SECTION 1

Preview Part 1 ............................................................................................................................... 1
Diagnostic Quiz ............................................................................................................................. 3
Why Use the Cost Approach? ......................................................................................................... 8
Procedure ....................................................................................................................................... 9
Principles and Concepts ................................................................................................................ 10
Market Analysis Overview .......................................................................................................... 12
Highest and Best Use Considerations ......................................................................................... 13
Cost Approach Applications ........................................................................................................ 16
Challenges in Applying the Cost Approach .................................................................................. 17
Standards and Scope of Work Considerations ............................................................................ 18
Review Part 1 ................................................................................................................................ 19
Review Quiz .................................................................................................................................... 21

Part 2. Characteristics of Improvements

Preview Part 2 .................................................................................................................................. 23
Building Inspection Overview ....................................................................................................... 25
Construction Classifications .......................................................................................................... 34
Building Codes ............................................................................................................................... 40
Review Part 2 .................................................................................................................................. 41
Review Quiz ..................................................................................................................................... 43

Preview Part 3 .................................................................................................................................. 45
Building Measurement ................................................................................................................... 47
Building Condition Analysis ......................................................................................................... 50
Use of Plans and Specifications ...................................................................................................... 53
Components of Construction Documents ....................................................................................... 53
Review Part 3 ..................................................................................................................................... 59
PRACTICE TEST—Section 1 .......................................................................................................... 61
SECTION 2

Part 4. Introduction to the Summerville Case Study

Preview Part 4........................................................................................................63
Exercise 1 ..............................................................................................................66
Review Part 4 ........................................................................................................69

Part 5. Current Construction Cost

Preview Part 5........................................................................................................71
Building Cost Analysis .....................................................................................73
Sources for Cost Data ......................................................................................81
Cost Estimating Methods..................................................................................81
Review Part 5 .......................................................................................................97

Preview Part 6.......................................................................................................99
Exercise 2 ...........................................................................................................101
Review Part 6 .....................................................................................................105
PRACTICE TEST—Section 2 .............................................................................107

SECTION 3

Part 7. Depreciation Concepts

Preview Part 7.....................................................................................................109
Major Considerations in Depreciation Analysis ..............................................111
Depreciation—Concepts and Definitions ........................................................114
Building Utility Analysis ................................................................................125
Review Part 7 ...................................................................................................133
Review Quiz ......................................................................................................135

Part 8. Economic Age-Life Depreciation Estimates

Preview Part 8.....................................................................................................137
Economic Age-Life Method—Total Building Depreciation .............................139
Economic Age-Life Applications .....................................................................139
Modified Economic Age-Life Method ............................................................143
Review Part 8 ...................................................................................................149
Part 9. Market Extraction Method

Preview Part 9.................................................................................................................. 151
Market Extraction to Derive Estimates of Total Depreciation ........................................ 153
Market Extraction Procedure ......................................................................................... 154
Market Extraction Calculations ....................................................................................... 155
Applications and Limitations ......................................................................................... 157
Review Part 9. .................................................................................................................. 161
PRACTICE TEST—Section 3 .......................................................................................... 163

SECTION 4

Part 10. Types of Depreciation in the Breakdown Method

Preview Part 10.................................................................................................................. 169
Curable Physical Deterioration.......................................................................................... 171
Incurable Physical Deterioration—Short-Lived Building Components ......................... 172
Incurable Physical Deterioration—Long-Lived Building Components ............................ 174
Functional Obsolescence Considerations ........................................................................ 179
Measuring Functional Obsolescence ............................................................................. 182
External Obsolescence Caused by Negative Influences Outside the Property ............... 190
Review Part 10. ................................................................................................................ 195
Review Quiz .................................................................................................................... 197

Part 11. Exercises in Depreciation

Preview Part 11.................................................................................................................. 199
11.1 Problem ................................................................................................................... 201
11.2 Problem ................................................................................................................... 202
11.3 Problem ................................................................................................................... 203
11.4 Problem ................................................................................................................... 204
Review Part 11 ................................................................................................................ 205

Part 12. Exercises in Depreciation, cont.

Preview Part 12.................................................................................................................. 207
12.1 Problem ................................................................................................................... 209
12.2 Problem ................................................................................................................... 210
Review Part 12 ................................................................................................................ 211
PRACTICE TEST—Section 4 .......................................................................................... 213
SECTION 5

Preview Part 13 ........................................................................................................... 215
13.1 Problem .................................................................................................................. 217
13.2 Problem .................................................................................................................. 222
13.3 Problem .................................................................................................................. 223
Review Part 13 ............................................................................................................. 225

Part 14. Summerville Case Study: Depreciation Estimates

Preview Part 14 ............................................................................................................. 227
Exercise 3 ....................................................................................................................... 230
Exercise 4 ....................................................................................................................... 233
Review Part 14 ............................................................................................................. 237

Part 15. Site Valuation Perspectives

Preview Part 15 ............................................................................................................. 237
Land-Site Considerations ............................................................................................... 241
Principles Affecting Site Valuation .............................................................................. 242
Identification of Land-Site Characteristics: Physical and Legal Considerations .. 245
Site Valuation Influences ............................................................................................... 247
Review Part 15 ............................................................................................................. 251
PRACTICE TEST—Section 5 ....................................................................................... 253

SECTION 6

Part 16. Market Analysis and Highest and Best Use in Site Valuation

Preview Part 16 ............................................................................................................. 257
Market Analysis and Site Valuation .............................................................................. 259
Performing Market Analysis .......................................................................................... 260
Highest and Best Use and Site Valuation ....................................................................... 265
Review Part 16 ............................................................................................................. 275
Review Quiz ................................................................................................................... 277
Part 17. Site Valuation Procedures

Preview Part 17 .......................................................... 279
Site Valuation Methods .............................................. 281
Valuing a Site Using Sales Comparison Analysis .......... 282
Market Data Grids ....................................................... 295
Types of Adjustments ............................................... 298
Price Adjustment Procedure ..................................... 299
Quantitative Adjustments .......................................... 300
Qualitative Analysis ................................................. 303
Reconciliation ......................................................... 310
Review Part 17 ......................................................... 313
PRACTICE TEST—Section 6 ....................................... 315

SECTION 7

Part 18. Oakvale Terrace Case Study: Site Valuation

Preview Part 18 .......................................................... 321
Oakvale Terrace Case Study ...................................... 324
Exercise ................................................................. 327
Review Part 18 ......................................................... 335

Part 19. Extraction and Allocation Methods of Site Valuation

Preview Part 19 .......................................................... 337
Extraction Method ................................................... 339
Allocation Method .................................................. 342
Review Part 19 ......................................................... 349

Part 20. Summerville Case Study: Site Valuation

Preview Part 20 .......................................................... 351
Exercise 5 ............................................................... 354
Exercise 6 ............................................................... 355
Exercise 7 ............................................................... 356
Review Part 20 ......................................................... 359
SECTION 8

Preview Part 21 ................................................................. 361
Cost Approach Review .......................................................... 363
Cost Approach Reconciliation .............................................. 363
Conclusion .............................................................................. 368
Comment on Scope of Work .................................................... 368
Site Valuation ........................................................................ 370
Construction Cost ................................................................. 371
Depreciation Estimates .......................................................... 372
Review Part 21 ................................................................. 375

Part 22. Exam Content Review

Preparing for the Exam ........................................................... 377
Content Covered in Course .................................................... 378

Appendix

Commercial Green and Energy Efficient Addendum .................. 379
Overview

Course Description

*General Appraiser Site Valuation and Cost Approach* is a practical, hands-on course designed and presented in a manner that addresses the actual employment and application of appraisal techniques learned in previous courses. This course concerns two basic aspects of real estate appraisal: land/site valuation and the development of the cost approach. Special attention is given to the appraisal of various types of sites and the various means of measuring accrued depreciation. Another major course component is class work that develops skills in developing a current cost estimate using market extraction, interview techniques, and information provided by professional cost data sources.

An in-depth case study is presented in four segments. It features the valuation of an industrial property and demonstrates the fundamentals of site valuation, estimation of current improvement cost, and various methods of recognizing and measuring accrued depreciation.

This course provides 30 hours of education (28 classroom hours plus a 2-hour exam) and is divided into eight sections. Sections 1–3 consist of a detailed study of the development of a complete cost approach. The step-by-step process of estimating current construction cost is the focal point. Data sources and the comparative-unit method of cost calculation are explored in detail, and the specifics of the economic age-life and market extraction methods of estimating depreciation are discussed.

Section 4 focuses on applications of the breakdown method for estimating depreciation including physical deterioration, functional obsolescence, and external obsolescence. This section concludes with a discussion of cost approach summation, which includes a reconciliation of depreciation estimates.

Sections 5 through 8 focus on site valuation. These sections cover basic site valuation principles, the concept of market analysis, and the development of a highest and best use conclusion.

This course is designed for individuals with introductory experience and an understanding of the fundamental concepts of appraising who wish to become licensed and/or certified appraisers. This course translates theory into practice through extensive and varied classroom activities. By applying concepts to real-world situations, participants can discover new ways to use their knowledge and analytical skills.
Learning Enhancements

The course has been designed with a variety of elements to enhance your learning experience.

- **Preview.** To give you a taste of what is to come, you will find a Preview page that begins each Part. Included on the Preview page is a brief overview of the content, learning objectives to consider as you move through the content, and learning tips that will assist you in understanding the information you’re about to learn.

- **Learning Objectives.** Each learning objective covers essential information you need to know to fully understand the concepts in the course. Look them over before the Part begins so that you have a frame of reference as you move through the material. At the end of each Part, reread the objectives. Are you able to do what is stated? If not, this is the time to ask your instructor for help or review the concepts that you do not understand.

- **Examples & Problems.** Supplementing the discussions, we’ve included examples and problems to help you visualize and practice what you are learning.

- **Fill-Ins.** There will be several places in the Course Handbook where material will list a question or prompt and only blank lines will follow. This is intended for you to complete during or before class. The Course Handbook is intended to be used as a notebook as well.

- **Review.** Each Part concludes with a review. Included in the review are the learning objectives and key terms and concepts that have been covered. Also, we’ve provided recommended readings from textbooks that will reinforce what you have learned in class.

- **Practice Quizzes and Section Tests.** Short review quizzes are included at the end of most Parts, and Practice Tests are included at the end of each Section. The questions and problems on the Practice Tests are similar to the types of questions and problems you might find on the exam. By completing these components, you can see whether or not you really know the information that was covered in that Part.

- **Suggested Solutions.** A tabbed section of suggested solutions appears at the end of the Course Handbook. This component includes suggested solutions to the Diagnostic Quiz, course Problems, Review Quizzes, Practice Tests, and the fill-in-the-blanks that appear throughout the course outline. The instructor(s) will distribute suggested solutions for the Summerville Case Study in class.

- **Digging Deeper.** Digging Deeper information goes beyond the scope of the course and is not intended to be covered in class. It is not tested on the course exam; however, appraisers preparing for the comprehensive exam should be
familiar with it, as well as all other material contained in the Course Handbook, whether or not it is presented in class.

Classroom Guidelines

To make the classroom environment a positive experience for everyone attending, we have some guidelines for your consideration:

- 100% attendance is required. No exceptions.
- Limit use of laptops to classroom projects.
- Communicate with business associates during break time instead of class time.
- Put away reading materials such as newspapers and books that are not used in class.
- Silence cell phones.
- Use recording devices only if prior permission has been granted.
- Refrain from ongoing conversations with those seated near you and other distracting behavior.

General Information

- **Calculators.** A financial calculator is required. The accepted model used in the course is the HP-12C. **Important Note:** laptops, cellular phones, tablets, iPads, wearable technology (smart watch, Apple Watch, Google Glass, etc.) and other devices that can store data or connect to the Internet are **NOT** permitted during the exam. In addition, all watches, wallets, bags, and purses must be removed and stored out of reach prior to taking the exam.

- **Breaks.** There will be two 10-minute breaks during the morning session and two 10-minute breaks during the afternoon session unless noted otherwise by the course sponsor. The lunch break is one hour.

- **Attendance sheets** will be distributed during class to verify your attendance during the morning and afternoon sessions.

- **Certificates of completion** will be e-mailed after completion of the course, and attendance during the entire course is required.
