (UAD).

- 7.5 classroom hours + 1-hour exam; residential appraisers; AQB approved, CE. AI CE credit: Attend only - 35 points.

Basic Appraisal Principles
If you are considering a career in professional valuation services, your journey should begin with Basic Appraisal Principles. This four-day course will introduce you to real property concepts and characteristics, legal considerations, influences on real estate values, types of value, economic principles, real estate markets and analysis, highest and best use, and ethical considerations. The course will provide a solid foundation in basic appraisal principles no matter what appraisal specialty you pursue. By successfully completing the course and exam, you will have met most states' education requirements in the content area identified as basic appraisal principles.

28 classroom hours + 2-hour exam; general and residential appraisers; QE; classroom version available. AI CE credit: Attend only - 150 points; Attend and Pass - 200 points; Pass Exam only - 150 points.

Basic Appraisal Procedures
In this thirty-hour course, you will apply the principles and concepts you learned in Basic Appraisal Principles. The course will take you step-by-step through the valuation process including defining the problem, collecting and analyzing data, reaching a final opinion of value and communicating the appraisal. You will learn about the three approaches to reaching an opinion of value-income capitalization, cost, and sales comparison—and apply them in true-to-life case studies and problems. After examining income capitalization methods and formulas, you will learn how rates and multipliers are derived. Through case studies you will discover the steps and concepts involved in the cost approach—how appraisers estimate the cost of constructing a reproduction of or replacement for an existing structure; the three major components of depreciation and methods for estimating and allocating depreciation; and land and site valuation. The course will guide you through the sales comparison approach including researching the market, verifying information, selecting units of comparison, conducting a comparative analysis, making adjustments, and reconciliation. You will also complete key sections of an appraisal report. In addition, the course provides an introduction to property description and construction and design basics. By successfully completing the course and exam you will have met most states’ education requirements for content identified as basic appraisal procedures.

- 28 classroom hours + 2-hour exam; general and residential appraisers; QE; classroom version available. AI CE credit: Attend only - 150 points; Attend and Pass - 200 points; Pass Exam only - 150 points.

Business Practices and Ethics
Business Practices and Ethics is a significant course in the Appraisal Institute’s curriculum. Appraisers who belong to the Appraisal Institute must adhere to the Code of Professional Ethics and Standards of Professional Appraisal Practice of the Appraisal Institute, including various regulations, in an increasingly complex business environment. This course is designed to familiarize participants with the obligations of a professional appraiser and the obligations and benefits of belonging to the Appraisal Institute. Interactive assignments and examples give participants the opportunity to review ethical rules and professional standards. The course also provides a venue for participants to share ideas about best business practices in light of the ethical requirements placed upon them as professionals and the ever-changing nature of the real property valuation business.

- 6 classroom hours; general and residential appraisers; CE; classroom version available. AI CE credit: Attend only - 30 points; Attend and Pass – 30 points.
Case Studies in Appraising Green Commercial Buildings
As governmental mandates continue to filter down to all local communities, and buyers, sellers, developers and financiers of real estate market assess the importance of energy efficiency and sustainability, it is imperative that appraisers become familiar with the concepts of green building. This course provides practical application of techniques available to commercial appraisers. After a brief review of green principles and concepts, in-depth commercial case studies explore techniques for valuation. Participants should increase their knowledge of commercial green projects and become familiar with numerous resources to help them document the appraisal process.

- 14 classroom hours + 1-hour exam; general appraisers and lenders; Valuation of Sustainable Buildings Professional Development Program course—for more information see the FAQs.
- AI CE credit: Attend only - 150 points; Attend and Pass - 200 points.

Case Studies in Appraising Green Residential Buildings
This course introduces participants to valuation methods for appraising the high performance house. Participants learn the appraisal procedures for valuing green residential properties to assist in supporting an opinion of value. The course focuses on the valuation process in different appraisal problems encountered in appraising green properties. The valuation process is examined as it applies in each of the three approaches to value. In-depth case studies will help participants develop their problem-solving skills in this new building technology. The case studies represent the real estate market in 2009-2010, and the problems and discussion questions are based on real-life examples provided by builders, real estate agents and appraisers.

- 7 classroom hours + 1-hour exam; residential appraisers and lenders; approved for GBCI CE hours by the USGBC; CE. Valuation of Sustainable Buildings Professional Development Program course—for more information see the FAQs. AI CE credit: Attend only - 75 points; Attend and Pass - 125 points.

General Appraiser Income Approach/Part 1
After a brief review and introduction, General Appraiser Income Approach/Part 1 opens with a graphic treatment of the time value of money, the six financial functions of a dollar, and important associated concepts. A thorough, detailed analysis of gross income including leases and the various expenses appropriately deducted from gross income follows, with realistic case studies of several income property types. Direct capitalization is then presented using overall capitalization rates, band of investment, and residual techniques. Substantial class time is devoted to practicing the taught concepts to prepare participant for the exam.

- 27 classroom hours + 3-hour exam; general appraisers; AQB approved, QE, CE; classroom version available. AI CE credit: Attend only - 175 points (residential) or 150 points (general); Attend and Pass - 225 points (residential) or 200 points (general); Pass Exam Only – 200 points (residential) or 150 points (general).

Excel Applications for Valuation
More and more, appraisers are using spreadsheets rather than financial calculators in their day-to-day work to solve complex appraisal problems. The use of Microsoft Excel and Excel templates provide efficiencies that assist appraisers in meeting modern appraisal market demands. Featuring several hours of video instruction, the focus of Excel Applications for Valuation is to increase the participant’s level of ability in using Microsoft Excel. The program also provides the opportunity to sharpen the Excel skills needed for the Appraisal Institute’s advanced coursework. A wide range of material is covered in this course, starting with the very basics, then progressing to more advanced Excel functionality and the templates that can be used in valuation.

- 8 classroom hours; general and residential appraisers; AQB approved, AI CE credit: Attend only - 40 points
General Appraiser Income Approach/Part 2
After a diagnostic quiz on the six financial functions of one and a brief review, General Appraiser Income Approach/Part 2 opens with a thorough treatment of discounted cash flow (DCF) analysis. Topics include identifying components of a DCF, projecting cash flows, analyzing leases, solving for value in a variety of common situations, and supporting the discount rate. The effects of debt financing including cash equivalence, leverage, and equity analysis are covered in detail. Income patterns and property models including applications are followed by investment analysis topics and risk analysis. Specialized applications include subdivision analysis and prospective project analysis. The course concludes with a discussion of the strengths and weaknesses of direct and yield capitalization.

- 27 classroom hours + 3-hour exam; general appraisers; QE, AQB approved; classroom version available. AI CE credit: Attend only - 175 points (residential) or 150 points (general); Attend and Pass - 225 points (residential) or 200 points (general); Pass Exam Only – 200 points (residential) or 150 points (general).

General Appraiser Market Analysis and Highest & Best Use
This AQB-approved course will help you apply meaningful market analysis in valuation assignments. It presents the basic concepts and terminology of market analysis and marketability studies, then shows how marketability studies provide vital information for the highest and best use decision. Throughout the course, the emphasis is on conducting a reliable analysis of demand. You’ll gain practice in applying methods for inferred, or trend, analysis to three property types—a suburban residential subdivision, an existing multifamily property, and an office building. Using the tools introduced in the course will help you increase the reliability of your highest and best use analyses and support the conclusions you reach in the three approaches to value. The course also provides a transitional discussion to prepare you for marketability studies using fundamental demand analysis, which is covered in the Appraisal Institute’s Advanced Market Analysis and Highest & Best Use course.

- 28 classroom hours + 2-hour exam; general appraisers; QE, AQB approved; classroom version available. AI CE credit: Attend only - 150 points (general) or 175 points (residential); Attend and Pass - 200 points (general) or 225 points (residential); Pass Exam Only – 150 points (general) or 200 points (residential).

General Appraiser Report Writing & Case Studies
General Appraiser Report Writing & Case Studies provides instruction in effectively communicating a sound analysis of selected parts of a valuation. The course addresses USPAP requirements and the three types of writing most often used in appraisal reports: descriptive, numerical, and analytical. Lectures on writing principles, discussions of various sections of the appraisal report, and writing exercises provide guidance and practice in effective communication of a valuation analysis. Specific assignments include writing a thesis statement, summarizing data, creating effective tables, writing a conclusion, communicating highest and best use, communicating an analysis, writing a letter of transmittal, and writing a reconciliation and opinion of value. This course has a two-hour multiple-choice examination that focuses on components of good writing.

- 28 classroom hours + 2-hour exam; general appraisers; QE, AQB approved; classroom version available. AI CE credit: Attend only - 150 points (general) or 175 points (residential); Attend and Pass - 200 points (general) or 225 points (residential); Pass Exam Only – 150 points (general) or 200 points (residential).

General Appraiser Sales Comparison Approach
General Appraiser Sales Comparison Approach is an in-depth look at this valuation analysis method. It begins with detailed discussions of property comparability, techniques used to gather and verify data for a subject property, and use of this data in selecting appropriate comparable properties and neighborhoods for analysis in the approach. The course explores ways to sort and analyze data and effectively apply certain statistical analysis tools. Quantitative and qualitative analysis of comparable sales using units and elements of comparison is approached through extensive practice problems, case studies, and lecture.

- 27 classroom hours + 3-hour exam; general appraisers; QE; classroom version available. AI CE credit: Attend only - 150 points (general) or 175 points (residential); Attend and Pass - 200 points (general) or 225 points (residential); Pass Exam Only – 150 points (general) or 200 points (residential).
General Appraiser Site Valuation and Cost Approach

General Appraiser Site Valuation and Cost Approach is a practical, online course designed and presented in a manner that addresses the actual employment and application of appraisal techniques learned in previous courses. It concerns two basic aspects of real estate appraisal: land/site valuation and the development of the cost approach. Special attention is given to the appraisal of various types of sites and the various means of measuring accrued depreciation. Another major course component is analysis that develops skills in developing a current cost estimate using market extraction, interview techniques, and information provided by professional cost data sources.

- 28 classroom hours + 2-hour exam; general appraisers; QE; classroom version available. AI CE credit: Attend Only – 150 points (general) or 175 points (residential); Attend and Pass - 200 points (general) or 225 points (residential); Pass Exam Only – 150 points (general) or 200 points (residential).

International Equivalency Course: General

This course has been designed to aid professional real property valuers located throughout the world in establishing a standardized measurement of their individual valuation knowledge, expertise, and experience. This theory-based curriculum includes descriptions, examples, and discussions that will stimulate real property valuation professionals from any region.

- 37 classroom hours + 3-hour exam; AI CE credit: Attend only - 180 points; Attend and Pass - 195 points.

International Valuation Standards Overview

This course provides a general survey of the standards within the International Valuation Standards 2017 (IVS 2017). A working knowledge of this document will foster both ethical behavior and competent practice. By becoming familiar with these standards, valuation professionals who perform international assignments will gain a high level of public trust and confidence, which benefits the real estate valuation profession in the US and overseas.

- 7 classroom hours + 1-hour exam; CE credit; International Valuation of Fixed Assets Professional Development Program course—see the FAQs for more information; classroom version available. AI CE credit: Attend only - 75 points; Attend and Pass - 125 points.

Introduction to Green Buildings: Principles and Concepts

This introduction course focuses on the evolution of green buildings, the concept of sustainability in buildings, and the principles, practices, and components that distinguish sustainable from traditional buildings.

- 7 classroom hours + 1-hour exam; general and residential appraisers; CE. Valuation of Sustainable Buildings Professional Development Program course—for more information see the FAQs. AI CE credit: Attend only - 75 points; Attend and Pass - 125 points.

National Uniform Standards of Professional Appraisal Practice (USPAP) Update Equivalent Course, 7-Hour

This seven-hour update course focuses on recent changes to USPAP requirements for ethical behavior and competent performance by appraisers. The course, which clarifies several commonly misunderstood aspects of USPAP, will aid appraisers in all areas of appraisal practice seeking updated competency in USPAP, including those subject to state licensing or certification and continuing education requirements imposed by professional organizations, client groups, or employers.

- 7 classroom hours; general and residential appraisers; required every two years to meet the USPAP continuing education requirement; CE, AQB approved; classroom version available. AI CE credit: Attend only - 35 points.
National Uniform Standards of Professional Appraisal Practice (USPAP) Equivalent Course, 15-Hour
This fifteen-hour course covers basic rules for ethical behavior and competent performance. The course is designed to comply with USPAP requirements for state certified appraisers and it highlights the role of the appraiser and the implied impartiality often associated with this role. Participants will learn how requirements of the Uniform Standards of Professional Appraisal Practice affect their appraisal businesses.

- 14 classroom hours + 1-hour exam; general and residential appraisers; QE, AQB approved; this will not meet the USPAP continuing education requirement; classroom version available. AI CE credit: Attend only - 70 points; Attend and Pass - 75 points.

Practical Applications of the Residential Sales Comparison Approach
This program was designed for appraisers with some knowledge of the process who wish to advance their skill set and review the basic procedures of sales comparison analysis. For some appraisers, this will be a new way to think about the sales comparison approach, but for more experienced appraisers this may be somewhat like an airline pilot going back to ground school to re-familiarize themselves with basic procedures that are not used often but still are important to the job. In this program, you will study the underlying logic of the sales comparison approach, ways to support adjustments, how to reconcile the evidence of value and why some of the data may be inconsistent.

- 4 hours; residential appraisers; CE; AI CE credit: Attend only - 20 points.

Real Estate Finance, Statistics, and Valuation Modeling
This 15-hour course provides an introduction to statistics, real estate finance, and modeling with applications to residential and commercial real estate appraisal. During the first half of the course, you will develop an understanding of basic statistics and statistical analysis and learn how those skills can be used in valuation and evaluation practice. In the second part, you will gain an understanding of real estate finance markets, learn about credit conditions and their impact values on appraisal, and calculate and interpret fundamental numbers on loan payments and balances. Successful completion of the course and exam should satisfy most states' education requirements in the content area identified as real estate finance, statistics, and valuation modeling.

- 14 classroom hours + 1-hour exam; general and residential appraisers; QE; classroom version available. AI CE credit: Attend Only - 70 points (general) or 175 points (residential); Attend and Pass - 140 points (general) or 225 points (residential); Pass Exam Only – 125 points (general) or 200 points (residential).

Residential & Commercial Valuation of Solar
Solar photovoltaic system installations are continuing to increase as the price becomes more feasible in the many markets. Appraisers will find the valuation a challenge without knowledge of the technology and data available to use the methodology most appropriate. Appraisers must expand their knowledge base to understand how electricity is priced, how solar PV is priced, and how solar PV functions to develop a credible value. If you are seeking education that will hone your skills or teach you new ones, this is the course for you.

- 14 classroom hours + 1-hour exam; residential and commercial appraisers; CE credit; Valuation of Sustainable Buildings Professional Development Program course—for more information see the FAQs. AI CE credit: Attend only - 150 points; Attend and Pass - 200 points.
Residential Market Analysis and Highest & Best Use
This 15-hour course provides a fresh look at the relationship between market analysis and highest and best use. Discover where to find the information you need to make a highest and best use decision and how to interpret the information you find. Learn how to read and map a market area for a subject property and discover the essential links between market analysis, highest and best use analysis, and the three approaches to value (cost, sales comparison, and income capitalization). Gain practical experience by solving highest and best use problems similar to problems you might encounter in the real world. Theory is translated into practice through extensive and varied activities encouraging you to become actively involved in applying concepts to real-world situations. Successful completion of the course and exam should satisfy most states’ education requirements in the content area identified as residential market analysis and highest and best use.

- 14 classroom hours + 1-hour exam; residential appraisers; QE; classroom version available. AI CE credit: Attend only - 70 points; Attend and Pass - 140 points; Pass Exam Only - 125 points.

Residential Report Writing and Case Studies
This course meets current and future AQB criteria by engaging appraisers in practical writing exercises necessary to produce convincing appraisal reports in daily practice. Course objectives are achieved through the discussion and application of residential valuation procedures, grammar rules and writing techniques, and specific writing assignments based on a residential case study. Participants will practice writing effective narrative comments for form appraisal reports and learn how to explain valuation procedures and conclusions to users of reports. The techniques applied in this course are useful in real-life situations that complicate routine assignments.

- 14 classroom hours + 1-hour exam; residential appraisers; QE; classroom version available. AI CE credit: Attend only - 70 points; Attend and Pass - 140 points; Pass Exam Only - 125 points.

Residential Sales Comparison and Income Approach
This course meets current and future AQB criteria for the Licensed Residential Appraiser and Certified Residential Appraiser levels. Through two in-depth case studies, this introductory course provides you with the techniques necessary for completing the sales comparison and income capitalization approaches of the valuation process. You will develop and apply qualitative and quantitative analysis techniques as well as organize and reconcile data.

- 28 classroom hours + 2-hour exam; residential appraisers; QE; classroom version available. AI CE credit: Attend only - 150 points (general) or 175 points (residential); Attend and Pass - 200 points (general) or 225 points (residential); Pass Exam Only - 150 points (general) or 200 points (residential).

Residential Site Valuation and Cost Approach
Designed for participants with introductory experience and understanding of fundamental concepts of appraising, it focuses on the valuation of vacant land parcels and the development of the cost approach. Develop your skills by creating a current cost estimate using market extraction, interview techniques, and information provided by professional cost data sources.

- 14 classroom hours + 1-hour exam; residential appraisers; QE; classroom version available. AI CE credit: Attend only - 70 points; Attend and Pass - 140 points; Pass Exam Only - 125 points

Supervisory Appraiser/Trainee Appraiser Course
As of January 1, 2015, all individuals who become Supervisory Appraisers and Trainee Appraisers will be required to take a Supervisory/Trainee Course per the 2015 Real Property Appraiser Qualification Criteria. This four-hour course will address the national minimum requirements, responsibilities, and expectations for Trainee Appraisers and Supervisory Appraisers that are included in the AQB’s required course outline.

- 4 classroom hours + 1-hour optional exam; CE; required course for all individuals becoming Supervisory Appraisers and all individuals becoming Trainee Appraisers after 1/1/2015. AI CE credit: Attend only - 20 points, Attend and pass exam - 25 points.
Online Education: On Demand Online Seminars

Analyzing Operating Expenses
Analyzing Operating Expenses is designed to help you better estimate operating expenses on commercial real estate. Suggested methods for improving analysis of operating expenses will be reviewed, and information sources available for you to forecast expenses will be explored. Expense categories will be presented with in-depth analysis, as well as a review of characteristics of operating expenses. In this online seminar, you will be exposed to three case studies to provide practical insight into the expense analysis process. This seminar is designed to benefit commercial appraisers and property analysts of various skill and experience levels. All appraisers and analysts, experienced or otherwise, can profit from the enhanced awareness that appropriately forecasting operating expenses can have on preparing supportable estimates of value.

- 7 hours; general appraisers; CE. AI CE credit: Attend only - 35 points.

Appraisal of Medical Office Buildings
Changing trends in medical practice, health insurance, and demographics are fostering changes in the design of and demand for medical office buildings. This program is designed specifically for commercial appraisers who want to branch out into the specialty of medical office building appraisals.

- 7 hours; general appraisers; CE. AI CE credit: Attend only - 75 points.

Appraiser's Guide to Expert Witnessing
Learn vital information to help expand your appraisal practice into the area of litigation support. Uncover valuable information on the differences between litigation support and other intended uses in written reports, the presentation of oral testimony specific to litigation assignments, and how opinions can be better developed for use in litigation. Study crucial material applicable to valuers serving as expert witnesses in arbitration matters, as well as those in litigation matters and other administrative hearings such as tax appeals and zoning.

- 7 hours; general and residential appraisers; CE. AI CE credit: Attend only - 35 points.

Appraising Automobile Dealerships
An automobile dealership is a special-use property that presents unique challenges to its valuation. To develop a credible valuation, the appraiser must not only understand the intricacies of this specialized property type, but also have some familiarity with the automotive industry and trends that affect the properties at which vehicles are sold. This 7-hour online program is intended for appraisers who are experienced in general commercial real estate valuation, and who wish to explore issues unique to automobile dealerships. It explores the relationship between the auto industry, auto dealership enterprises and real property. It is also intended to be helpful to those involved in financing, developing, designing and investing in auto dealership properties.

- 7 hours; general appraisers; CE. AI CE credit: Attend only - 75 points.

Appraising Convenience Stores
Learn to appraise convenience stores and gas stations. Updated and expanded, this is the only nationally-accredited instruction on the valuation of these special-purpose properties. Important convenience industry trends are identified, such as hypermarket competition and today’s reliance on food service profitability. You will receive instruction in measuring trade area supply and demand, and applying the three approaches to value. Learn how to confidently forecast store revenue, deduct operating expenses, and separate earnings to real estate, FF&E and intangibles.

- 7 hours; general appraisers; CE. AI CE credit: Attend only - 75 points.
Appraising Condos, Co-ops, and PUDs
Single-family attached homes like condominiums, cooperatives, and townhouses are the primary housing option in many urban markets. New construction detached houses are typically in subdivisions and master plan communities. Age-restricted communities are popular with retirees. Most of these developments have one thing in common: they all have associations which are governed by condominium declarations, bylaws, and/or covenants, conditions, and restrictions which affect the bundle of rights. The first part of this seminar builds the foundation for the discussion on appraising residential properties in community associations. You’ll learn why it is necessary to know how to identify the property type, why it is important to have a full understanding of the governing documents, why you need to understand where it is located, and why it’s critical to analyze the market. From there, you’ll examine the four specific groups of community organizations: condominiums, cooperatives, planned unit developments (PUDs), and condominium hotels.

- 7 classroom hours; residential appraisers; CE. AI CE credit: Attend only - 35 points.

Comparative Analysis
The objective of this seminar is to explore how comparative (or transactional) analysis can be used to appraise the market value of various types of real properties. This practical, hands-on seminar will address the actual employment and application of appraisal methods and techniques. You will translate theory into practice through extensive and varied online activities. By applying concepts to real-world situations, you can discover new ways to use your knowledge and analytical skills.

- 7 hours; general appraisers; CE. AI CE credit: Attend only - 35 points.

Cool Tools: New Technology for Real Estate
This seminar will provide an overview of techniques and tools used today to solve the appraisal problem and prepare and deliver the appraisal report. It will also offer a presentation of the techniques and tools that are beginning to gain acceptance in the development and preparation of an appraisal and delivery to the client. Technology as it affects appraisal production and problem-solving will be showcased with illustrations to provide firsthand knowledge of what appraisers can do to improve the quality of their appraisals. Several tools available on the internet will also be presented to help appraisers improve their use of modern, up-to-date information resources. Appraisal technology is changing fast. You will learn new technologies you can use today and what's coming in the future. Some tools are only available for the PC.

- 7 hours; general and residential appraisers; CE. AI CE credit: Attend only - 35 points.

Data Verification Methods
There are many ways to verify a sale or lease transaction. Even after accounting for differences in personalities, information sought, and property types, no one best way emerges. This seminar offers you a number of proven alternatives to an activity that is an essential part of the appraisal process. Accordingly, the goal of this seminar is to provide a variety of professional techniques that should increase your success in verifying, or confirming, market data. The seminar has been written to appeal to both residential and general appraisers, with exercises for each.

- 5 hours; general and residential appraisers; CE. AI CE credit: Attend only - 25 points.

Eminent Domain and Condemnation
Discover the unique valuation and reporting issues confronting appraisers functioning in the eminent domain and condemnation arena in this more advanced online seminar for general and residential appraisers.

- 7 hours; general and residential appraisers; CE. AI CE credit: Attend only - 35 points.

Expand Your Practice: Arbitration Do's and Don'ts (NEW)
Arbitration presents a growing area of opportunity for valuation professionals who can serve as arbitrators, testifying expert witnesses, or consultants. Each of these three roles, and their associated responsibilities, is discussed with a focus on the function of the arbitrator. This seminar provides a thorough introduction to arbitration and explores the various ways valuation professionals can provide services competently and ethically in this growing area of practice.

- 7 hours; general and residential appraisers; CE. AI CE credit: Attend only - 35 points.
FHA Appraising—Principles and Procedures
Guide to the Complete FHA Appraiser, this seminar addresses the tough questions that others often sidestep. We explain what Handbook 4000.1 is really saying when FHA requires you to do certain things. We’ve had extended discussions with HUD staff in Washington DC to ensure that we understand the guidance provided to appraisers. We also provide additional insight and practical advice on how to apply FHA’s protocols in real-world appraising. That’s the reason this is the first of two online seminars on the subject of FHA appraising. We could not cover everything you need to advance your FHA competency in just one seminar. Even so, this online seminar provides coverage of FHA issues in a manner that would be difficult to replicate in a typical classroom presentation. FHA Appraising—Principles and Procedures is designed for appraisers that are new to FHA as well as seasoned FHA Roster appraisers. This is also the seminar to take if you are under sanctions from HUD for remedial education specific to FHA appraising. To appraise for FHA, you need to know and understand FHA principles and procedures. That’s the focus and purpose of this online seminar. It is the guide to becoming the complete FHA appraiser.

- 7 hours; residential appraisers; CE. AI CE credit: Attend only - 35 points.

Forecasting Revenue
This 7-hour seminar is a must if you own, broker, or appraise income-producing real estate. This seminar provides critical insights on how to forecast rent levels, vacancy, and additional sources of revenue on all income-producing types (commercial and residential). Key issues with analyzing rent rolls and forecasting rent on vacant space is the foundation of the program. Detailed considerations on how to forecast rent growth will provide excellent insight to real estate owners, analysts and appraisers. Discussions on how to quantify and consider vacancy and concessions as well as other forms of revenue “other income” are presented. The seminar includes two case studies (one residential and one commercial) that exemplify the value of forecasting revenue. Familiarity with the income approach is recommended.

- 7 hours; general appraisers; CE. AI CE credit: Attend only - 75 points.

Fundamentals of Apartment Appraising
This program is built around examples of small- to mid-range apartment buildings of between 12 and 50 units. Although the focus is on non-institutional-grade apartment projects, the issues and principles also apply to institutional-grade or investment-grade properties. A few examples of such issues are the quantity and quality of sale data available, the availability of standardized income and expense data, identification of the type of typical buyer, and associated purchase motivations. Numerous examples of basic techniques, and a comprehensive case study are used as learning tools. The case study allows you to measure the adequacy of the valuation of a relatively simple property based on formats and techniques reviewed in the course. Your discussion posts and those of your peers in the program will provide various perspectives.

- 7 hours; general and residential appraisers; CE. AI CE credit: Attend only - 35 points.

Fundamentals of the Uniform Appraisal Standards for Federal Land Acquisitions
The purpose of the seminar is to provide information to independent fee appraisers and agency personnel about rules for appraising federal land acquisitions, as outlined in the federal guidelines known as the Uniform Appraisal Standards for Federal Land Acquisition (UASFLA). The seminar is designed to acquaint participants with the large market for these appraisal services created by the federal government, and to illustrate the special needs and requirements of that market segment. Please note that the seminar is not a “law” seminar. When court cases and decisions are discussed in the content, or indicated in the UASFLA, it is done in the context of their significance in the appraisal process; it is not to be construed as conveying legal advice or expressing legal opinions.

- 4 hours; general and residential appraisers; CE. AI CE credit: Attend only - 20 points.
General Demonstration Report Writing
This 7-hour online program will focus on the mechanics of demonstration appraisal report writing and will help ensure that the appraiser’s presentation is logical and understandable. The program will also provide an extensive examination of the cost, sales comparison and income capitalization approaches; highest and best use; reconciliation and the final value opinion. This program is a prerequisite for the MAI General Demonstration Report Capstone program.

- 7 hours; general appraisers; CE; Appraisal Institute Candidates for Designation are encouraged to attend this seminar before beginning their demonstration report; classroom version available. AI CE credit: Attend only - 35 points.

Measure it Right! - Using the ANSI-Z765-2021 Standard for Residential Properties
This 4-hour online program is an in-depth study of the American National Standards Institute (ANSI) protocol for single-family residential buildings, ANSI Z765-2021. Designed to walk you through the measurement steps used in measuring, calculating, and reporting improved and unimproved residential areas, this program presents many more examples of measurement problems than presented in the standard and shows you how to resolve them in a step-by-step approach.

- 4 hours; residential appraisers; CE; AI CE credit: Attend only - 20 points.

Overview of Real Estate Appraisal Principles
This seminar is aimed at the non-appraiser; people who have an interest in appraising but are not technically qualified or licensed to act as appraisers. Examples are students, career changers, para-appraisers, researchers, appraisal assistants, introductory level field appraisers, users of appraisals, underwriters, lenders, relocation specialists and real estate brokers and salespersons. This seminar introduces the basic economic concepts that form the building blocks of current valuation theory. These principles will be related to the actual process of appraising residential and commercial properties. Note that this seminar is not intended to be a course to become a qualified appraiser. That process begins in the two Appraisal Institute courses Basic Appraisal Principles and Basic Appraisal Procedures. This seminar is an excellent introduction to those courses; the focus, however, is on an understanding of what an appraisal is and how it works, not how to do one.

- 7 hours; general and residential appraisers; CE; AI CE credit: Attend only - 35 points.

Practical Applications of the Residential Sales Comparison Approach
This program was designed for appraisers with some knowledge of the process who wish to advance their skill set and review the basic procedures of sales comparison analysis. For some appraisers, this will be a new way to think about the sales comparison approach, but for more experienced appraisers this may be somewhat like an airline pilot going back to ground school to re-familiarize themselves with basic procedures that are not used often but still are important to the job. In this program, you will study the underlying logic of the sales comparison approach, ways to support adjustments, how to reconcile the evidence of value and why some of the data may be inconsistent. The material will explore the research and analysis of human behavior in the buying process and why some sales are not good indications of market value. This material is also important to appraisers who receive some push back from clients regarding the logic of the sales comparison approach or in some cases, other non-client users that object to the conclusions, e.g., homeowners.

- 4 hours; residential appraisers; CE; AI CE credit: Attend only - 20 points.

Practice Examination Questions for Real Estate Appraisers
This test prep guide from the Appraisal Institute, the leading authority on real estate appraisal, provides practice problems you need to take and pass your state licensing or certification examination. Using the 1,000+ real-world questions and answers provided, you can: educate yourself on the concepts likely to be covered on the exam; understand the logic behind the testing and scoring processes; get study and test-taking tips to improve your chances of passing; prepare to meet and beat this career-making challenge. Access unlimited practice for every section of the exam for up to a year!

- NOT approved for CE hours; general and residential appraisers
Rapid Response: Market Analysis in Volatile Markets (NEW)
This year, COVID-19 has had significant impacts on the economy. Businesses have either cut back or temporarily closed, employees have been laid off, businesses are filing for bankruptcy, employees are working remotely, commercial activities, real estate and other non-residential activities are making plans for a recession. While the housing market is still strong, that could change overnight. The market is too dynamic now to rely on monthly, quarterly, or annual sales reports to support opinions on market health. This seminar will show you how to locate contemporary data for your clients and will show you how to rapidly and accurately read and report on market changes.

- 7 hours; residential appraisers; CE. AI CE credit: Attend only - 35 points.

Rates and Ratios: Making Sense of GiMs, OArTs, and DCF
This seminar will provide a conceptual framework for thinking about key relationships among models, ranging from gross income multipliers to discounted cash flow models. Up until now, little focus has been placed on how these models relate to each other. These relationships have important implications for how differences in these rates and multipliers are interpreted and, in turn, for selecting and using data from comparable sales. Using a case study that follows logical progression from GiMs to DCF models, you’ll analyze specific relationships (i.e., between going-in verses going-out capitalization rates and between before-and after-tax rates). You will gain a comprehensive overview of the broad range of relationships among key multipliers and rates.

- 7 hours; general appraisers; CE. AI CE credit: Attend only - 75 points.

Real Estate Appraisal Operations
Real Estate Appraisal Operations is an educational offering designed to assist appraisers and their staff in the everyday operation of an appraisal office. Topics discussed include the everyday office question of how to organize a file to how to choose your client. You will leave the class with tips on client types, marketing, fee estimates, collections, and the efficient handling of daily routine tasks. Sample forms and websites are provided to assist you in your daily workplace.

- 4 hours; general and residential appraisers; this seminar is not approved for State CE Credit. CE. AI CE credit: Attend only - 20 points

Reviewing Residential Appraisals and Using Fannie Mae Form 2000
This seminar is designed to be presented to practicing residential real estate appraisers. It is quite possible that this material will also appeal to loan underwriters, lender quality control persons and even some investors. This material is designed to invoke discussion about the correct use, pitfalls and optional procedures utilized in the review of appraisal reports.

- 7 hours; residential appraisers; CE: classroom version available (Reviewing Residential Appraisal Reports). AI CE credit: Attend only - 35 points.

Small Hotel/Motel Valuation
This seminar will give appraisers an opportunity to examine the unique business aspects, demands and challenges involved in appraising lodging properties - particularly the limited-service hotel. Participants will discuss the state of the industry, determine how it relates to a specific appraisal problem and become familiar with hotel terminology. Students will gain confidence in identifying data sources, review effective techniques for property inspection interviews, and recognize special valuation issues, such as allocating the going concern. This seminar also covers the Uniform System of Accounts for the Lodging Industry and how it applies to reconstructing income and expense statements.

- 7 hours; general appraisers; CE. AI CE credit: Attend only - 75 points.
Subdivision Valuation: A Comprehensive Guide to Valuing Improved Subdivisions
This seminar is designed to provide an overview of subdivision valuation methodology as it relates to the valuation of improved subdivisions. The primary emphasis is on the methods and techniques needed to value a group of lots or units that must be marketed over a period of time. The seminar material would be of value to any appraiser attempting to provide an opinion of value for a proposed subdivision or group of existing lots or units. Comprehensive examples are provided explaining how line item profit and discount rate selection are handled in conjunction with discounted cash flow analysis. This sets the stage for more detailed coverage of income, sales comparison and cost approach applications in subdivision valuation.

- 7 hours; general appraisers; CE; classroom version available (Subdivision Valuation: A Comprehensive Guide to Valuing Improved Subdivisions). AI CE credit: Attend only - 75 points.

The Discounted Cash Flow Model: Concepts, Issues, and Applications
This 5-hour seminar focuses on the basic concepts and principles of discounted cash flow valuation and modeling. DCF modeling is a powerful tool when properly used and understood. You will find that it adds value to your appraisal assignments. Developed for participants with varied appraisal backgrounds, this seminar mirrors real-world situations.

- 5 hours; general and residential appraisers; CE. AI CE credit: Attend only – 31.25 points.

Thinking Outside the Form
Almost everyone is familiar with the now worn-out phrase, “thinking outside the box.” It is an attempt to encourage people to be creative by moving beyond the simple and the routine. This seminar coins a new, similar phrase for residential real estate appraisers: “thinking outside the form.” Thinking Outside the Form: Tools, Techniques, and Opportunities for Residential Appraising, is designed with a three-fold purpose: to review appraisal standards required for appraisal reporting; to provide practical ways to supplement residential report forms with techniques and examples that improve compliance with appraisal standards and produce meaningful and understandable reports; and to suggest and promote alternatives to mortgage appraisal assignments and encourage residential appraisers to search for new appraisal products and business opportunities.

- 4 hours; residential appraisers; CE. AI CE credit: Attend only – 20 points.

Understanding and Appraising Residential REOs
Since the Great Recession, there have been changes in lending practices. The economic conditions caused by the recession created a need for appraisers who have specific knowledge and experience to properly develop and document opinions of real property value in foreclosure. This program begins with an overview of the history related to the current foreclosure practices. The program continues with causes of foreclosure and steps in the foreclosure process. Appraisers will learn how to identify assignment elements including the client, intended users, value, and other assignment conditions. Through a series of dilemmas and a case study, appraisers will gain an understanding of the scope of work, proper inspection procedures, market analysis, and additional components needed to arrive at credible results for a foreclosure appraisal assignment.

- 4 hours; residential appraisers; CE. AI CE credit: Attend only - 20 points.
Using Your HP-12C Financial Calculator
The purpose of this seminar is to introduce the use of modern financial calculators that are commonly used by commercial real estate professionals. The basic features of the calculator will be introduced through demonstration using a number of examples and problems that are real estate specific. While the central theme of the seminar is the HP-12C calculator, several alternative machines, including the HP10, HP17B2, and HP19B2 will also be mentioned. The objective of the seminar is to expose the student to many of the basic features of the machines, so that the student may determine which features are important to his or her professional tasks. A second objective is to give the student sufficient basic skills to attend the Appraisal Institute’s income property courses. This seminar is developed for commercial real estate professionals. There will be extensive discussion of the basic functions of the calculator along with a thorough treatment of the financial functions, but there will be no treatment of the statistical, depreciation, bond, or programming abilities variously available with these machines. In addition, students must be familiar with the concepts of compounding and discounting prior to the class.

- 7 hours; general appraisers; CE. AI CE credit: Attend only - 35 points.

Valuation Resources for Photovoltaic Systems
Photovoltaic systems, also called PV systems, generate electricity from the sun. When added to a property, PV systems can power home appliances, lights, air conditioning, cell phones, and other electrical devices. There are over one and a half million households, nearly a 2% residential adoption rate, in the United States with solar energy systems and the number of solar installations is expected to grow exponentially in the coming years. For most appraisers, however, developing the value of solar is a new frontier. But as the demand grows for appraisers who can properly value solar homes, forward-thinking appraisers will have a market edge. They’ll be able to differentiate themselves from their peers by serving as a local source of information on solar.

- 3 hours; residential appraisers; CE. AI CE credit: Attend only - 15 points.
Live Online Synchronous Programs

**Advanced Concepts & Case Studies**
This course synthesizes basic and advanced valuation techniques taught in previous courses, and addresses consistent treatment of the three valuation approaches for various valuation problems. Case studies teach participants how to address common but complex appraisal issues, including a leased fee not at market rent, a proposed property, a property in a market not at equilibrium, and a subdivision. The course emphasizes the need to test the reasonableness of conclusion in an appraisal.

- Total 40 hours (2 pre-class online, 35 live online, 3-hour offline exam); general appraisers; required MAI designation course. Approved for CE (most states). AQB approved as a QE Certified General elective, [click here](#) to check your state’s QE elective approval status.
  
  AI CE credit: Attend only - 275 points; Attend and Pass - 375 points; Pass Exam only - 325 points.

**Advanced Income Capitalization**
Advanced applications of the income capitalization approach are investigated and explored. Discounted cash flow analysis provides the framework for much of the discussion of investment analysis concepts, emphasizing an understanding of the relationships among the various components of DCF, financial leverage, and risk analysis. The course uses hands-on computer spreadsheet modeling techniques for in-class illustrations and practices of taught concepts.

- Total 35 hours (2 pre-class online, 30 live online, 3-hour offline exam); general appraisers; required MAI designation course. Approved for CE (most states). AQB approved as a QE Certified General elective, [click here](#) to check your state’s QE elective approval status.
  
  AI CE credit: Attend only - 275 points; Attend and Pass - 375 points; Pass Exam only - 325 points.

**Advanced Market Analysis and Highest & Best Use**
Building on the Level B marketability studies that were applied in General Appraiser Market Analysis and Highest & Best Use, you should learn how to perform Level C marketability studies using fundamental demand analysis and have the opportunity to study several real estate markets in a single city. Draw credible conclusions about the demand for and capture of four different subject properties: residential multifamily, industrial, retail, and land with potential for mixed-use development. An in-depth analysis of related issues including urban structures, market cycles, and economic base analysis is provided. The mixed-use development study as well as consideration of conversion of the multifamily property for condominium use should broaden your understanding of highest and best use analysis and give you even more tools to apply it.

- Total 35 hours (2 pre-class online, 30 live online, 3-hour offline exam); general appraisers; required MAI designation course. Approved for CE (most states). AQB approved as a QE Certified General elective, [click here](#) to check your state’s QE elective approval status.
  
  AI CE credit: Attend only - 275 points; Attend and Pass - 375 points; Pass Exam only - 325 points.
Advanced Residential Applications and Case Studies/Part 1
In Part 1 of a two-part course package, you will apply appraisal techniques to solve a complex residential case study appraisal assignment. You will put your knowledge of terminology, concepts, procedures, and methods to the test as you demonstrate competence in the areas of appraisal analysis learned in previous courses. By successfully completing the course and exam, you will have met most states’ education requirements in the content area identified as advanced residential applications and case studies. Individuals who are seeking the Appraisal Institute SRA designation may take this course and Advanced Residential Report Writing/Part 2 as an alternative to complete the Residential Demonstration of Knowledge requirement.

- 14 classroom hours + 1-hour exam; residential appraisers; required SRA designation course; QE, AQB approved. AI CE credit: Attend only - 175 points; Attend and Pass - 225 points.

Advanced Residential Report Writing/Part 2
In Part 2 of a two-course package, you are provided with the tools to write sections of a narrative report. You will complete eight writing assignments based on sections of a narrative appraisal report for the case study property you analyzed in Part 1. Successful completion of this course should increase your ability to 1) apply a wide range of appraisal procedures to solve complex appraisal problems and 2) use a narrative reporting format with confidence to explain and support your conclusions convincingly. Individuals seeking the Appraisal Institute SRA designation may take this course and Advanced Residential Applications and Case Studies/Part 1 as an alternative to complete the Residential Demonstration of Knowledge requirement.

- 28 classroom hours + 2-hour exam; residential appraisers; required SRA designation course; QE, AQB approved (may be used to fulfill the 20-hour Elective topic requirement toward residential certification in states where approved). AI CE credit: Attend only - 275 points; Attend and Pass - 375 points.

Artificial Intelligence, AVMs, Blockchain and the Future of Appraisal
This four-hour seminar will examine the potential, risks, and opportunities that artificial intelligence, machine learning, and blockchain technology offers to society in general, but with a particular focus on its ramifications for valuation professionals. Seminar attendees will gain an understanding of the history of artificial intelligence and machine learning and how these technologies presently manifest themselves in our lives, and finally, how they will be present in all aspects of our society.

- 4 classroom hours; general and residential appraisers; CE. AI CE credit: Attend only – 20 points.

Basic Appraisal Principles
If you are considering a career in professional valuation services, your journey should begin with Basic Appraisal Principles. This four-day course will introduce you to real property concepts and characteristics, legal considerations, influences on real estate values, types of value, economic principles, real estate markets and analysis, highest and best use, and ethical considerations. The course should provide a solid foundation in basic appraisal principles no matter what appraisal specialty you pursue.

- 28 classroom hours + 2-hour exam; general and residential appraisers; AQB approved, QE, CE; online version available. AI CE credit: Attend only - 150 points; Attend and Pass - 200 points; Pass exam only - 150 points.
Basic Appraisal Procedures
Apply the principles and concepts learned in Basic Appraisal Principles. This four-day course takes you step-by-step through the valuation process: defining the problem, collecting and analyzing data, reaching a final opinion of value, and communicating the appraisal. Learn about the three approaches to reaching an opinion of value—income capitalization, cost, and sales comparison—and apply them in true-to-life case studies and problems. After examining income capitalization methods and formulas, learn how rates and multipliers are derived. Through case studies discover the steps and concepts involved in the cost approach—how appraisers estimate the cost of constructing a reproduction of or replacement for an existing structure; the three major components of depreciation and methods for estimating and allocating depreciation; and land and site valuation. The course will guide you through the sales comparison approach including researching the market, verifying information, selecting units of comparison, conducting a comparative analysis, making adjustments, and reconciliation. Complete key sections of an appraisal report. Finally, the course provides an introduction to property description and construction and design basics.

- 28 classroom hours + 2-hour exam; general and residential appraisers; AQB approved, QE, CE; online version available. AI CE credit: Attend only - 150 points; Attend and Pass - 200 points; Pass exam only - 150 points.

Business Practices and Ethics
This is an important course that provides information about standards and ethics requirements for valuers in general and, more specifically, for valuers who belong to the Appraisal Institute. Through discussion questions and examples, the class compares behavior and actions that illustrate violations of the Code of Professional Ethics, and participants learn how referrals can be made. Participants are also introduced to the Appraisal Institute Guide Notes to the Standards of Professional Practice and use these Guide Notes to resolve everyday appraisal practice problems. At the end of the course, they learn about common errors in appraisal reports and review reports, and they respond to questions about challenges that arise in appraisal practice such as requests for updates and requests to change or add intended users.

- 6 classroom hours; general and residential appraisers; Designated members, Candidates, Practicing Affiliates, and those interested in readmitting to the Appraisal Institute should enroll in this course. Note. This course is required CE for Designated members, Candidates, and Practicing Affiliates.; CE, AQB approved; online version available. AI CE credit: Attend only - 30 points.

Complex Litigation Appraisal Case Studies
Based on the Appraisal Institute’s textbook Applications in Litigation Valuation: A Pragmatist’s Guide, this one-day seminar discusses in detail three of the book’s case studies that provide an overview of litigation strategies to appraisers who are new to litigation work, as well as a reinforcement of litigation skills to more experienced appraisers. Case study topics include title issues, continuing nuisance, and condemnation. If you have not attended the courses in the Litigation Professional Development Program, this seminar is an excellent starting point. If you have attended those courses, this seminar should reinforce many of the concepts you previously have learned.

- 7 hours; general/residential appraisers; CE. AI CE credit: Attend only - 75 points.

Contract or Effective Rent: Finding the Real Rent
Work through real-world applications of common circumstances involving effective rent. Distinguish between nominal and effective rent and further enhance your analysis by evaluating the way effective rent impacts property value. Recognize how the integration of the effective rent measurement is used by market participants (landlords and tenants) for leases involving landlord concessions and non-market based provisions in all three approaches to value. At the end of the seminar, participants will have a take-away model to use when incorporating effective rent into their valuation or consulting work. Attendees should be expected to have familiarity with discounted cash flow concepts and a working knowledge of Excel prior to attending the seminar.

- 4 classroom hours; general appraisers; CE. AI CE credit: Attend only – 20 points.
General Demonstration Report—Capstone Program
The General Demonstration Report—Capstone Program is an option Candidates for Designation may choose to complete their demonstration of knowledge requirement for their MAI designation. Like the traditional requirement, the same skills and knowledge base are required to produce a complete demonstration appraisal report. However, this program was designed to offer an option that accelerates the completion of the report. Instead of selecting and compiling data on a property, participants are provided with a subject property and data to analyze and then write the report in a limited time span of approximately two months. Participants must attend two webinars and a 7-day synchronous session where facilitators will be on hand to answer questions and offer guidance. The full report is submitted for grading at noon on the seventh day.

Quantitative Analysis
This course limits its focus to the practical application of quantitative tools for analyzing data, drawing appropriate conclusions from data sets, and presenting both the analysis and conclusions in ways that enhance communication with appraisal clients. It reviews and further the application of basic statistical measures (mean, median, mode, standard deviation, etc.) and spends a good deal of time on graphical and regression analysis for using in producing and understanding various types of graphs. Central goals of the course are showing participants how to understand the reliability and validity of all data used to draw conclusions and providing the knowledge needed to check the validity of the conclusions others may draw from the same or similar data sets. Each presentation and activity uses real-world appraisal applications and is aimed at furthering an appraiser’s ability to provide credible analysis of real property related issues.

- Total 35 hours (2 pre-class online, 30 live online, 3-hour offline exam); general appraisers; required MAI designation course. Approved for CE (most states); AQB approved as a QE Certified General elective, click here to check your state’s QE elective approval status.
  AI CE credit: Attend Only - 275 points; Attend and Pass - 375 points; Pass Exam Only - 325 points.

Residential Market Analysis and Highest & Best Use
This course provides a fresh look at the relationship between market analysis and highest and best use. Learn how to read and map a market area for a subject property and discover the essential links between market analysis, highest and best use analysis, and the three approaches to value (cost, sales comparison, and income capitalization). Participants gain practical experience by solving highest and best use problems like the ones you might encounter in the real world.

- 14 classroom hours + 1-hour exam; residential appraisers; AQB approved, QE, CE; online version available. AI CE credit: Attend only - 70 points; Attend and Pass - 140 points; Pass Exam only - 125 points.

Residential Report Writing and Case Studies
In this course, appraisers engage in practical writing exercises necessary to produce convincing appraisal reports in daily practice. Participants will practice writing effective narrative comments for form appraisal reports and learn how to explain valuation procedures and conclusions to users of reports. The techniques applied in this course are useful in real-life situations that complicate routine assignments.

- 14 classroom hours + 1-hour exam; residential appraisers; AQB approved, QE, CE; online version available. AI CE credit: Attend only - 70 points; Attend and Pass - 140 points; Pass Exam only - 125 points.

Review Case Studies—General
In this course, you will put into practice the concepts in Review Theory-General. You will enhance your review skills by preparing two required review reports based on two case studies that present some of the issues reviewers face in review assignments. For each case study, you will develop opinions on the completeness, accuracy, adequacy, relevance, reasonableness, appropriateness, and credibility of another appraiser’s work and then communicate your opinions in a review report you design and draft yourself. By preparing written review reports based on the case studies, you will gain confidence in the application of review techniques. This course will be beneficial for appraisers and other real estate professionals who regularly work with appraisals and reviews.

- 30 classroom hours + 2-hour exam; general appraisers; required course for candidates pursuing the AI-RRS Designation. AI CE credit: Attend only - 275 points; Attend and pass - 375 points; Pass exam only - 100 points.
Review Case Studies—Residential
Learn how to apply the seven steps of the review process by walking through a case study that focuses on a two-stage review assignment in this four half-day, live online (synchronous) course. The course begins with a quick refresher of review concepts from Review Theory—Residential and then you’ll identify and analyze the components of the case study review assignment. This course, designed for residential appraisers, will help you evaluate and analyze key sections of the Uniform Residential Appraisal Report (URAR) through an in-depth case study and real-world review applications; effectively develop and communicate opinions of completeness, accuracy, adequacy, relevance, reasonableness, appropriateness, credibility, and reasons for disagreement; and evaluate appraisal errors to distinguish whether they are trivial or material from a review perspective. If you are an appraiser, reviewer, or other real estate professional who regularly works with reviews, this hands-on, application-based course is for you

- 14 classroom hours + 1-hour exam; residential appraisers; CE PENDING; required course for candidates pursuing the AI-RRS Designation. AI CE credit: Attend only - 175 points; Attend and pass - 225 points; Pass exam only - 100 points.

Review Theory—General
This fundamental review course that all reviewers of assignments involving income-producing and other nonresidential properties should have in their educational background. It is a required course for individuals pursuing the Appraisal Institute General Review Designation (AI-GRS, Appraisal Institute General Review Specialist). At the core of this course is the review process. Participants explore the seven steps outlined in this process as they apply to nonresidential properties. To be a reviewer, an appraiser must learn how to develop opinions of completeness, accuracy, adequacy, relevance, and reasonableness relative to the work under review. These opinions must be refined through tests of reasonableness to develop reconciled opinions of appropriateness and credibility.

The material provides a refresher on key valuation skills often required of reviewers, such as measuring financial feasibility in highest and best use analysis and various applications of the income capitalization approach. In addition, the course covers reporting reviews for income-producing property and the use of commercial review report forms, narrative reports, and oral review reports. Participants will gain practice in writing a scope of work statement for three types of assignments. They will also develop a template for a narrative review report on a property type of their choice (office, retail, apartment, etc.). By taking this course, participants will gain invaluable confidence in the fundamentals of review through the review process, which is the core of this course. To be a reviewer, an appraiser must learn how to develop opinions of completeness, accuracy, adequacy, relevance, and reasonableness relative to the work under review. These opinions must be refined through tests of reasonableness in order to develop opinions of appropriateness and credibility. By taking this course, participants may gain invaluable confidence on the fundamentals of review.

- 30 classroom hours + 3-hour exam; general appraisers; CE; required course for designated members and candidates pursuing the AI-GRS Designation. AI CE credit: Attend only - 275 points; Attend and pass - 375 points; Pass exam only - 100.

Review Theory—Residential
This fundamental review course that all reviewers of residential appraisals and reviews should have in their educational background. It is a required course for individuals pursuing the Appraisal Institute Residential Review Designation (AI-RRS, Appraisal Institute Residential Review Specialist). At the core of this course is the review process. Participants explore the seven steps in the process as they apply to reviews of residential work including, but not limited to, those subject to GSE requirements. To be a reviewer, an appraiser must learn how to develop opinions of completeness, accuracy, adequacy, relevance, and reasonableness relative to the work under review. These opinions must be refined through tests of reasonableness to develop reconciled opinions of appropriateness and credibility.

The material addresses how requirements of the review process compare with those of the Fannie Mae Form 2000/Freddie Mac Form 1032, One-Unit Residential Review Form as well as other GSE documents such as the Fannie Mae Selling Guide. Other topics include complex or challenging residential review assignments such as those involving limited data, nonconforming properties, less common ownership types, or unusual properties such as geodesic domes and hobby farms. By taking this course, participants will gain invaluable confidence in the fundamentals of review.

- 15 classroom hours + 2-hour exam; residential appraisers; CE; required course for designated members and pursuing the AI-RRS Designation. AI CE credit: Attend only - 175 points; Attend and pass - 225 points; Pass exam only - 100 points.
Using Spreadsheet Programs in Real Estate Appraisals - The Basics
The technological advances of the last ten years have caused a significant change in the real estate appraisal profession. For example, today nearly all databases are computerized; it is imperative that appraisers easily retrieve, list, and analyze large quantities of data. During this hands-on seminar, participants will use Microsoft Excel to develop a spreadsheet skill set that includes the use of thousands of the program’s applications. By developing spreadsheet skills that report statistical analysis and provide graphic illustrations, appraisers will have additional professional skills to meet the needs of a more diversified client base.

- 7 hours; general and residential appraisers; CE. AI CE credit: Attend only - 35 points.
Online Education: Webinars

2017 GSE Appraisal Policy Workshop
Fannie Mae and Freddie Mac are leading agencies in the nation’s housing finance system, and as such, they continually undertake efforts to improve risk management activities, including in real estate appraisal. Recently, we have seen the agencies turn to appraisal information in developing quality assurance systems relating to collateral risk. These systems are now fully operational and fully integrated with mortgage loan seller operations. The agencies recently announced plans to waive appraisals in certain low risk loan situations, yet appraisals are still very much a part of the agencies’ plans moving forward.

This workshop will help professional appraisers understand the short and long term goals of the agencies relative to appraisals. Participants will hear the latest findings of quality assurance programs and better understand how appraisers can improve their performance. The agencies will also outline their respective appraisal waiver policies and help appraisers understand what steps they can take to continue providing value added services to end users and investors.

Duration: 2 hours

A Debate on the Allocation of Hotel Total Assets
When an assignment requires the valuation of just a hotel’s real property component, an allocation of hotel personal property and business value is necessary. Two internationally renowned experts on this topic – David C. Lennhoff, MAI, SRA and Steve Rushmore, MAI, FRICS, CHA – present their “famous” debate on this methodology in this 2-hour webinar recording!

Duration: 2 hours

A Lender’s Perspective: The Role of the Appraisal in the Lending Process
Become familiar with fundamental Uniform Standards of Professional Appraisal Practice concepts – including scope of work and the critical dual issues of appraiser independence – and learn how to recognize and hire a qualified appraiser.

Duration: 2 hours

A Look At Supporting Adjustments With The Three Approaches (Free for AI Professionals)
Can you adequately support adjustments, especially in these days of Collateral Underwriter? While many educational programs exist to assist you, they typically focus on just one approach or technique. In this webinar, developed by the Appraisal Institute’s Residential Appraiser Project Team (RAPT), three highly respected residential appraisers will discuss using the three approaches to derive and support adjustments.

Duration: 2 hours

A Picture is Worth a Thousand Words: Data Visualization in Appraisal
There are numerous tools available that enable the appraiser to provide concise visual representations of this data to the client and tell the story in a more accessible and meaningful way, highlighting specific factors that will affect your client’s business decisions. This webinar explores a few of these data visualization tools, including tools for graphic representations of value and market data, and mapping tools all of which can be used to enhance and clarify your appraisal reports.

Duration: 2 hours
**Appraisal Management Liability**
During this webinar, Peter Christensen will discuss recent litigation about appraisal management and what can be learned from those cases for the benefit of both AMCs and appraisers. Some of these legal matters include: the recent alleged class action in West Virginia, the FDIC’s two actions against AMCs as receiver for failed lender Washington Mutual, recent AMC “whistleblower” litigation, typical lender and borrower actions against AMCs, and appraiser actions about “blacklisting.”

Duration: 2 hours

**Appraisal Practice Services Involved in Valuation for Financial Reporting**
Hear from practitioners and industry experts on successful practices employed by appraisers in the realm of valuation for financial reporting. Understand how USPAP applies in VFR assignments. Also, understand user demands and expectations and the importance of “phased” assignments.

Duration: 2 hours

**Appraiser Liability: Using the AZ765 ANSI Measuring Standard**
The American National Standards Institute (ANSI) recently collaborated with the National Association of Home Builders (NAHB) to develop a standard method for measuring single family residences. The Z765-2003 ANSI Standard should be a win-win for residential appraisers of every experience level. Using one standard can help reduce measuring errors caused by using different measuring methods and can also minimize litigation alleging measurement misrepresentations of the gross living area. Learn how some of your everyday practices could potentially lead to accidental measuring inaccuracies. Differing measurements abound in Gross Living Area figures in MLS listing forms and even among colleagues at the same appraisal firm.

Duration: 2 hours

**Appraising Airports and Airplane Hangars**
You will hear from experienced appraisers in the aviation field. The program will focus on the reasons for airport property appraisal and consulting, FAA regulations, various methods for valuation, unique appraisal issues at airport properties, and case studies.

Duration: 2 hours

**Appraising Cell Towers**
Cell towers present unique challenges to the appraiser. What are you valuing? How do you value it? In this webinar, experts offer information to help you in your cell tower appraisal assignments. You will become familiar with cell tower site technology and equipment, learn what is involved in a cell tower site appraisal, hear experts discuss cell tower site valuation strategies and be informed about considerations that impact cell tower site appraisal.

Duration: 2 hours

**Appraising Commercial and Complex Properties in a Historic Area**
The appraisal of commercial and complex property in an historic area presents unique challenges to the appraiser. As with any appraisal, critical components to the process are the identification of relevant characteristics, data collection and analysis. The historic area appraisal includes these components – but with its own special spin. In this webinar, speakers will discuss their experiences with appraisals of this type and present information that will help to make your next historic appraisal easier.

Duration: 2 hours
Benchmarking Building Performance
More homeowners, investors and tenants are turning their attention to building performance metrics: concrete, quantifiable ways to accurately measure and compare building performance across a wide range of characteristics. What started out in the green building world has now expanded to include conventional buildings of virtually every property type and size in nearly every corner of the country. Intended for those working in both the commercial and residential sectors, this webinar will discuss what’s driving these new building performance standards and how to prepare to address their relevance in valuation.

Duration: 2 hours

Carving Out Your Legal Niche: Do’s and Don’ts of Litigation Support
This webinar features a panel of practicing lawyers who regularly work with appraisal professionals. Orell Anderson, MAI will moderate a discussion with these experts on current issues related to real estate valuation in the legal community and how appraisers can successfully market their services to lawyers.

Duration: 2 hours

Commercial Bankruptcy, Workouts, and the Valuation Process
Learn how your valuation expertise can be used for bankruptcy and workouts at this timely webinar! If you are interested in performing work for bankruptcy and workouts, you won’t want to miss this webinar. A leading bankruptcy attorney and trustees will provide a complete overview of the bankruptcy process and detail how valuations are used in bankruptcy proceedings. Additionally, they’ll provide an informative update on bankruptcy court cases relevant to valuation practitioners.

Duration: 2 hours

Commercial Real Estate Training from the Appraisal Institute
Understand appraisal and work smarter! This Appraisal Institute 4-part program was specifically designed to educate lending, credit, audit or risk management staff who handle appraisal engagement, review and evaluation. The instructor covers the material, brings in handy checklists, and answers questions.

Duration: 8 hours over 4 parts

Contamination and the Valuation Process
You’re asked to do an appraisal on a contaminated property. Are you prepared? What are you appraising and how do you appraise it? What appraisal method produces the most reliable results? Learn more about contaminated properties, get answers to these questions, and much more. Topics covered during this webinar include Environmental Contamination; Risks, and Stigma; The Remediation Lifecycle; FNMA and USPAP Requirements; Analysis Methods: Environmental Case Study, Paired Sales, Multiple Regression, and Income Capitalization Analysis; Data Sources and Resources; Current Issues and What’s Ahead.

Duration: 2 hours

COVID-19 – Rapid Response and Latest Developments
The Appraisal Institute covers the latest developments on the COVID-19 pandemic. Participants will hear the most current legislative and regulatory developments that impact appraisers, including policy announcements on appraisal requirements and property inspections from the GSEs, and potential changes to loan guarantee programs. We will also cover fast-moving federal and state guidance issued for financial institutions and real estate professionals. Further, professional practice experts will share guidance and suggestions for appraisal practice in the current market, along with helpful tips as to how you can differentiate yourself with clients seeking to understand how the market is reacting to the pandemic.

Duration: 90 minutes
Current Issues Regarding Appraisals of Senior Housing and Long-Term Care Properties
With the elderly population growing rapidly, there is increasing demand for the appraisal profession to perform valuation and consulting services on existing and proposed independent living, assisted living memory care, and skilled nursing facilities. This webinar will discuss critical valuation issues for these property types. The valuation issues that will be discussed are relevant to clients and appraisers alike who will gain a better understanding of the integral components of senior housing and long-term care properties.
Duration: 2 hours

Developments in Green Valuation (Free for AI Professionals)
It's not easy to keep up to date with what goes into appraising properties with energy-efficient features that promote sustainability and reduce our carbon footprint. The experts in this webinar will bring you up to speed on important issues, research, and applications you can use to stay current in this ever growing and changing market.
Duration: 2 hours

Engagement Letters (Free for AI Professionals)
Although neither the Uniform Standards of Professional Appraisal Practice nor the Appraisal Institute Code of Professional Ethics requires the use of written engagement agreements, using a written agreement to set out the details of an assignment is a sound business practice. In 2018, the Appraisal Institute updated its sample appraisal engagement materials for non-litigation work to serve as a resource for appraisers drafting their own engagement agreements. Having been updated to incorporate key lessons from the last real estate downturn and changes in standards, the sample engagement materials help appraisers portray an increased level of professionalism; create more enforceable payment options; provide leverage to appraisers in negotiating better terms of engagement; introduce several key provisions that most appraisers do not have in their present agreements; and help appraisers reduce risk by including new provisions based on the latest caselaw concerning appraiser liability.
Duration: 2 hours

Evaluating the Evaluation
This webinar surveys the regulatory environment surrounding non-appraisal evaluation products, particularly the impact of the most recent issuances, such as the Interagency Appraisal Evaluation Guidelines, Regulation B, the Equal Credit Opportunity Act, the Consumer Finance Protection Bureau, valuation disclosures for one- to four-unit dwellings, and the impact on financial institutions. Compliance options and their associated risks will be discussed, from internal bank products to external evaluation products to AVMs. A brief survey of competing products will be identified, plus suggestions on ways to evaluate the "fit" of program options.
Duration: 2 hours

Excel as an Appraisal Professional: Making Your Job Easier Using Excel Spreadsheets
Microsoft Office Excel is a dynamic spreadsheet tool ubiquitously used the world over by millions of professionals in a broad range of professions. This webinar will introduce the beginning to intermediate Excel user to the primary Excel functions that are most relevant to your work as an appraisal professional. Additionally, you will discover Excel templates and tools that have been created by appraisers, for appraisers, designed to help you perform specific number-crunching tasks in the blink of an eye. And you will walk away from this webinar with the basic tools necessary to begin your own exploration of the Excel program.
Duration: 2 hours

Federal Agencies and Appraisal: Program Updates
During this webinar, a panel of high-level federal agency representatives will provide updates and insights about how appraisal reports are used within their respective agencies. Suggestions about how appraisers can best work with federal agency representatives will also be given.
Duration: 2 hours
Form 1004MC: Accurately Analyzing and Reporting Market Rebounds and Declines
This webinar faces head on a difficult issue when using Form 1004MC – dealing with directional changes in the market such as rebounds and declines. ‘Averaging’ sale prices into groupings of 3 and 6 months can delay identification of market changes and result in inaccurate market conditions (time) adjustments. This webinar presents the econometric best practice wherever exact dates of sale are available. It also shows how to reconcile and report the indicated market conditions adjustment and the resulting valuation – and stay in compliance with the 1004MC instructions.

Duration: 2 hours

Fundamentals of Going Concerns
How much do you know about going concerns and appraising them? If you are a commercial appraiser with little to no experience in going concern appraisal, this webinar is for you! It provides an overview of going concerns appraisal including approaches to value, allocation methods, regulatory considerations, and sources of business.

Duration: 2 hours

General Market Analysis
The importance of accurate and supportable market analysis cannot be overemphasized in the current "up and down" real estate market. The General Market Analysis webinar shines the spotlight on a key aspect of valuation. If you appraise commercial properties, you won't want to miss this webinar!

Duration: 2 hours

Golf Course Property Valuation
The purpose of this webinar is to acquaint you with the caveats of golf course appraisal. For valuing golf courses, there is ample guiding experience in the industry, but each course has its own unique character. Condition varies widely and without the requisite knowledge of restoration costs, it is possible to have a wide variation in valuation. Rounds played in a golfing market depends greatly on competing courses, greens fees, and travel time for the widest market. Other compounding issues include restaurants or a destination location with an additional stay and play attraction such as a casino or beach hotel. A solid base for the valuation process begins with appropriately reviewing comparables, rating green fees and projected rounds played, projecting expenses, understanding land valuation, and properly allocating depreciation.

Duration: 2 hours

Guide Notes 11 and 12: What They Mean to You
The Appraisal Institute has adopted Guide Notes to provide guidance on specific appraisal practice situations. This webinar provides expert insight on two recently crafted Guide Notes, Guide Note 11: Comparable Selection in a Declining Market and Guide Note 12: Analyzing Market Trends.

Duration: 2 hours

Hot Legal Issues – The Gig Worker Law
In this live webinar, classification of workers as employees or independent contractors under new California law AB5, a.k.a. "the gig worker law," along with recent litigation and other legislation on worker classification, will be reviewed and analyzed in the context of the appraisal field. Learn the law and enhance your legal understanding.

Duration: 2 hours
How to Read a Residential Appraisal Report
If you work in the residential banking market, you know it’s essential to understand how to read and use appraisals. Attend this webinar to understand the URAR report, the primary appraisal form used by lenders for residential property. You’ll learn how appraisers document their opinion of market value using the sales comparison approach, how they select comparable sales, and various procedures for making adjustments. Review the nuts and bolts of researching sales and transfer history of properties as well as reconciliation.

Duration: 2 hours

How to Systemize Your Appraisal Business
Would you like to increase the bottom line of your business while at the same time making it more efficient? If so, you don’t want to miss this exclusive webinar presented by Calvin Cummings, MAI, the Systemization Guru. Learn how to Turnkey your appraisal business that will allow you to increase your free time to do the things you love. If you are of the mindset that you have to work harder, work longer hours, and do everything yourself to get ahead, skip this webinar! However, if you are interested in learning more about what it means to document and improve your business systems so you don’t have to remain a slave to your business forever, you don’t want to miss this webinar!

Duration: 2 hours

Hybrid Appraisals: Understanding Their Use and Application (Free for AI Professionals)
Hybrid residential appraisals – where an inspection is performed by a third party and provided to the appraiser for analysis - are here and may change the way appraisers work in certain situations. Find out how these assignment requests are being implemented and how they may affect you and your business. Hear from a Designated appraiser with hybrid experience about pros and cons, and helpful advice, when considering such requests. A standards expert will also discuss assumptions and conditions and practical liability issues. In addition, an end user/client will highlight what they are doing now and how they are envisioning the use of hybrid appraisals in the future.

Duration: 2 hours

Impact of Collateral Underwriter for Appraisers and Lenders
Fannie Mae’s implemented “Collateral Underwriter” in January 2015. In this timely webinar, appraisers and lenders will discuss their real-world experiences with the application and how they have managed a potentially new work flow for their clients. Attend this webinar and learn if there are changes you need to make to increase your effectiveness!

Duration: 2 Hours

In booming times, an executive opinion of fair value might be all that one needs. In recessionary times, a third-party appraiser is more desirable, as valuation is no longer a rule of thumb solution. There are definitions of fair value per the financial accounting standards board, but the actual methods of determining impairment vary by the standards of different accounting sources. This webinar will define impairment and present its use with fair value accounting and the methods that one may apply for determining fair value, including discounted cash flows.

Duration: 2 Hours

Insurance Replacement Valuation: An Emerging Appraisal Discipline
This webinar features two expert panelists who will discuss Insurance Replacement Valuation and its emergence as its own defined discipline within the appraisal profession. We will be discussing issues and processes related to the scope of work, valuations of newly constructed and reconstructed real estate, and the various approaches to value that can be utilized to reach the specific unique goals of the Insurance Replacement Valuation process.

Duration: 2 Hours
Investment Property Accounting Standards: How the World is Converging
Understand how the Financial Accounting Standards Board is developing a comparable standard to IAS 40 for U.S. Generally Accepted Accounting Standards. Similar to IAS 40, this new standard would exempt certain real estate investment entities from the proposed Lease Accounting standard, but more importantly, will also facilitate robust financial statements for real estate firms such as REITs and pension funds, an area where third-party appraisal expertise may have significant value.

Duration: 2 hours

IRS Valuation
If you currently do appraisal assignments for the IRS or hope to in the future, this is an educational opportunity you cannot afford to miss! Hear from IRS staff about what they look for when they review an appraisal and what they consider "red flags." Get an update on the latest tax court cases relevant to practitioners and an overview on the new Conservation Easement Audit Techniques Guide.

Duration: 2 hours

Land Valuation: Upping Your Game
Land valuation is one of the most complex issues in appraisal. Credible and accurate land appraisals are critical to protecting the financial interests of land users, equity investors, and debt investors. However, inadequate appraisal reports can compromise these interests. In this webinar, experts in the field will present information and perspectives on best practices in land valuation.

Duration: 2 hours

Leasehold Valuations for the Appraisal Professional
This webinar features two expert panelists: one is a professional appraiser, the other a loan officer. We will be discussing issues and processes related to the various aspects of leaseholds and their effects on property valuations, including puts versus options, long-term versus short-term leaseholds, and negative leaseholds. We will also be discussing the proper procedures that appraisers should follow from the point of view of a loan officer, who will walk you through the loan approval process, and review examples of ideal and less than ideal loan applications.

Duration: 2 hours

Legal Trends and Issues Impacting Appraisers and Appraisal Firms
Real estate valuation professionals face an evolving and changing legal and compliance environment, not just on standards and methodology matters, but on business and operational issues. This includes matters involving employment, such as independent contractor arrangements, proposed changes to overtime pay requirements, and efforts to reduce or limit civil liability for appraisers. Participate in this briefing to understand the latest legal trends facing appraisers and understand how to better protect yourself and your firm.

Duration: 2 hours

Marina Valuation Overview
The webinar will address the unique and varying physical characteristics of coastal and inland marinas and the various revenue sources such as wet slip and dry rack rentals, fuel dispensing, upland storage boat rentals and boat maintenance/repair operations.

Duration: 2 hours
**Mortgage Fraud and Real Estate Valuation**
Learn about the mortgage fraud epidemic and its impact on the appraisal profession! During this webinar, you will:
- Obtain an overview of real estate fraud today, past and emerging fraud trends, where it’s occurring and major schemes being detected;
- Learn how appraisal reports containing omissions, oversights and misleading information are considered evidence of fraud;
- Hear from law enforcement officials about the most common valuation scams, the financial scope of fraud and the impact of fraud on communities;
- Gain an update on successful civil lawsuits and criminal actions involving valuation fraud; and
- Spot what appraisers do (and don’t do) which can result in money judgments and prison sentences.

Duration: 1.5 hours

**Multifamily Appraisal Update**
Investments in multifamily housing have increased in recent years and are expected to remain steady in the years to come. Recently, agencies and enterprises such as Freddie Mac and the Federal Housing Administration have made significant updates to appraisal guidelines and loan seller work requests to improve collateral review. This session will explain the multifamily appraisal needs of two of the largest backers of multifamily financing in the United States and what issues appraisers need to pay attention to have success with multifamily housing appraisal assignments.

Duration: 2 hours

**NCREIF Agricultural Appraisal Guidelines**
The National Council of Real Estate Investment Fiduciaries (NCREIF) released its Agricultural Appraisal Guidelines on September 11, 2019. Developed by members of the NCREIF Farmland Committee with input from organizations such as the Appraisal Institute, the guidelines are intended to provide clearly defined standards for appraisers but are not intended to replace any current valuation requirements. The primary goals of the Agricultural Appraisal Guidelines are to assist the agricultural appraisal community by clarifying the content, analyses, and data that institutional investors need, as well as help further the growing demand for the agriculture as an asset class. This webinar will walk appraisers through the new Guidelines, discuss client needs in the agricultural space, and illustrate application of the guidelines in an assignment for an institutional investor.

Duration: 2 hours

**Oil Spills and Property Values**
This 2-hour webinar offers critical insights on how appraisers can accurately value contaminated properties, especially in light of recent environmental disasters such as the Gulf oil spill. Just as important, you’ll learn what assumptions you must not make and how important actual sales are to the valuation. Environmental contamination is found in many properties – industrial buildings, retail and even residential subdivisions – prepare yourself and broaden your assignments!

Duration: 2 hours

**One Step Further: Implementing of Guide Note 12 - Analyzing Market Trends**
The guide note suggests that, beyond a single point-in-time value opinion, the appropriate scope of work for an assignment may require an appraiser to provide an opinion regarding the sustainability of the value. In that way, the appraisal becomes a more valuable tool in boom and bust periods, or even in more typical market cycles. An appraiser with a solid understanding of real estate market cycles still can reasonably make predictions about the future direction of the market.

Duration: 2 hours

**Perspectives from Commercial Review Appraisers**
Increase the satisfaction of your current commercial appraisal clients and learn how to make a great impression on potential clients after attending this webinar. Hear from a distinguished panel of commercial appraisal review experts as they discuss what is happening in today’s banking environment in terms of technology, service issues and much more.

Duration: 2 hours
Property Taxation: Valuation and Consultation Services
This webinar addresses how appraisers fit under the umbrella of the property tax services industry. From preparing appraisal and appraisal review reports to providing information in a clear, objective and competent manner, appraisers can provide tremendous assistance to both the public and private sectors.

Duration: 2 hours

Protecting Yourself - Bulletproofing Your Files
If you are called upon to provide a true copy of an appraisal by a lender, the state, or a client, can you recreate, with confidence, that true appraisal based on your workfile? Could you recreate your appraisal based on the workfile months or years after the effective date? Is your workfile compliant for alternative products? This webinar will assist you in maintaining a workfile that meets USPAP requirements, and help you gain the confidence needed to recreate an appraisal after the effective date.

Duration: 2 hours

Purchase Price Allocations for Financial Reporting and Tax
ASC 805 (Business Combinations) presents many challenges for commercial valuation professionals. Attend this timely webinar and learn the nuts and bolts of preparing compliant reports while avoiding commonly made mistakes. Understand common practices used under purchase price allocation for compliance with ASC 805. Remove the guesswork and come away with step-by-step illustrations of how to prepare a compliant report in a business combination assignment for several common property types. If you appraise commercial properties, you won’t want to miss this webinar!

Duration: 2 hours

Real Estate Industry Perspectives on Lease Accounting
FASB and IASB are engaged in a "Lease Accounting" project whereby lessors and lessees would be required to report leases (including real estate) on financial statements. Concerns have been expressed by lessors and lessees of commercial real estate. Real estate associations have been outspoken about the potential effect on commercial real estate lease-buy decisions. Others have stated a preference for fair value arrangements found under International Financial Reporting Standards. This webinar will deliver real estate industry perspectives on the proposed lease accounting rule and alternatives that may garner support.

Duration: 2 hours

Regression Analysis is Becoming Mainstream: Are You Prepared?
Regression analysis is quickly becoming a mainstream tool for valuation and consulting assignments. Not only do appraisers now have access to data and the technology to use regression effectively, clients and the courts are increasingly interested in seeing the results of regression modeling. This webinar introduces regression and how it can fit into your practice.

Duration: 2 hours

Regression Modeling: Why Bad Results Happen To Good Appraisers (And What to Do About Them)
Regression has become a mainstream tool for valuation and consulting assignments. While putting data into a software program and getting an answer is easy, understanding how each data component impacts the overall model design and results is much more complex. This webinar focuses on the use of regression modeling for real estate valuation, and the results of such modeling.

Duration: 2 hours
Residential Green Valuation: Tools for Valuing High Performance Properties
The proposed Green Resources for Energy Efficient Neighborhoods (GREEN) Act legislation will mandate that appraisers have all relevant information about residential property – including plans and specs, green energy labels and certifications and Home Energy Rater Score (HERS) ratings. Be prepared and learn the nuts and bolts by listening to this webinar.

Duration: 2 hours

Residential Solar Photovoltaic Leases: Market Value Dilemma
This webinar will address a number of issues surrounding appraisals of residential properties with Solar PV Leases and Power Purchase Agreements. Residential appraisers may encounter leases and agreements and the information in this webinar will be invaluable in documenting the appraisal report.

Duration: 2 hours

Residential Topics Webinar Series: Advocacy and the Residential Appraiser
This program covers the latest federal and state legislative and regulatory developments impacting residential valuation. Participants will come away from the webinar with a better understanding of policy changes that impact their business, including analysis of waiver plans of Fannie Mae and Freddie Mac; prognosis for housing finance reform legislation and tax reform; updates on FHA, VA, CFPB, and the federal bank regulatory agencies; and state legislative initiatives such as statute of limitation projects and appraisal management companies. Stay ahead of the curve and improve the bottom line of your business.

Duration: 90 minutes

Review of Court Decisions on Valuations - Lessons Learned
Court decisions have changed the ground rules for many types of valuation assignments. Some courts such as the US Tax Court have set specific methodology for certain types of valuations and valuation methods. If you do work for estate and gift tax, donations, government agencies, this is an educational opportunity you cannot afford to miss! You will hear from experienced appraisers with court experience as well as a retired IRS litigator. The program will focus on a review of recent court cases as well as older cases setting specific methodology and lessons learned. The cases will cover several courts including bankruptcy and tax courts. The issues addressed will include property taxes, estate and gift issues, bankruptcy valuation, and others.

Duration: 2 hours

Right of Way – Three Case Studies with Two Approaches to Value
What is the proper valuation method for right of way appraisals? Often up for debate, this webinar explores two approaches:
(1) Commonly used corridor valuation with ATF (Across the Fence) methodology and (2) Market-based analysis for right-of-way use. Experts will demonstrate their respective approaches and results to provide a better understanding of the differences and outcomes of the two methods as they provide their positions on a few case studies.

Duration: 2 hours

Sage Against the Machine: Using AVMs Wisely and Productively
What do AVMs look like in 2013? What can they do for you today to make your appraisals better? This webinar will focus on the evolution of AVMs, their current usage, the technology of testing and validation, and recent changes. Appraisers will leave the webinar with an understanding of how AVMs can be part of the services that they offer to their clients.

Duration: 2 hours
Self-Storage: Looking at the Past—Are These Indicators for the Future?

Self-storage is a unique and growing sector of real estate. With approximately 50,000 facilities representing over 1.5 billion square feet of real property and four publicly traded REITs devoted to the asset class, the analysis of self-storage is becoming more complex. While self-storage properties are found in rural, urban and suburban areas throughout the United States, many real estate professionals and market participants simply do not understand the dynamics of the self-storage market.

Duration: 1 hour

Selling Into the Sun - Solar Research Report

In this webinar, the authors of the new report, “Selling Into the Sun: Price Premium Analysis of a Multi-State Dataset of Solar Homes” will discuss the methodologies, data, results, and conclusions. The study found that home buyers consistently have been willing to pay more for homes with host-owned solar photovoltaic (PV) systems - averaging about $4 per watt of PV installed - across various states, housing and PV markets, and home types. This equates to a premium of about $15,000 for a typical 3.6kW sized solar system.

Duration: 2 hours

Social Media for Appraisers: Navigating the Networks

This webinar recording provides social media tips to enhance your knowledge, improve your business and expand your network! The Appraisal Institute’s former President Jim Amorin, MAI, SRA, shares his professional experiences with social media. Listen to this recording and explore the best ways to navigate social networks, and in turn, enhance your business.

Duration: 2 hours

The 50% FEMA Appraisal Rule

Attendees will acquire basic knowledge of flood zones and base flood elevations, and how they impact real estate in coastal areas. Particular emphasis will be on the 50% FEMA rule, also known as the substantial damage rule. The 50% rule is the specific damage assessment guideline established by the Federal Emergency Management Agency (FEMA), and is widely used by coastal communities which participate in the Community Rating System (CRS) of the National Flood Insurance Program (NFIP). This webinar helps appraisers to correctly establish the depreciated market value of the improvements. Brokers will learn the responsibility they have to advise their clients properly before making purchase decisions. Construction professionals can use the information when planning to renovate or make additions. Lenders will find the content valuable for making building finance decisions.

Duration: 2 hours

The CFPB Appraisal Rules and You

The Consumer Financial Protection Bureau is authorized to deal with a range of appraisal related topics, including consumer disclosures, appraisal requirements and servicing requirements. Earlier this year, Regulation B (Equal Credit Opportunity Act) and Regulation Z (Truth in Lending Act) underwent significant changes. The agency also finalized a rule relating to loan servicing with impacts on valuation. Attend this webinar to learn the latest information from CFPB staff on these final rules and their impact on appraisals and hear how banks are treating the new rules.

Duration: 2 hours

The Impacts of Tax Reform on Real Estate and Appraisal

When Congress makes changes to the U.S. tax law, it tends to significantly impact the real estate industry. Such is the case with the 115th Congress, which is considering a broad tax reform plan that includes changes to individual tax brackets and sizable changes to business tax arrangements. Proposed lower rates may result in more real estate investment in certain sectors, and any new plan will make tax planning more prominent and important in the coming years. For appraisers, some may actually benefit from the tax proposals from a business standpoint, while other opportunities exist to offer value added services to tax planners.

Duration: 2 hours
The New Frontier: Marriage of Appraisal Review and Validation Stress Testing
The range of valuation needs within financial institutions is wide-ranging, especially for portfolio monitoring and loan renewals and modifications. Traditional single point in time valuation estimates – whether appraisals or evaluations – may not answer the most important questions asked by the customer (lenders/banks), limiting the usefulness of the services being performed. The U.S. real estate market is late in its cycle, with growing concerns about price pressure in commercial real estate. At the same time, recent guidance released by bank regulators confirms a potential limitless useful life for appraisals and evaluations already in file. This convergence of activity is likely to increase the demand for validations in the near and long term.

Duration: 2 hours

The Residential Market: Impact of Current Conditions on Valuation
Attend this webinar and hear from two noted experts as they cover sweeping market conditions for appraisal purposes and integrating trend reporting. You'll learn how to compare Case-Shiller Indices to reality, how to evaluate the leading indicators of the housing market and forecasting and how to recognize and evaluate Months Remaining Inventory (MRI), list prices and other leading indicators for your valuations.

Duration: 2 hours

The Valuation of Bank Branches
The banking industry is changing rapidly and appraisers will need to alter their valuation techniques to keep up with these changes. This webinar describes traditional as well as innovative and practical ways in which the market value of branch banks can be estimated.

Duration: 2 hours

Trial Components: Recipe for Success or Disaster
This webinar, moderated by John R. Underwood Jr. MAI, SRA, will break down component parts of the trial and inform attendees on what different trial participants are trying to accomplish. Appraisers will have an opportunity to learn about what questions to ask in accepting an assignment and how to prepare for depositions and trial. Our panel of attorneys, all with litigation backgrounds, will provide unique insights into the processes of report preparation and forming an opinion, viewed within a legal framework.

Duration: 2 hours

UAD Aftereffects: Are You Really UAD Compliant?
During this webinar, you’ll get an inside look at how Uniform Appraisal Dataset data has been captured and used by Fannie Mae and Freddie Mac since its inception on September 1, 2011. Learn about the issues with which many of us are struggling and why some appraisers may be unknowingly UAD incompliant.

Duration: 2 hours

Understanding and Using Investor Surveys Effectively
In this webinar, our expert panelists discuss why surveys are excellent vehicles for certain situations, the inherent limitations of surveys and the correct way to use them. Learn how potential abuses can occur and how to avoid misuse that can result in completely incredible conclusions.

Duration: 2 hours
Understanding Repurchase Demands & Rebuttal Appraisals
As of June 30, 2010, it is estimated that Fannie Mae and Freddie Mac possessed a combined total of $354.5 billion in troubled mortgages! Recently, both have exercised their right to return a considerable amount of these troubled mortgages to the original lenders. Appraisal discrepancies are one of the most prevalent reasons behind government-sponsored enterprises repurchase requests. Attend this timely webinar to understand the repurchase demand and rebuttal appraisal process from start to finish!
Duration: 2 hours

Understanding the New Interagency Appraisal and Evaluation Guidelines
On December 2, 2010, the federal bank regulatory agencies released revised appraisal and evaluation guidelines - the first update since 1994! In this webinar recording, industry experts will highlight how the updated guidelines impact real estate appraisers. You'll hear the agencies’ expectations of regulated financial institutions, find out about important appraisal practice issues, as well as hear perspectives from both commercial and residential bank appraisal departments.
Duration: 2 hours

Understanding TILA-RESPA for Real Estate Appraisers
This webinar helps appraisers understand the major implementation issues with the new TILA/RESPA “Integrated Disclosures” Rule (TRID) relating to appraisal. Beginning October 2015, appraisals prepared for mortgage financing will be subject to a new “zero tolerance” framework, likely placing pressure on appraisers, banks and AMCs to quote more accurate fees on assignments. While the Final Rule allows for increase in fees based on “changed circumstances,” the full extent of what might actually qualify for a changed circumstance is not fully understood or has yet to be determined. Complicating the Rule’s implementation further are new consumer disclosure requirements relating to copies of appraisals, as well as existing requirements, such as the payment of customary and reasonable fees to appraisers.
Duration: 2 hours

Understanding UASFLA – A Primer for Stakeholders
This webinar will provide land trusts, state and local government officials, and real estate attorneys with a primer of the major considerations found in the 2016 version of the Uniform Appraisal Standards for Federal Land Acquisitions (UASFLA). Those ordering and reviewing appraisals will gain a better understanding of the major points of emphasis found in the current version and how it might impact UASFLA appraisals. Stakeholders will be provided guidance on how best to work with appraisers when ordering and reviewing UASFLA appraisals.
Duration: 2 hours

Valuation Impacts of COVID-19
The Appraisal Institute has assembled an “All Star” lineup of leading commercial valuation professionals to help investors, developers, financiers, and other industry stakeholders understand buyer and seller reaction, what appraisers will be evaluating in the near and long term, and how to address the pandemic impact by property use. The webinar will also answer frequently asked questions of appraisers in changing markets.
Duration: 2 hours

Valuation Impacts of COVID-19: 1-4 Unit Residential
Is it too early to evaluate valuation impacts of COVID-19 on residential real estate? The Appraisal Institute has assembled leading residential real estate appraisers from across the country to help investors, developers, brokers, and other industry stakeholders understand initial buyer and seller reaction to COVID-19. We have assembled an “All Star” lineup of appraisers in the Top 10 Metropolitan Statistical Areas to summarize initial observations and identify considerations that appraisers will evaluate in the near and long term. We will also discuss appraiser reaction to policy changes of the GSEs, FHA and VA, and discuss the dynamics with employee relocation appraisals, which require forecasting.
Duration: 2 hours
Valuation of Basements: GLA and Other Valuation Considerations
Correctly valuing basement areas has emerged as a hot topic during the housing crisis the last few years. Attend this webinar and hear the perspectives on lower level valuation from leaders in the housing, construction, and finance industries. This webinar will provide an overview on lower level improvements, like green construction, fenestration and other new building techniques, stakeholders want appraisers to be more familiar with. The webinar will also provide an update on policy from Fannie Mae and present best practices for appraisals that include basements. Understand why appraisers view it one way and the construction industry another way. Whether you are an appraiser seeking best practices or a lender in need of background knowledge, this webinar is for you!

Duration: 2 hours

Valuation of Conservation Easements and Taxes
Valuing conservation easements is one of the most difficult assignments an appraiser can take. If you do this complex work, insure you’re also up to speed on the everchanging IRS piece of the puzzle. Listen to this valuable two-hour webinar and gain critical insights and IRS tax court decision updates for your daily practice. This webinar addresses the federal income tax code and regulations pertaining to the donation and valuation of conservation easements. Appraisers, CPAs, and attorneys should be familiar with all these important requirements. Obtain relevant analysis on the most recent tax court decisions involving conservation easements!

Duration: 2 hours

Valuation of Solar Photovoltaic Systems
Residential and commercial real estate markets saw an 80% increase in distributed generation between 2011 and 2012. Demand for such systems is only likely to continue to increase going forward. Demand for appraisers with competency in valuing solar photovoltaic will only grow. Appraisers, lenders, real estate agents, and solar professionals will leave this webinar with some valuable tools and resources you can use today.

Duration: 2 hours

Valuing Net Zero Energy Buildings
Net Zero Energy (NZE) buildings – which use no more energy than they generate on site - have distinct design, construction and operating characteristics that extend beyond the obvious solar PV array. And since energy is the largest controllable operating expense in most buildings, the value implication is both obvious and material. Less obvious is how NZE buildings differ in design, construction and operation from conventional buildings, and how those differences affect the valuation process.

Duration: 2 hours

Wind Projects and Land Value
There are many appraisal considerations in a wind project that present unique challenges to the appraisal process. How do you calculate the value of a wind project? What components of a wind project are assessed? In its U.S. Wind Industry First Quarter Market Report 2012, the American Wind Energy Association reported: There are currently at least 8,916 megawatts under construction across 31 states and Puerto Rico. This represents 57% more megawatts under construction than during the same time last year. According to this statistic, wind projects are rapidly increasing. In this webinar, experts will present information and answer your questions about the appraisal of wind projects.

Duration: 2 hours

Wind Turbine Effects on Value
Wind turbines are becoming a much more common in the landscape, and so are studies of their impacts on value. The purpose of this webinar is to acquaint you with the most recent academic research on the effects of wind turbines on property values.

Duration: 2 hours
Working with an AMC: Finding Common Ground
This webinar will focus on regulations affecting the appraisal profession as they pertain to the Dodd-Frank Act and appraisal management companies. Topics will include the AMC structure, operations, review process and responsibility to a client; an independent appraiser’s responsibilities to a client and an AMC; and working with an AMC to handle increased client requirements. The webinar will offer discussion about how AMCs can help educate, advocate for and improve relations with appraisers.

Duration: 2 hours

Yellow Book Changes - Overview for Appraisers (Free to AI Professionals)
This program, conducted on January 11, 2017, provides an overview of the recent major changes to the Uniform Appraisal Standards for Federal Land Acquisitions (Yellow Book). The program provides an initial analysis of major issues and considerations that appraisers performing Yellow Book assignments should pay particular attention to, such as issues relating to “Larger Parcel,” and market analysis and highest and best use. The program includes a Q&A session for appraisers to understand the full context of the changes.

Duration: 2 hours

You Say Fracking, I Say Frac'ing: Let’s Talk Valuation
Whether you call it fracking, frac'ing, or something else, advances in petroleum exploration & production technology including hydraulic fracturing have awakened the potential of mineral interests that have been dormant for decades or centuries. The unlocking of this wealth has now made minerals a major economic issue where they were once an ignored afterthought.

Duration: 2 hours
Other Programs

**General Demonstration Report—Capstone Program**
The General Demonstration Report—Capstone Program is an option Candidates for Designation may choose to complete their demonstration of knowledge requirement for their MAI designation. Like the traditional requirement, the same skills and knowledge base are required to produce a complete demonstration appraisal report. However, this program was designed to offer an option that accelerates the completion of the report. Instead of selecting and compiling data on a property, participants are provided with a subject property and data to analyze and then write the report in a limited time span of approximately two months. Participants must attend two webinars and a 7-day classroom session where facilitators will be on hand to answer questions and offer guidance. The full report is submitted for grading at noon on the seventh day.

The program is designed to be completed in approximately two months; therefore, participants must realize they will need to commit a considerable amount of that time on analysis and writing tasks PRIOR to the classroom setting. One pre-class writing assignment (fundamental market analysis) is required before the second webinar. It is important that participants understand they will need to spend a minimum of 150-200 hours to successfully complete this program. And during the 7-day classroom session, participants should expect to work on their reports after the 7-hour days spent in the classroom. 10-12 hours a day that week will not be unusual. Subject property types include 1) multifamily, 2) office building, and 3) retail (coming soon).

- General appraisers seeking the MAI designation; not approved for state or AI CE credit.

**Client Education**

**Commercial Real Estate Training: Appraisal Engagement, Appraisal Review and Evaluation**
Engage and challenge your staff by attending the Appraisal Institute’s training program specifically designed for lending, credit, or risk management staff who handle appraisal engagement, review, and evaluation. This program, developed by a former chief appraiser with 35+ years of commercial real estate experience, will provide insight on 1) what regulators expect from banks, 2) the internal bank policy and process, 3) the appraisal process, and 4) the scope of work. The four-part training sessions can be taken together or separately. Objectives for the training series:

- Understand how federal regulations govern appraisals
- Understand the work product of appraisers who are assigned federally related transactions
- Establish a best practices' process for successful appraisal engagement including development, maintenance, and monitoring of a vendor panel
- Develop an understanding of USPAP and its Scope of Work Rule which governs how an appraisal is performed and how it is communicated to a client
- Learn the importance of appraisal review to the underwriting process
- Understand how the sales comparison approach is applied when completing an appraisal review or evaluation of owner occupied property
- Understand how the income approach is applied when completing an appraisal review or an evaluation of an investment property

**Part A**

**Engaging Appraisers: Compliance with the Regulations**
Cover federal appraisal regulations and federal banking regulations governing single-unit (family) residential and commercial real estate. Learn about USPAP and its three rules for appraisers—Ethics Rule, Competency Rule, and Scope of Work Rule. Learn how to properly select an appraiser, minimum appraisal standards, and review requirements. Learn how to order an appraisal, monitor a vendor panel, which documents banks need to provide to the appraiser and much more!
Part B
Sales Comparison Approach – A Case Study
Covers use of sales comparison approach in completing an appraisal review or an evaluation of a land parcel. Introduces approach and discusses its usefulness for different types of properties. Scope of work issues are also introduced, including the number of sales required, client requirements, level of data confirmation, level of inspection, and level of comparison and analysis. Case study also discusses steps of the review process and uses the Engagement Proposal / Reviewer’s Checklist.

Part C
Income Approach – A Case Study
Discuss the income approach and types of properties for which income approach is used. Scope of work issues are discussed in relation to the appraisal, evaluation, and appraisal review. Case Study demonstrates how to estimate income from all sources, adjust for market vacancy and collection loss, deduct expenses, and use direct capitalization. As a reviewer, recognize the focus vis-a-vis: whether the report's quality and quantity of data is appropriate and whether the value conclusion is credible.

Part D
Single Family Residential—Understanding the URAR Report
Learn how appraisers document their opinion of market value using the sales comparison approach, how they select comparable sales, and rationale/procedures for making adjustments. Identify the steps needed to complete a real estate appraisal, identify all elements recorded on a URAR report, and understand the impact of rules on appraiser independence.

Rapid Response: Market Analysis in Volatile Markets for Lenders
Market conditions can change dramatically in a very short time. Appraisers have the responsibility to account for market conditions on the effective date of value. This seminar will remind everyone that while market conditions are stable much of the time, they can change rapidly and that will impact the risk associated with a mortgage loan. This seminar will review basic concepts and techniques used in performing market analysis in residential property appraisals and explain the difference between neighborhood analysis and market analysis.

- Discuss common problems and misunderstandings in appraisal reports.
- Define the terms appraisers commonly use in market analysis.
- Illustrate the requirement that market value appraisals include a market analysis.
- Illustrate how to quickly extract, compile, analyze, and present the data in a way that the intended user can understand it.
- Show underwriters where to see inconsistencies within the various parts of a report.
- Illustrate the requirement for the existence of a market in the term market value.
- Introduce concepts that will help lenders differentiate between a neighborhood and a market.
- Illustrate pros and cons of the various tools used for market analysis by residential appraisers.
- Demonstrate the use of some statistical tools available from various sources to support the appraiser’s opinion of market supply and demand and to support the highest and best use conclusion.
- Introduce several local, statewide, regional, and national databases to assist in analyzing supply and demand.
