**Course Schedule** ................................................................................................................................. xiii

## SECTION 1

**Introduction** ........................................................................................................................................ 1

**Part 1. The Valuation Process**

- Preview Part 1 ....................................................................................................................................... 3
- The Valuation Process—Chart .................................................................................................................. 5
- Introduction to the Valuation Process ......................................................................................................... 6
- STEP 1: Identification of the Problem ....................................................................................................... 7
- STEP 2: Scope of Work ............................................................................................................................. 12
- STEP 3: Data Collection and Property Description .................................................................................... 14
- STEP 4: Data Analysis ............................................................................................................................... 16
- Review Part 1 ........................................................................................................................................... 19

**Part 2. From Analysis to Solutions**

- Preview Part 2 ....................................................................................................................................... 21
- STEP 5: Site Value Opinion ....................................................................................................................... 23
- STEP 6: Application of the Three Approaches .......................................................................................... 26
- STEP 7: Reconciliation of Value Indications and Final Opinion of Value .................................................. 30
- STEP 8: Report of Defined Value ............................................................................................................ 30
- Review of the Valuation Process ............................................................................................................... 31
- Review Part 2 ........................................................................................................................................... 33

**Part 3. Introduction to Income Capitalization**

- Preview Part 3 ....................................................................................................................................... 35
- Getting Started with the HP 12C Calculator ............................................................................................... 36
- Income Capitalization Approach—Setting the Stage .................................................................................. 37
- Terms and Definitions ................................................................................................................................. 44
- Income Capitalization Methods ................................................................................................................ 49
- Review Part 3 ........................................................................................................................................... 51
- PRACTICE TEST—Section 1 ................................................................................................................... 53
SECTION 2

Part 4. Income Capitalization Formulas
    Preview Part 4.................................................................57
    Capitalization Formulas without Fear .............................................59
    Income Multipliers.....................................................................65
    Income Rates.............................................................................69
    Review Part 4. ...........................................................................71

Part 5. Income and Expense Analysis
    Preview Part 5...........................................................................75
    Lease Analysis............................................................................77
    Developing Income and Expense Estimates ....................................82
    Review Part 5. ...........................................................................89

Part 6. Application—Problem Solving
    Preview Part 6...........................................................................91
    Application—Problem Solving .....................................................93
    Review Part 6. ...........................................................................97

SECTION 3

Part 7. Construction and Design Basics
    Preview Part 7...........................................................................99
    Introduction to Appraisal Observation ..........................................101
    Appraisal Observation from the Ground Up...............................101
    House Design for Appraisers ....................................................110
    Review Part 7. ...........................................................................113

Part 8. Introduction to the Cost Approach
    Preview Part 8..........................................................................115
    Getting Started with Cost .............................................................117
    The Basics of Estimating Cost .....................................................120
    Measurement of the Structure .....................................................126
    Review Part 8. ..........................................................................131
Part 9. Components in Cost Analysis

Preview Part 9........................................................................................................135
Analyzing Component Costs ..................................................................................137
Oak Street Case Study (Part I)—Cost Analysis......................................................139
Square Foot Appraisal Form ..................................................................................145
Review Part 9. .........................................................................................................149
PRACTICE TEST—Section 3..................................................................................151

SECTION 4

Part 10. Cost Analysis—Case Study

Preview Part 10........................................................................................................155
Completion of the Case Study ..................................................................................157
Breaking Down the Costs .........................................................................................157
Review Part 10. .........................................................................................................163

Part 11. Commercial Costs and Depreciation Basics

Preview Part 11........................................................................................................165
Quality Classifications for Commercial Structures ................................................167
Depreciation Basics ..................................................................................................170
Review Part 11. .........................................................................................................175

Part 12. Applied Depreciation

Preview Part 12........................................................................................................177
Market Extraction Method .......................................................................................179
Age-Life Method of Depreciation ..........................................................................181
Breakdown Method of Depreciation ......................................................................185
Review Part 12. .........................................................................................................193
PRACTICE TEST—Section 4..................................................................................195
Part 17. Adjustments

Preview Part 17 .......................................................... 283
Identification and Measurement of Adjustments ........................................ 285
Types of Adjustments ........................................................................ 287
Adjustment Process ........................................................................... 289
Reconciliation of the Sales Comparison Approach ......................................... 290
Oak Street Case Study (Part V)—Market Grid Adjustments .......................... 292
Review Part 17 ............................................................................... 295

Part 18. Oak Street Case Study—Market Grid Application

Preview Part 18 ............................................................................. 297
Oak Street Case Study (Part VI)—Instructions for Market Grid ...................... 299
Guide Notes for the Market Grid .......................................................... 300
Review Part 18 ............................................................................... 307
PRACTICE TEST—Section 6 ............................................................. 309

SECTION 7

Part 19. Oak Street Case Study—Sales Comparison (Market Grid Application, cont.)

Preview Part 19 ............................................................................. 313
Oak Street Case Study (Part VII)—Sales Comparison .................................... 315
Review of Adjustments ........................................................................ 315

Part 20. Reconciliation and Communication

Preview Part 20 ............................................................................... 317
Reconciliation .................................................................................. 319
Oak Street Case Study (Part VIII)—Reconciliation ....................................... 322
Communication ............................................................................... 322
Reporting Formats ........................................................................... 324
Report Documentation and Work File ...................................................... 326
Certification ..................................................................................... 327
Review Part 20 ............................................................................... 331
PRACTICE TEST—Section 7 ............................................................. 333
Part 21. Exam Content Review

Preparing for the Exam................................................................. 337
Content Covered in Course......................................................... 338
Overview

Course Description

Basic Appraisal Procedures is designed as an introductory course for individuals preparing for a career as a valuation professional. The course provides the second 30 hours of qualifying prelicense education that is commonly required by states for individuals seeking appraisal licensure.

Participants learn the basic appraisal procedures that can be used to build a foundation for an ethical and competent appraisal practice. The theme of the course is focused on the valuation process. All eight steps of the valuation process are examined with added detail in each of the three approaches to value. In-depth case studies are used to apply the concepts presented in the classroom. They will help participants develop their problem-solving skills.

Learning Enhancements

The course has been designed with a variety of elements to enhance your learning experience.

- **Preview.** To give you a taste of what is to come, you will find a Preview page that begins each Part. Included on the Preview page is a brief overview of the content, learning objectives to consider as you move through the content, and learning tips that will assist you in understanding the information you’re about to learn.

- **Learning Objectives.** Each learning objective covers essential information you need to know to fully understand the concepts in the course. Look them over before the Part begins so that you have a frame of reference as you move through the material. At the end of each Part, reread the objectives. Are you able to do what is stated? If not, this is the time to ask your instructor for help. Or, review the concepts that you do not understand.

- **Case Study.** The case study contains real-world exercises that provide practice in applying the methodologies presented in the seminar.

- **Examples & Problems.** Supplementing the discussions, we’ve included examples and problems to help you visualize and practice what you are learning.

- **Fill-in-the-Blanks.** It is a proven fact that when you write something down, you are more apt to remember it. The Course Handbook has “missing” content in the outline that you will need to add in the space provided in your handbook as the instructor goes over the content.
**Review.** Each Part concludes with a review. Included in the review are the learning objectives and key terms and concepts that have been covered. Also, we’ve provided recommended readings from textbooks that will reinforce what you have learned in class.

**Practice Quizzes and Section Tests.** Short practice quizzes are included at the end of most Parts, and Section Tests are included at the end of each Section in the “Review.” The questions are similar to the types of questions you might find on the exam. By answering the true/false questions, fill-in-the-blanks, or multiple-choice questions, etc., you will know whether or not you really know the information that was covered in that Part. The Review Quizzes and Practice Tests are intended for self-study and answers are found in the Solutions Booklet.

**Digging Deeper.** Digging Deeper information goes beyond the scope of the course and is not intended to be covered in class. It is not tested on the course exam; however, appraisers preparing for the comprehensive exam should be familiar with it, as well as all other material contained in the Course Handbook, whether or not it is presented in class.

### Classroom Guidelines

To make the learning environment a positive experience for everyone attending, please follow these guidelines:

- 100% attendance is required. No exceptions.
- Limit use of laptops to classroom projects.
- Communicate with business associates during break time instead of class time.
- Put away reading materials such as newspapers and books that are not used in class.
- Silence cell phones.
- Use recording devices only if prior permission has been granted.
- Refrain from ongoing conversations with those seated near you and other distracting behavior.

### General Information

- **Calculators.** A financial calculator is required. The accepted model used in the course is the HP 12C.
- **Breaks.** There will be two 10-minute breaks during the morning session and two 10-minute breaks during the afternoon session unless noted otherwise by the course sponsor. The lunch break is one hour.

- **Attendance sheets** will be distributed during class to verify your attendance during the morning and afternoon sessions.

- **Certificates of completion** will be e-mailed after completion of the course, and attendance during the entire course is required.

**Recommended Texts**

- *The Appraisal of Real Estate, 14th ed.*

- *Appraising Residential Properties, 4th ed.*
