About the Author	viii	
Foreword	ix	
PART 1	1	
Lesson 1	Rationale of the Income Capitalization Approach	3
	The Nature of Income-Producing Property and Lease Interests	3
	Concepts and Definitions of Value	4
	Review of Basic Principles	5
	The Income Capitalization Approach in the Valuation Process	6
	Relationship of Income and Value	6
	Exercises	7
Lesson 2	Income Expectancy	9
	Gross Income Estimates	9
	Analysis of Expense	10
	Case Studies	12
	Exercises	14
Lesson 3	The Relationship of Income and Value	15
	Gross Rent Multipliers	15
	Overall Rates	16
	Interest Rates	16
	Capitalization Rates	17
	Return On and Return Of Capital	17
	Rate Selection Techniques	18
	Influence of Other Markets	18
	Built-Up and Blended Rates	19
	Residual Techniques	20
	Exercises	21
Lesson 4	Analysis of Market Evidence	23
	Income Projections	23
	Derivation of Multipliers and Cap Rates	25
	Symbols	29
	Exercises	30
Lesson 5	Direct Capitalization	31
	Direct Capitalization	31
	Direct Capitalization with an Overall Rate	31
	Residual Techniques in Direct Capitalization	33
	Pitfalls	35
	Exercises	35

PART 2		37
Lesson 6	Yield Capitalization: An Introduction to Discounting	39
	The Nature of Annuities	39
	Return On and Return Of Capital	39
	Discounting	40
	Simple Problems	41
	Complex Problems	41
	Discounted Cash Flow Analysis	42
	Selection of Discount Rate	43
	Exercises	44
Lesson 7	Tables, Calculators, and Computers	45
	Mathematics of Finance	45
	Compound Interest Tables	46
	Construction of Tables	46
	Other Tables	50
	Tabular Expansion	50
	Interpolation	50
	Accuracy of Tables	51
	Electronic Financial Calculators	51
	Personal Computers	53
	Annuities Payable in Advance	53
	Effective Rate versus Nominal Rate	53
	Conversion Tables	54
	Frequency of Payments	55
	Level Annuity Formulas	56
	Use of Tables, Calculators, and Computers	56
	Exercises	57
Lesson 8	Discounting Procedures and Income/Value Patterns	59
	Income Models	59
	Property Models	63
	Exercises	69
Lesson 9	Lease Interests	71
	The Leased Fee Estate	71
	The Leasehold Estate	71
	The Fee Simple Estate	72
	The Consideration of Risk	72
	The Concept of the Sum of the Parts Equaling the Whole	73
	Prospective Yield and Change as Evidenced by Lease Data	73
	Computerized Lease-by-Lease Analysis	75
	Exercises	76
Lesson 10	Applied Discounting	77
	Level Annuity—Building Residual Technique	77
	Straight-Line Changing Annuity—Building Residual Technique	78
	Straight-Line Changing Annuity—Land Residual Technique	78
	Level Annuity with Known Reversion	79
	Level Annuity—Sinking Fund Recapture Premise	80
	Other Sample Problems	80
	Exercises	85
PART 3		87
Lesson 11	The Mortgage Contribution and the Equity Contribution	89
	Mortgage Contribution	89
	Loan Ratio	93
	Debt Coverage Ratio	93
	Equity Contribution	93
	Cash Flow Rate	93
	Equity Yield Rate	94
	Exercises	100

Lesson 12	An Introduction to Mortgage-Equity Capitalization	101
	Overall Rate	102
	Stabilization of Income	103
	Basic Capitalization Rate	103
	Compensating for Equity Buildup	104
	Variations in Income Projection Term	105
	Compensating for Depreciation or Appreciation	107
	Conclusion	108
	Exercises	108
Lesson 13	Applied Mortgage-Equity Capitalization	109
	Ellwood Without Algebra	110
	Ellwood Tables	114
	The <i>J</i> -Factor	114
	Ellwood Symbols and Formulas	119
	Modified Formulas	120
	Demonstration Problems Using Ellwood Tables	121
	Rate Analysis	122
	Computer Routines	124
	Exercises	125
Lesson 14	Discounted Cash Flow Analysis	127
	Present Value	127
	Internal Rate of Return	128
	Similarity to Interest Rate, Yield Rate, and Discount Rate	128
	Savings Bank Analogy	129
	The <i>IRR</i> as a Discount Rate	131
	The <i>IRR</i> Equation	133
	Finding the <i>IRR</i>	133
	Exercises	138
Lesson 15	A Critique of the <i>IRR</i>	139
	Limitations and Pitfalls	139
	More Than One <i>IRR</i>	139
	The Consideration of Risk	144
	Reinvestment Concepts	144
	Other Measures of Performance	145
	<i>IRR</i> Before Taxes versus <i>IRR</i> After Taxes	147
	Summary	149
	Exercises	149
