WKCTC Emerging Technology Center- Room 109

5100 Alben Barkley Drive, Paducah, KY 42001

Held in collaboration with the Bluegrass Chapter of the Appraisal Institute and the REALTOR® Association of Western Kentucky

REGISTER HERE

Most appraisers have tried an AI assistant for a paragraph or an email, and most have never been shown how to use one systematically. This seminar moves licensed real estate appraisers from occasional use to deliberate professional practice. This will be deliberately tool-agnostic. Every capability is taught at the level of the category rather than the product, so the skills apply to whichever general-purpose AI assistant the appraiser uses. The instructor demonstrates each capability live on appraisal tasks, and participants leave with a step-by-step field guide for applying every procedure in their own practice.

Seven (7) CE credits APPROVED with the KY Board of Real Estate Appraisers. Any & all cancellations are subject to an admin fee. No credit/refunds for cancellations made on or after 7 days prior to class.
