Overview

Course Description

Review Case Studies—General builds on the concepts presented in *Review Theory—General*, a required course in the Appraisal Institute’s General Review Designation program. In this course, we practice applying the *review process* and preparing written review reports in three case studies. These case studies are designed to present the types of challenges reviewers face in various review assignments. Included are an appraisal report involving an apartment property; an appraisal report involving a commercial subdivision; and a case of two appraisal reports and two review reports involving one property.

By taking this course, participants will gain invaluable confidence in review techniques and review report preparation. While attending an educational offering is no guarantee that a class participant will become competent to review any appraisal (or review) report involving any property type for any intended use, taking this course may greatly enhance a reviewer’s competency level.

Learning Enhancements

The course has been designed with a variety of elements to enhance your learning experience.

- **Preview.** To give you a taste of what is to come, each part begins with a *Preview* page, which contains a brief overview of the content, learning objectives to consider as you move through the material, and learning tips that will assist you in understanding the information presented.
- **Learning Objectives.** Each learning objective covers essential information you need to fully understand the concepts in the course. Look them over before the part begins so that you have a frame of reference as you move through the material. At the end of each part, reread the objectives. Are you able to do what is stated? If not, this is the time to ask your instructor for help or review the concepts that you do not understand.
- **Discussion Questions, Examples, Review Reality Checks, and Case Study Exercises.** Various activities will help you visualize and practice what you are learning.
- **Review.** Each part concludes with a review, which includes the learning objectives and may include key terms and concepts that have been covered. Also, where applicable, we’ve provided recommended readings from textbooks that will reinforce what you have learned in class.

- **Self-Study Review Quizzes and Practice Test.** The course includes a short quiz at the end of most parts and a practice test at the end of Part 16. The multiple-choice questions are similar to the types of questions you might find on the exam. By answering them, you will find out whether or not you know the information covered in each part. The quizzes and practice test are intended for self-study, and answers are found in the Solutions Booklet.
- **Digging Deeper. Digging Deeper information goes beyond the scope of the course and is not intended to be covered in class. It is not tested directly on the course exam; however, appraisers should be familiar with it, as well as with all other material contained in the Course Handbook, whether or not it is presented in class.**

Classroom Guidelines

To make the course a positive experience for everyone attending, please follow these guidelines:

- 100% attendance is required. No exceptions.
- Limit use of laptops and wireless devices to classroom projects.
- Communicate with business associates during break time instead of class time.
- Put away reading materials such as newspapers and books that are not used in class.
- Silence cell phones.
- Use recording devices only if prior permission has been granted.
- Refrain from ongoing conversations with those seated near you and other distracting behavior.

General Information

- **Laptop computer.** A laptop computer with word processing and spreadsheet programs is required for this course.
- **Calculator.** A financial calculator is required. The accepted model used in the course is the HP-12C. Other financial calculators can be used if participants know how to operate them. No class time will be used to cover the operation of other calculators. For additional help, go to the “Using a Financial Calculator” section of the Appraisal Institute’s website: www.appraisalinstitute.org/education/fin_calc.aspx

Important Note: Laptops, cellular phones, tablets, iPads, wearable technology (smart watch, Apple Watch, Google Glass, etc.), and other devices that can store data or connect to the Internet are NOT permitted during the exam. In addition, all watches, wallets, bags, and purses must be removed and stored out of reach prior to taking the exam.

- **Breaks.** There will be two 10-minute breaks during the morning session and two 10-minute breaks during the afternoon session unless noted otherwise by the course sponsor. The lunch break is one hour.
- **Attendance sheets** will be distributed during class to verify your attendance during the morning and afternoon sessions.
- **Certificates of completion** will be emailed after completion of the course, and attendance during the entire course is required.
