

Table of Contents

2.8	1,256.32	11,200.36
2.6	1,450.35	12,315.09
1.9	1,097.06	14,365.25
3.0	1,250.77	11,256.89

Foreword	vii
Preface	ix
About the Authors	xiii
Acknowledgments	xv
Chapter 1 Introduction and Overview	1
Threat or Opportunity—An Analogy	2
How to Use This Book	3
Chapter 2 Historical Perspectives and the Use of Statistical Analysis	5
Mass Appraisal Versus Single-Property Appraisal	5
Historical Basis	6
The Birth of AVMs	6
Private Sector Efforts	7
Complications of Automation	8
Appraisal Valuation Modeling	8
Chapter 3 Statistical Analysis and Data	11
The Scope of Analysis	11
Statistical Analysis in the Three Approaches to Value	12
Components of Statistical Analysis	12
Identification	13
Quantification	13
Interpretation	18
Summary	19
Chapter 4 Descriptive Versus Inferential Statistics	21
Descriptive Statistics	22
Graphical Representations of Data	23
Tables	25
Other Descriptive Techniques	27
Inferential Statistics	29
The Basics	29
Inferential Tools	30
Concerns with Inferential Statistics	31

Chapter 5 Making a Case for Causation: A Seven-Step Process	33
1. Analysis and Bias	33
2. Strength of Association	34
3. Consistency/Analogy	35
4. Correct Temporal Relationship	35
5. Dose-Response (Function Relationship)	35
6. Plausibility	36
7. Specificity	37
Summary	37
Chapter 6 Statistical Modeling in the Valuation Process	39
Automated Valuation Models and the Appraisal Model	39
Primary Variables	41
Secondary Variables	42
Other Variables	42
Combinations	43
Modeling and Appraisal	43
Chapter 7 The Concept of Regression	45
A Primary Tool	45
Least Squares Approach	47
Applying the Least Squares Method	47
Output Statistics	49
The Coefficient of Determination (R^2)	49
Coefficient of Variation	51
Coefficient of Dispersion	51
Arithmetical Considerations	51
What is a Good Model?	53
Adjustment Factors	54
Market Conditions (Time)	54
Chapter 8 Building a Regression Model	59
Step 1. Identification of the Modeling Area(s)	60
Step 2. Creating the Sales File	61
Selecting Variables	62
Choice of Comparables—A Key Difference	68
Step 3. Preliminary Tools for Interpreting Data	69
Scatter Plots	69
Sales Ratio Graph	71
Dealing with Problems	72
Step 4. Regression Modeling	72
Step 5. Output (Verifying)	74
Step 6. Reporting Model Results	75
Summary	75
Chapter 9 Case Study	77
Overview of the Subject Property	77
Describing the Sales Data	78
Modeling Process	79
Typical Output	80
Output Results and Testing	85
Deriving a Valuation Equation from the Model	85
Reporting the Results	86
Glossary	87
