   Step 1. Analyze Property Productivity

Preview Part 2....................................................................................................... 27
Steps in the Market Analysis Process .................................................................... 29
Step 1. Analyze Property Productivity .................................................................. 32
Description and Analysis of a Property’s Physical and Market Appeal Attributes ......................................................................................... 35
Description and Analysis of a Property’s Government/Legal/Regulatory Attributes .................................................................................. 36
Description and Analysis of a Property’s Location Attributes ............................. 39
Resources for a Property Analysis.......................................................................... 45
Review Part 2....................................................................................................... 47
Review Quiz ........................................................................................................ 49

Preview Part 3........................................................................................................... 51
Step 2. Delineate the Market Areas/Competitive Market Areas.......................... 53
What Is Market Delineation? .................................................................................. 53
Why Is Delineate the Market Areas/Competitive Market Areas Step 2 in the
Market Analysis Process?.................................................................................... 54
Elements of Market Area Delineation .................................................................... 56
Delineating the Neighborhood for a Subject Property.......................................... 58
Locating Physical and Land-Use Neighborhood Boundary Data ......................... 66
What Level of Market Analysis Is Required?....................................................... 67
Review Part 3.......................................................................................................... 71
Terms and Definitions—Crossword Puzzle.......................................................... 72
Practice Test—Section 1......................................................................................... 75

HOMEWORK: PRACTICE TEST—SECTION 1

SECTION 2

Preview Part 4.......................................................................................................... 79
Step 3. Project/Forecast Demand........................................................................... 81
Two Broad Classifications of Data: Primary Data and Secondary Data................. 83
Step 4. Measure and Project/Forecast Competitive Supply............................... 87
What Are the Components of Supply?................................................................. 88
Review Part 4......................................................................................................... 97
Review Quiz............................................................................................................. 99

Part 5. Math for Market Analysis

Preview Part 5........................................................................................................... 101
Informed Uses of Statistical Data........................................................................... 103
Understanding the Basic Mathematics of Statistical Analysis............................ 105
Using MLS and Microsoft Excel to Support Conclusions.................................... 110
Review Part 5......................................................................................................... 113
Review Quiz............................................................................................................. 115

Preview Part 6............................................................................................................. 117
Application of Market Analysis to the 1004 MC .................................................. 119
Premise for Selecting Data................................................................................... 119
Crafting Clear, Concise, and Accurate Conclusions .......................................... 124
1004 Form: Neighborhood Section ..................................................................... 127
Review Part 6............................................................................................................. 137
Review Quiz ............................................................................................................. 139

Part 7. What Is Highest and Best Use?

Preview Part 7............................................................................................................. 141
Where Does Highest and Best Use Fit in the Valuation Process?....................... 143
Definitions .............................................................................................................. 145
Why Highest and Best Use Is Important to the Valuation Process ................. 153
Standards of Professional Appraisal Practice ..................................................... 154
Review Part 7............................................................................................................. 157
Review Quiz ............................................................................................................. 159
Practice Test—Section 2...................................................................................... 161

SECTION 3

Part 8. How to Test for Highest and Best Use

Preview Part 8............................................................................................................. 165
The Two-Part Analysis of Highest and Best Use:
   Site as Though Vacant and Property as Improved ........................................ 167
Criteria for Testing Highest and Best Use ......................................................... 169
Data Used to Test for Highest and Best Use ....................................................... 169
Case Study: A Real-World Look at Maximum Productivity ............................. 181
Review Part 8............................................................................................................. 191
Review Quiz ............................................................................................................. 193

Part 9. How to Report Highest and Best Use Analysis

Preview Part 9............................................................................................................. 195
General Considerations ....................................................................................... 197
Sample Highest and Best Use Statements .......................................................... 199
Review Part 9............................................................................................................. 209
Overview

Course Description

Residential Market Analysis and Highest & Best Use provides a fresh look at the relationship between market analysis and highest and best use. The course begins with procedures for mapping the market area for a subject property and techniques for interpreting the market trends to develop a market analysis study. The information gained from the market analysis study is then applied to the highest and best use. Participants learn essential links between market analysis, highest and best use analysis, application of the three approaches to value (cost, sales comparison, and income capitalization), and the final opinion of value. In the final section of the course, participants gain practical experience in solving highest and best use problems similar to those they will encounter in practice.

In this course, theory is translated into practice through extensive and varied classroom activities. Participants become actively involved in applying concepts to real-world situations and discover new ways to use their knowledge and analytical skills.

Learning Enhancements

The course has been designed with a variety of elements to enhance your learning experience.

- **Preview.** To give you a taste of what is to come, you will find a Preview page that begins each part. Included on the Preview page are a brief overview of the content, learning objectives to consider as you move through the part, and learning tips that will assist you in understanding the information you’re about to learn.

- **Learning Objectives.** Each learning objective covers essential information you need to know to fully understand the concepts in the course. Look them over before the part begins so that you have a frame of reference as you move through the material. At the end of each part, reread the objectives. Are you able to do what is stated? If not, this is the time to ask your instructor for help. Or, review the concepts that you do not understand.

- **Examples and Problems.** Supplementing the discussions, we’ve included examples and problems to help you visualize and practice what you are learning.

- **Fill-in-the-Blanks.** It is a proven fact that when you write something down, you are more apt to remember it. The Course Handbook has “missing” content in the outline that you will need to add in the space provided in your handbook as the instructor goes over the content.
- **Review.** Each part concludes with a review. Included in the review are the learning objectives and key terms and concepts that have been covered. Also, we’ve provided recommended readings from textbooks that will reinforce what you have learned in class.

- **Review Quizzes and Practice Tests.** Short quizzes are included at the end of each part in the Review, and Practice Tests conclude Sections 1–3. The questions are similar to the types of questions you might find on the exam. By answering the true/false questions, fill-in-the-blanks, multiple-choice questions, etc., you will find out whether or not you really know the information that was covered in that part or section.

- **Digging Deeper.** Digging Deeper information goes beyond the scope of the course and is not intended to be covered in class. It is not tested on the course exam; however, appraisers preparing for the comprehensive exam should be familiar with it, as well as all other material contained in the Course Handbook, whether or not it is presented in class.

### Classroom Guidelines

To make the classroom environment a positive experience for everyone attending, we have some guidelines for your consideration:

- 100% attendance is required. No exceptions.
- Limit use of computers to classroom projects.
- Communicate with business associates during break time instead of class time.
- Put away reading materials such as newspapers and books that are not used in class.
- Please silence cell phones.
- Use recording devices only if prior permission has been granted.
- Refrain from ongoing conversations with those seated near you and other distracting behavior.
General Information

- **Calculators.** A financial calculator is required. The accepted model used in the course is the HP-12C. **Important Note.** Laptops, cellular phones, tablets, iPads, wearable technology (smart watch, Apple Watch, Google Glass, etc.) and other devices that can store data or connect to the Internet are **NOT** permitted during the exam. In addition, all watches, wallets, bags, and purses must be removed and stored out of reach prior to taking the exam.

- **Breaks.** There will be two 10-minute breaks during the morning session and two 10-minute breaks during the afternoon session unless noted otherwise by the course sponsor. The lunch break is one hour.

- **Attendance sheets** will be distributed during class to verify your attendance during the morning and afternoon sessions.

- **Certificates of completion** will be e-mailed after completion of the course, and attendance at the entire course is required.
