

Subjects

Actual cash value

using actual cash value to determine value for the 50% FEMA Rule, 267–271

Appraisal Institute (AI)

AI members awarded new designations in 2016, 70–75

AI president profile, iv (Winter)

Y. T. and Louise Lee Lum Library resources, 60–69

Appraisal review

using Benford's Law to detect database anomalies, 274–282

Appraisal standards

links to appraisal standards related to valuation practice, 68–69

Awards

Appraisal Journal Outstanding Service Award, v (Spring)

Armstrong/Kahn Award, vi–vii (Spring)

Richard U. Ratcliff Award, ix (Spring)

Swango Award, viii (Spring)

Benford's Law

expected frequency of digits in databases, 275

spotting database errors, corruption, or fraud, 276–278

Bureau of Economic Analysis (BEA)

economic information and data available from the BEA, 231–234

Business value

valuation of business enterprise intangible assets of casinos, 194–204

Casinos

valuation of business enterprise intangible assets of casinos, 194–204

Commercial property

valuation of business enterprise intangible assets of casinos, 194–204

Construction costs

consideration of construction costs in application of the 50% FEMA Rule, 267–271

Consumer Price Index (CPI)

sources of information and data related to CPI, 152–155

Corridors

pipeline easements and damage to the remainder, 29–38

Court cases

state court decisions on valuation issues, 1–8, 83–95, 169–178, 251–260

Demand

market equilibrium as balance between demand and supply, 307–308

Data

economic information and data available from the Bureau of Economic Analysis, 231–234

economic information available from Federal Reserve district banks, 142–150

sources of information and data related to Consumer Price Index, 152–155

using Benford's Law to detect database anomalies, 274–282

Easements

pipeline easements and damage to the remainder, 29–38

Federal Emergency Management Agency (FEMA)

common errors in a 50% FEMA Rule appraisal, 269–270

valuations under the 50% FEMA Rule, 261–273

Federal Reserve Banks

economic information available from Federal Reserve district banks, 142–150

Flood zones

appraisals required for repairs and renovations of non-compliant structures in flood-prone areas, 261–273

Furniture, fixtures, and equipment

valuation of casinos, 194–204

Golf courses

impact of cart paths on prices of condominiums in golf course communities, 96–103

Green buildings

role of incentives in green building valuation, 205–215

High-voltage overhead transmission lines

public perception research, 190–191

statistical price studies, 180–187

survey research, 187–190

Hydraulic fracturing

benefits of fracking, 10–12

fracking concerns, 12–16

fracking process, 9–10

Income capitalization approach

income capitalization approach in the valuation of casinos, 201–202

Income tax

qualifying as real estate professional for tax purposes, 122–129

role of incentives in green building valuation, 205–215

Industrial property

ratings of light industrial property productivity features, 109–112

regression analysis of property productivity indexes of light industrial property, 104–121

Intangible assets

valuation of business enterprise intangible assets of casinos, 194–203

International appraising

international papers of interest to US appraisers, 66–68

Internet research

resources for real estate trends and forecasting, 142–155, 231–236

Land

ground leases, 18–26

Leased fee

appraisal methodologies applicable to valuation of leased fee, 24–26

financial benefits of leased fee interest, 19–24

Lum Library

new resources in Y. T. and Louise Lee Lum Library, 77–79, 154–159

Market analysis

equilibrium vacancy, 310–314

market equilibrium, 307–308

resources for real estate trends and forecasting, 142–155, 231–234

Market trends and forecasts

resources for data and information on market trends, 142–155, 231–236

PACE programs

Property Assessed Clean Energy (PACE) program financing for green commercial properties, 209–214

Personal property

valuation of tangible personal property in complex enterprises, 194–204

Pipelines

pipeline easements and damage to the remainder, 29–38

Property productivity

ratings of light industrial property productivity features, 109–112

regression analysis of property productivity indexes of light industrial property, 104–121

Proximity

value effects of proximity to transmission lines and substations, 179–193

Regression analysis

applications of regression, 222–229

regression analysis of property productivity index, 104–121

regression types and uses, 219–221

Remediation

remediation of lake water and effects on value of lakefront property, 285–305

Rent

definition of excess rent and related terms, 121–123

excess rent as intangible, 121–132

Rural property

identifying rights and interests to be appraised in rural property, 40–50

Signage

hazard signage and infrastructure signs, 238–240

Vacancy

frictional vacancy, lag vacancy, and equilibrium vacancy, 308–314

Waterfront property

appraisal of residential water view properties, 130–141

impact of water clarity on value of waterfront properties, 285–305

Cases in Brief

- Appraisal of farmland was not speculative, so in-kind partition of farmland was found to be practicable and equitable, 7–8
 Appraisals for financing may not adequately reflect tax value, 88–89
 Appraisal for refinancing is not sufficient for determining market value in a marital dissolution settlement, 172
 Appraisal that adhered to standard methods of appraisal prevailed over a weighted-average approach, 1–2
 Appraisal relying on testimony by property owners supported recovery for nuisance and for diminution in property value, 2–3
 Appraiser should not assume legal access to landlocked property, 93–95
 Assessor's appraisal based on actual evaluation is more credible than appraisal that did not include visit to property and relied on computer database search for comparables, 176–177
 Assessor's limitation on operating expenses requires supporting data to ensure current and correct assessed value of property, 174–175
 Bankruptcy reorganization plans not economically feasible, 5–6
 Borrower not liable for loan deficiency where credible appraisal shows fair market value of interest in the property exceeded indebtedness on the relevant date, 173–174
 Expert testimony on health risks of toxic chemicals relevant to value of homes on contaminated property, 87–88
 Federally subsidized housing requires unique consideration in tax assessment valuation, 91–93
 In assessment contests, courts will look at evidence supporting tax commission's valuation, not original valuation of tax assessor, 169–170
 Increased flooding and loss of access due to street improvements are material facts that may affect property's highest and best use, 257–258
 Judge rather than jury determines if injury to residue is compensable in Ohio eminent domain, 171–172
 Lease with above-market rental rate does not nullify income approach valuation, 86–87
 Leased fee appraisal unhelpful for valuing actual property value in tax appeal, 89–90
 The lease rate of a retail chain pharmacy was material in determining the tax assessment value of the fee simple interest, 3–4
 Mass appraisal is not necessarily a due process violation, 177–178
 Mississippi Transportation Commission's easement did not automatically expire when its bridge collapsed after Hurricane Katrina, 84–85
 MLS information in an appraisal may be credible if actually independently verified, 175–176

- Mortgage company breached contract by using improper appraisal methods and once breached, subsequent appraisals did not matter, 83–84
- Mortgage subordination required before time of conservation easement gift in order to claim tax deduction, 252–253
- Outlot can be assessed as excess land, 253
- Post-appraisal submission of additional costs based on contractor's opinion is not sufficient basis for reopening appraisal, 170–171
- School district not permitted to selectively appeal only assessments of commercial properties while not appealing assessments of other property types, 256–257
- Short sales and relocation sales cannot be used as comparables, 6–7
- Speculative value of fracking potential fails to change divorce award, 90–91
- State law does not permit speculative values of condemned property, 254–255
- Taxable value of property with restricted use cannot be arbitrary and must be determined using recognized valuation methods, 255–256
- Testimony of appraiser subject to expert privilege, 254
- To determine fair market rent in a commercial lease, parties were not bound solely by consideration of the lease's enumerated factors, 4–5
- Unit rule, not the summation rule, is used when valuing damage to property after a taking, 169
- Value of low-income housing tax credits should be excluded from income approach valuation of affordable housing development, 85–86
- Where witness considered improper elements of damages, his testimony was deemed incompetent, 258–260
- Whether activity violated conservation easement agreement is matter of material fact to be decided by lower court, 251–252
